TRANSPO

Spanning The Globe To Serve You Better

Modern vehicle engine technology requires precision electronic engine management systems to ensure efficient engine performance and optimized emissions control.

New charging system concepts, such as voltage regulators utilizing digital technology and bridge rectifiers incorporating avalanche diodes, are critical to support the latest requirements.

WAIglobal manufactures Transpo brand precision electronic components for Automotive, Heavy Duty, Marine, Off-Highway, Motorcycle, Industrial, Small Engine and Specialty Markets. These products include Voltage Regulators, Rectifiers, Ignition Modules, Sensors and other Semi-Conductors. With over 2000 electronics products available, Transpo is considered the leader in the aftermarket automotive electronics industry and with the WAIglobal commitment of first-to-market, Transpo introduces over 200 new products per year.

To sustain the competitive edge, Transpo applies quality to every phase of its operation. This brings to market a product line compatible with industry and O.E.M. standards in form, fit and function. Continuous improvement drives not only the design of Transpo products, it promotes sustainable material specifi-cations, manufacturing processes and operating systems. As a prime manu-facturer, Transpo controls all phases of production from raw materials to the finished product. Transpo's commitment to quality is evidenced by maintaining the highest quality standards and includes ISO / TS 16949, ISO 9001, and ISO 14001. Transpo products are 100% ROHS compliant and utilized on O.E.M. and O.E.S. production.

WAIglobal supplies product worldwide through its global distribution network including Europe, Poland, UK, China and U.S.A. distribution facilities. WAIglobal provides full-line coverage, including Transpo electronics and maintains inven-tory levels to support the commitment of having product on-hand when you need it.

Transpo provides field support through a complete range of advanced electron-ics test equipment. Product identification is provided through comprehensive photos, application and technical data in catalogs or on our website. For addi-tional information about Transpo products, contact Customer Service or visit us at www.waiglobal.com.

REG TEST FIXTURE

- Test A and B Circuit, 12 and 24 Volt Alternator Regulators
- Test Field Circuit with 0.5A and 3.0A Loads, 1A 24Volt
- Warning Light Circuit to Simulate Vehicle Indicator Lamp for 12 and 24 volt regulators
- Dual stator Output for Valeo type regulators and dual Frequency, replaces VRC101-34
- 5 Volt lamp (LI) for F601 type application and also for PCM type lamp circuits driven from 5 Volts
- Built in VRC101-31 Functions; enables test of F601 type regulators at 13 volts, 14 Volts and 15 Volts
- Universal power supply 47 - 63 Hz, 100 - 240 VAC and 3 amp fuse included
- Built in ôPDö tester to replace VRC101-26
- Built in drivers for BSS and LIN regulators in position one
- Lead Set and Test Manual Provided
- Push Button identify Active L-Terminal (Choke Drive)
- Push Button identify Presence of Over-Voltage Function
- Push Button C (Computer) type regulators
