

## S300 Mini Safety Laser Scanner

Maximum safety in mini format –  
contact-free, compact and easy to integrate

**SICK**  
Sensor Intelligence.

## S300 Mini – the world’s smallest safety laser scanner from the world’s largest safety portfolio

From the global market leader in safety applications: the S300 Mini safety laser scanner. After the success of the S3000, with the largest scanning range available on the market, and the compact S300, the S300 Mini is the next logical step in further miniaturization.

### Diverse applications

Safety laser scanners enable non-contact monitoring of freely programmable areas. Like an optical radar, the compact systems scan their environment in a fan shape and identify any object in their detection zone. They are universally applicable in production areas and in storage spaces. For either mobile or stationary applications: The S300 Mini is an uncomplicated safety solution for all industrial sectors.

### Save space and gain safety

- Easy integration thanks to very compact size
- Greater machine efficiency by removing barriers
- Vertical and horizontal protection possible
- Minimum installation effort as the sender and receiver are housed together
- Reduced downtime and brake wear on automated guided vehicles thanks to triple field functions

With a height of 116 mm, the S300 Mini is the smallest safety laser scanner in the world

## Safety is not a question of size

### Personal protection for many areas of application

The S300 Mini safety laser scanner is ideal for protecting hazardous areas, safeguarding hazardous points or access protection for machines and systems, as well as for protecting automated guided systems.

### Cost-effective and easy to integrate

The S300 Mini's compact format and low weight make it easy to integrate. It will fit almost anywhere and individual application adjustment enables flexible safety solutions with simple handling – all at low cost. Because its threaded mounting holes are in exactly the same position, the S300 Mini can be mounted in place of an existing S300.

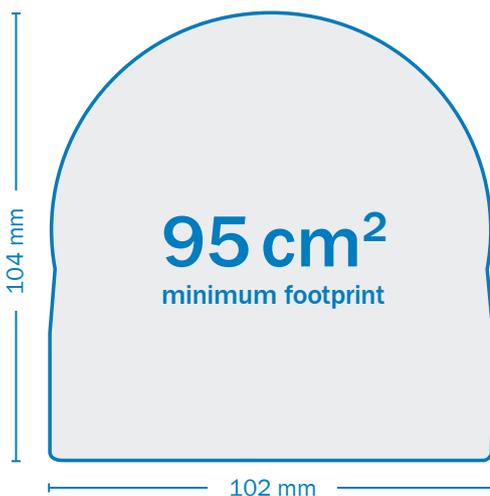

S300 Mini Remote for safeguarding AGVs

S300 Mini Standard as a pressure sensitive mat replacement

### A lot of functions in a small space

- S300 Mini Standard design for simple stand-alone solutions
- S300 Mini Remote design for combination with the Flexi Soft safety controller
- Vertical and horizontal protection with 270° scanning angle
- Installation volume of only 850 cm<sup>3</sup>
- Footprint of 95 cm<sup>2</sup>

S300 Mini in actual size: 102 x 116 x 104 mm (W x H x D)

## From a simple solution through to a wide range of functions

The S300 Mini Standard is ideal for simple tasks, with its outstanding price/performance ratio. The Remote version of the S300 Mini has an impressive range of functions in a very compact form.

### S300 Mini Standard

#### Features

- A triple field set: one protective field, two warning fields
- Scanning range: 2 meters or 3 meters
- 270° scanning angle

#### Areas of application

- As pressure sensitive mat replacement
- As a replacement for bumpers on smaller and simpler vehicles

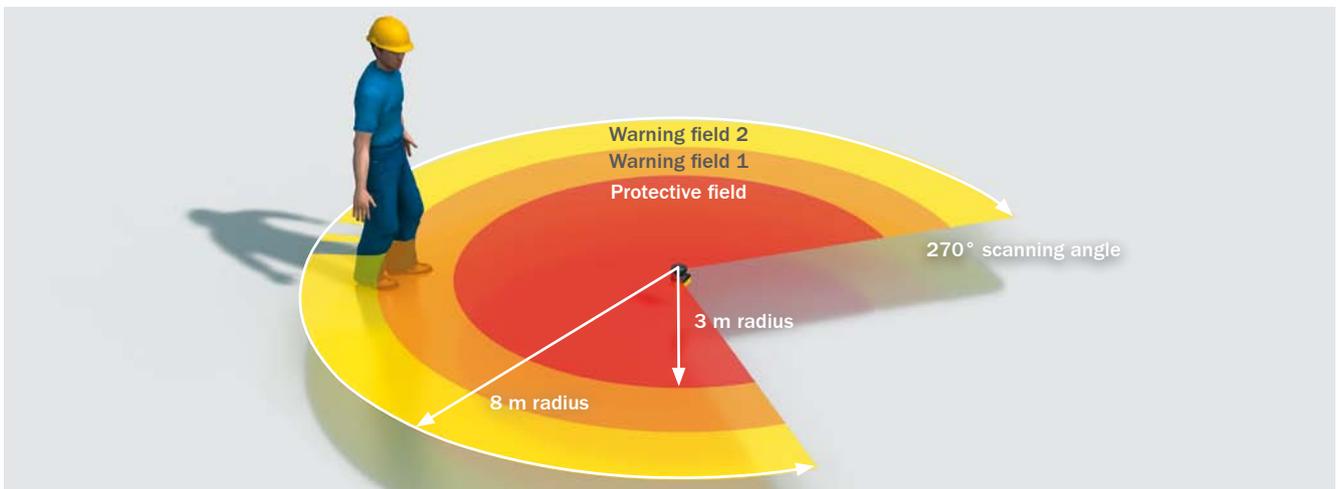

### S300 Mini Remote

#### Features

- Up to 16 triple field sets with two warning fields and one protective field each, as well as up to 32 monitoring cases.
- 270° scanning angle
- Up to 4 scanners on one Flexi Soft safety controller

#### Areas of application

- For more complex vehicles with greater functions

The S300 Mini's warning and protective fields enable flexible reaction to a variety of hazardous situations

## Little effort for a lot of safety

Application example: protecting a small vehicle with two S300 Mini

### S300 Mini Remote: maximum functionality in the minimum of space

- Cost-effective all-round vehicle protection possible
- Unbeatable cost-effectiveness – 270° scanning angle allows all-round protection with only two scanners
- Minimum cabling effort saves time and costs
- Simple configuration and diagnosis thanks to a central interface to the controller
- Very easy replacement of individual safety laser scanners

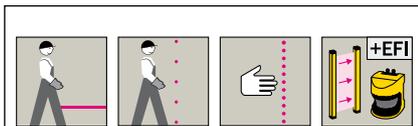

### Flexi Soft: „outsourced intelligence“

The Flexi Soft central safety controller has a modular structure and is configured by means of the intuitive Flexi Soft Designer software. The SICK-specific EFI interface (EFI = Enhanced Function Interface) transmits data for the safety-related communication, enabling enhanced sensor functions.

### Cost reduction with S300 Mini Remote

Saving on controller intelligence in the safety laser scanners themselves results in a crucial cost benefit: You only have to buy and program the control electronics once, in the form of the Flexi Soft. The SICK-specific EFI interface significantly reduces the amount of cabling you need.

Maximum safety in mini format

### Product description

The S300 Mini safety laser scanner has an impressive ultra-compact design ensuring it can fit easily into any vehicle or machine design. Strong performance with up to 16 triple field sets to provide the ultimate in flexibility.

The triple field function enables a protective field and two warning fields to be operated at the same time. This minimizes downtimes and brake wear. The S300 Mini Remote has an internal interface (EFI) for safe device communication.

This allows the realization of advanced system solutions, for example with the Flexi Soft safety controller. Complete protection systems for vehicles and machines can easily be implemented within the system network. CDS (Configuration & Diagnostic Software) or the Flexi Soft Designer can be used to define protective and warning fields in a convenient way on a PC or laptop from an access point.

### At a glance

- Very compact design
- 2 m or 3 m protective field range
- 270° scan angle
- Up to 16 switchable field sets (16 protective fields, 32 warning fields)
- EFI interface for safe SICK device communication
- Selectable resolution for hand, leg or body detection
- Contour as reference for vertical applications
- Easy-to-configure fields and functions

### Your benefits

- Simple integration due to ultra-compact design
- Easy installation, commissioning and maintenance for stationary and mobile applications
- Unbeatable cost-effectiveness – 270° scan angle allows complete application protection with only two scanners
- Variety of field sets guarantees safety and productivity when protecting vehicles or moving machine parts
- Easy modular expansions, simple cabling and additional functions using SICK safety controllers with EFI
- Easy to manage, reducing costs and work time
- Reduction of downtimes and brake wear thanks to triple field function
- Decades of proven safety technology guarantee maximum reliability and availability – even under difficult conditions

### General data

<b>Laser protection class</b>	1 (CFR 1040.10 and 1040.11, CDRH 21, IEC 60825-1)
<b>Enclosure rating</b>	IP 65 (EN 60529)
<b>Protection class</b>	III (EN 50178 and EN 60950)
<b>Safety-related parameters</b>	
Type	Type 3 (EN 61496-1)
Safety integrity level	SIL2 (IEC 61508), SILCL2 (EN 62061)
Category	Category 3 (EN ISO 13849)
Performance level	PL d (EN ISO 13849)
PFHd (mean probability of a dangerous failure per hour)	$8.0 \times 10^{-8}$ (EN ISO 13849)
T <sub>M</sub> (Mission Time)	20 years (EN ISO 13849)
<b>Ambient operating temperature from ... to</b>	-10 °C ... +50 °C
<b>Type of light</b>	Pulsed laser diode
<b>Wave length</b>	905 nm
<b>Housing color</b>	RAL 1021 (yellow), RAL 9005 (black)
<b>Housing material</b>	Die-cast aluminum
<b>Front screen material</b>	Polycarbonat
<b>Front screen surface finish</b>	Outside with scratch-resistant coating
<b>Dimensions (W x H x D)</b>	102 mm x 116 mm x 105 mm
<b>Weight</b>	0.8 kg, without connecting cables

### Functional data

	S300 Mini Standard	S300 Mini Remote
<b>Scanning angle</b>	270°	
<b>Protective field range, radial</b>	2 m / 3 m (depending on type)	
<b>Number of field sets</b>	1	16
<b>Type of field sets</b>	Triple field sets with 1 protective field and 2 warning fields each	
<b>Number of monitoring cases</b>	1	32
<b>Remission</b>	1.8 % ... > 1,000 %, reflectors

<b>Resolution</b>	30 mm, 40 mm, 50 mm, 70 mm, selectable 30 mm, 40 mm, 50 mm, 70 mm, 150 mm, selectable (depending on type)	
<b>Angular resolution</b>	0.5°	
<b>Protective field supplement</b>	100 mm	
<b>Warning field range</b>	8 m	
<b>Distance measuring range</b>	30 m	
<b>Number of multiple samplings</b>	2 ... 16, configurable via CDS	
<b>Delay of automatic reset</b>	2 s ... 60 s, configurable	

## Electrical data

	S300 Mini Standard	S300 Mini Remote
<b>Connection type</b>	Connecting cable with round plug connector	
<b>Connecting cable length</b>	250 mm	
<b>Diameter of round plug connector</b>	15 mm	
<b>Supply voltage <math>V_s</math></b>	24 V DC (16.8 V DC ... 30 V DC)	
<b>Power consumption</b>	$\leq 0.25$ A (24 V DC) <sup>1)</sup> $\leq 1.35$ A (24 V DC) <sup>2)</sup>	
<b>Universal I/Os</b>	2	–
<b>Number of inputs</b>		
Static control inputs (with EFI)	–	5 <sup>4)</sup>
External device monitoring (EDM)	1 <sup>3)</sup>	–
Restart/reset	1 <sup>3)</sup>	–
Standby	1 <sup>3)</sup>	1 <sup>4)</sup>
<b>Number of outputs</b>		Depends on the configuration of the connected EFI device
Reset required	1 <sup>3)</sup>	–
Safety outputs (OSSD)	2	–
Output for warning field	2 <sup>3)</sup>	–
<b>Configuration and diagnostics interface</b>	RS-232	
Transmission rate	38.4 kBaud	
<b>Safe device communication via EFI/SDL</b>		
Transmission rate	–	$\leq 500$ kBaud
Cable length	–	20 m <sup>5)</sup>
Galvanized decoupling	–	–

<sup>1)</sup> Without output load.

<sup>2)</sup> Including maximum output load.

<sup>3)</sup> Availability depends on the configuration of the universal I/Os.

<sup>4)</sup> The S300 Mini Remote can only be operated on an S3000/S300 safety laser scanner, on a safety controller Flexi Soft or on a sens:Control device via EFI.

<sup>5)</sup> Use only pre-assembled extension cables.

## Ordering information

Delivery S300 Mini

- Safety laser scanner
- Operating instructions and CDS (Configuration & Diagnostic Software) on CD-ROM
- Adhesive label “important information”

The extension cable has to be ordered separately!

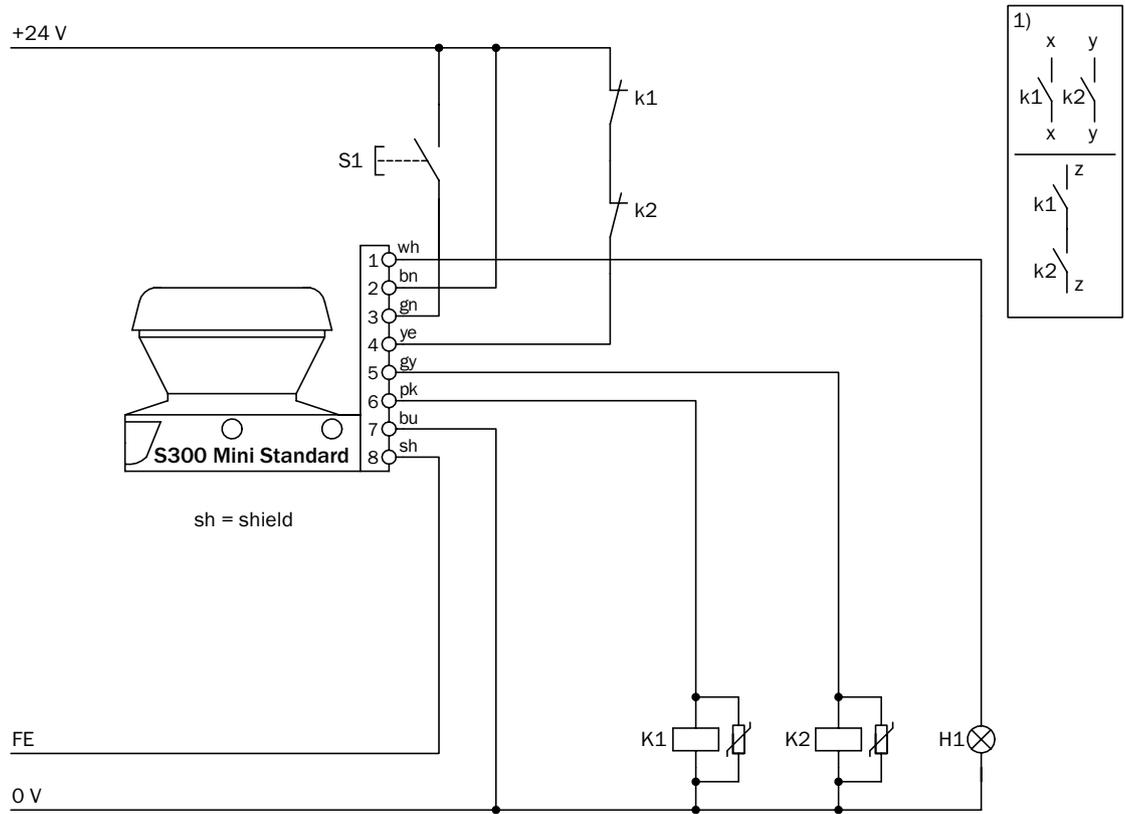

Designation	Protective field range	Model name	Part no.
S300 Mini Standard	2 m	S32B-2011BA	1050932
	3 m	S32B-3011BA	1056430
S300 Mini Remote	2 m	S32B-2011EA	1051884
	3 m	S32B-3011EA	1056431

Connection diagrams

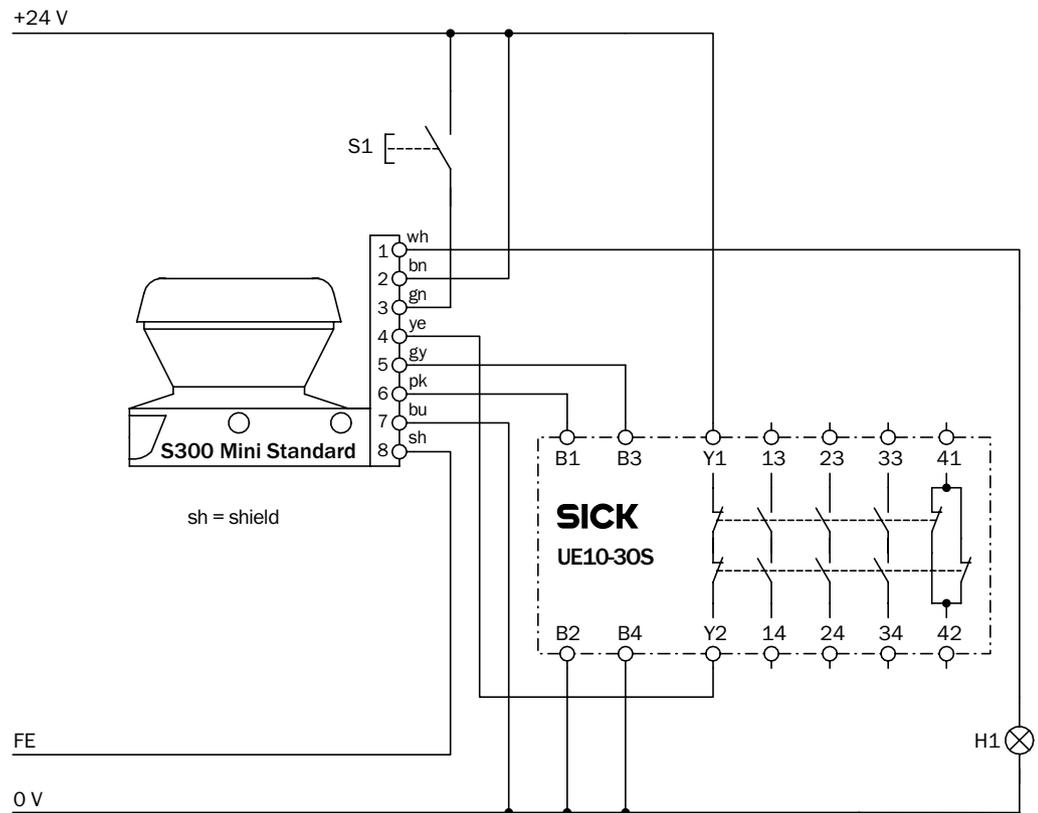

You can find more connection diagrams at [www.mysick.com](http://www.mysick.com)

**S300 Mini Standard with restart interlock and external device monitoring**

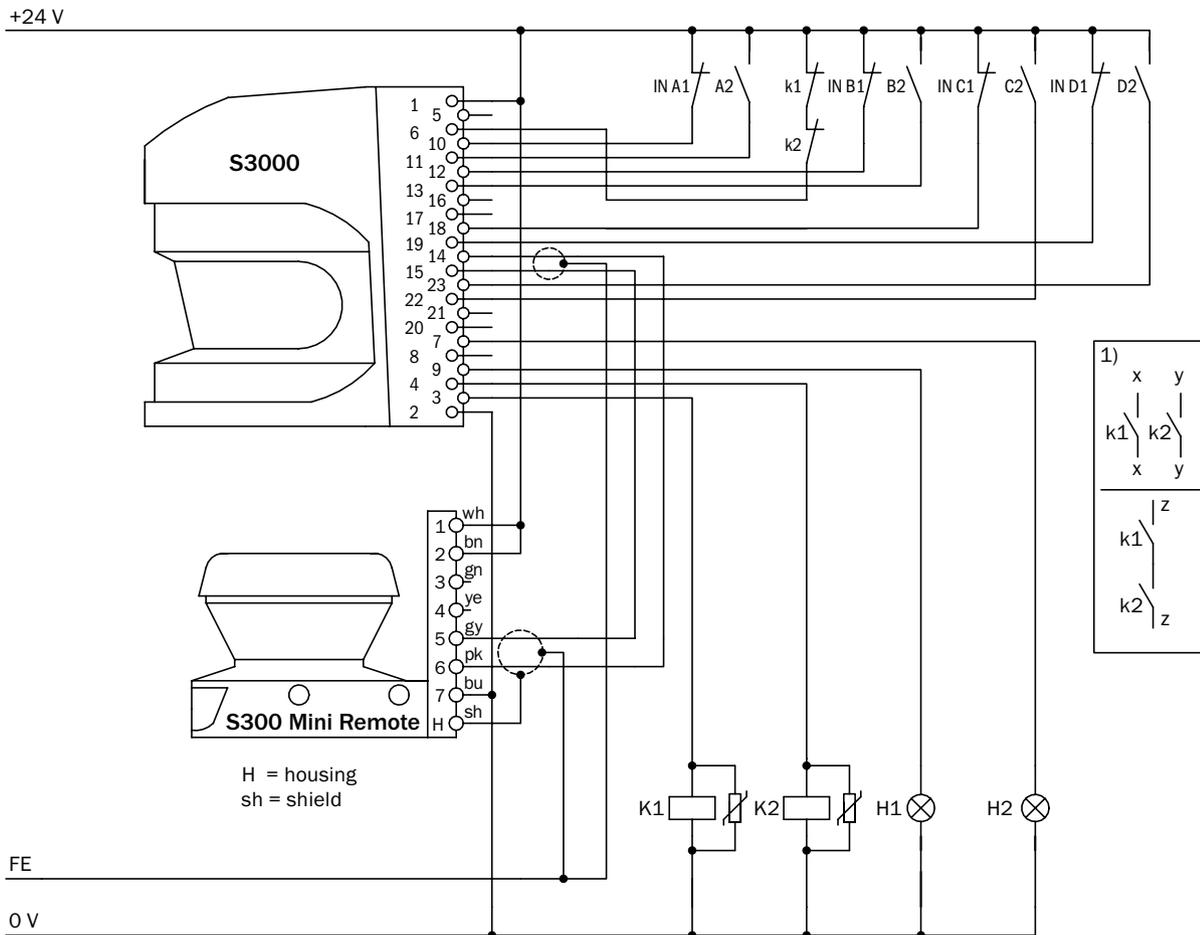

- S300 Mini Standard in conjunction with relays/contactors
- Operating mode: with restart interlock (universal I/O 1 must be configured as reset) and external device monitoring (universal I/O 2 must be configured as EDM)

**S300 Mini Standard on UE10-30S safety relay**

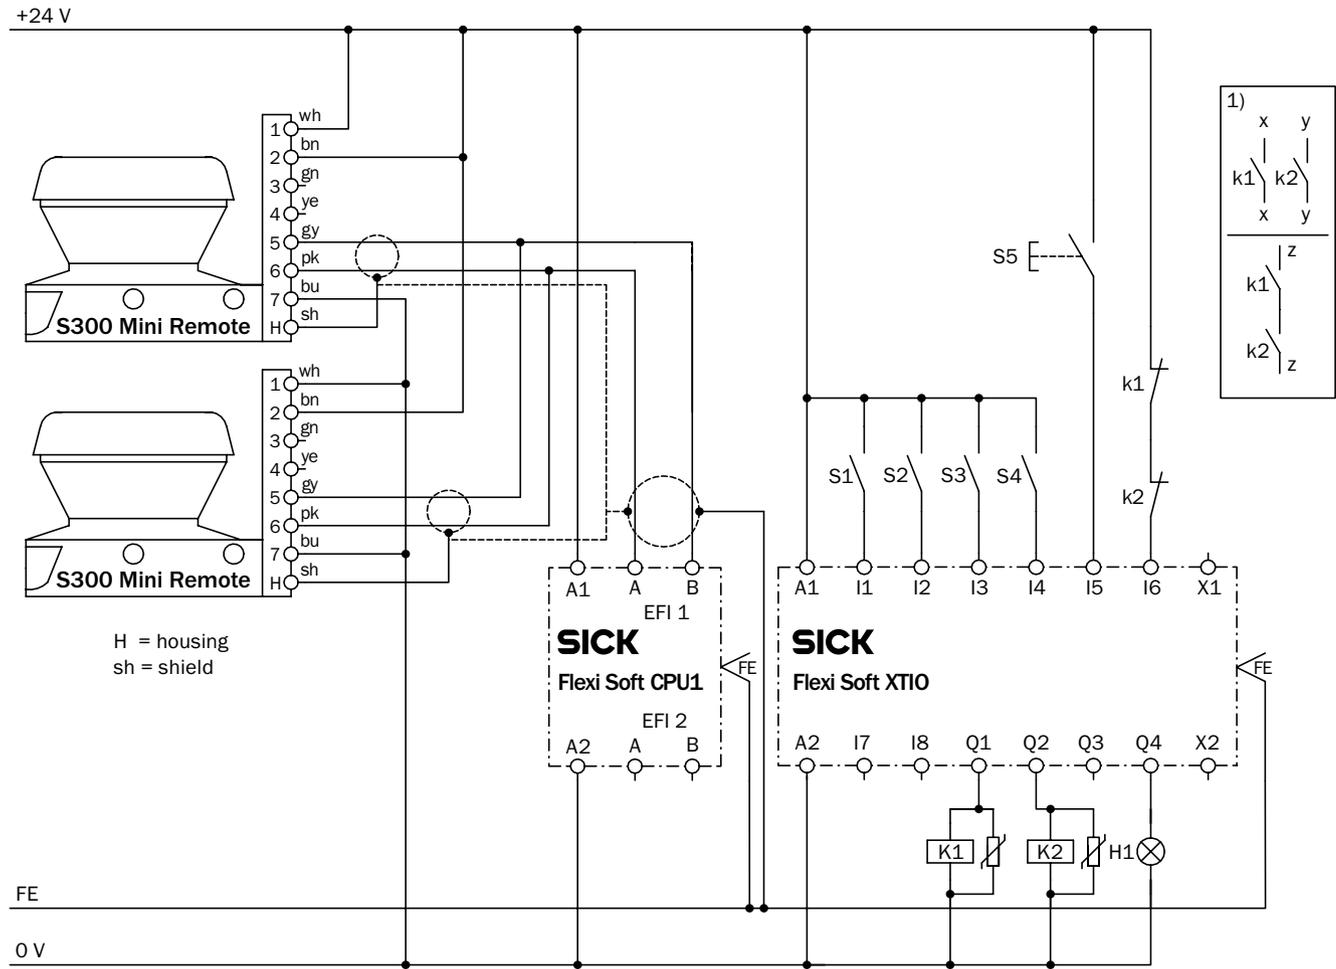

- S300 Mini Standard on UE10-30S safety relay
- Operating mode: with restart interlock (universal I/O 1 must be configured as reset) and external device monitoring (universal I/O 2 must be configured as EDM)

**Protective field switching between an S3000 Expert and an S300 Mini Remote with static inputs**

- S3000 Expert with S300 Mini Remote in an EFI system with relays/contactors
- Operating mode: without restart interlock with external device monitoring
- Static protective field switching by the S3000 control inputs IN A to D. The protective fields affect the OSSDs on the S3000 Expert.

**S300 Mini Remote: protective field switching with a Flexi Soft safety controller**

- Two S300 Mini Remote
- Protective field evaluation and switching via EFI using a Flexi Soft safety controller

## Accessories

### Mounting systems

## SICK at a glance

### Leading technologies

With a staff of more than 5,000 and over 50 subsidiaries and representations worldwide, SICK is one of the leading and most successful manufacturers of sensor technology. The power of innovation and solution competency have made SICK the global market leader. No matter what the project and industry may be, talking with an expert from SICK will provide you with an ideal basis for your plans – there is no need to settle for anything less than the best.

### Unique product range

- Non-contact detecting, counting, classifying, positioning and measuring of any type of object or media
- Accident and operator protection with sensors, safety software and services
- Automatic identification with bar code and RFID readers
- Laser measurement technology for detecting the volume, position and contour of people and objects
- Complete system solutions for analysis and flow measurement of gases and liquids

### Comprehensive services

- SICK LifeTime Services – for safety and productivity
- Application centers in Europe, Asia and North America for the development of system solutions under real-world conditions
- E-Business Partner Portal [www.mysick.com](http://www.mysick.com) – price and availability of products, requests for quotation and online orders
