EXPANDED ANCHOR MOUNT

The Expanded Anchor Mount is tougher than conventional nuts and bolts. This hardware uses Lock & Ride® technology and allows you to change out custom accessories with no loose hardware and no damage to your frame, all in less than 5 minutes. It's also aggressively styled to perfectly match your RZR®.

LIGHTING/AUDIO INTEGRATION

The RZR® XP 1000 frame is engineered specifically for lighting and audio integration. Specific mounting points make for seamless accessory integration, hiding wiring within the cab's frame, securing your cords from damage and making for cleaner and easier install. The frame has predetermined roof-mounting locations for easy installation of accessory lighting, dash mounted controls, overhead audio and overhead lighting.

CAB COMPONENTS

Fully customize your cab. Custom doors offer pro-grade performance and protection. A lower door installs directly on a stock door in under 10 minutes, and integrated hinges and striker plates offer robust door construction and integrated sealing surfaces to help keep debris out of the cab. The integrated visor provides Lock & Ride® Sport Roof installation, with superior sealing and protection. Integrated mounting points provide simple, clean installation of all cab accessories.

SNO-GLIDE POLY BLADE

INCREASE PLOWING PERFORMANCE. REDUCE IMPACT.

This innovative 66" (167.6 cm) snow blade flexes and absorbs impact to minimize stress on the vehicle while plowing. Ideal for residential use where moving and piling large amounts of snow is required, the scooped blade pushes snow forward rather than deflecting it to the side.

- Poly blade flexes and returns to shape as opposed to bending with traditional steel blades
- 66" (167.6 cm) width clears wide pack of snow easily
- Scooped design holds and pushes more snow, improving snow removal efficiency
- Flexible design reduces plow blade chatter for quieter operation
- Blade won't rust, scratch or corrode
- For snow plowing only
