Meilleur Ouvrier de France - Wine waiting*

EUROCAVE

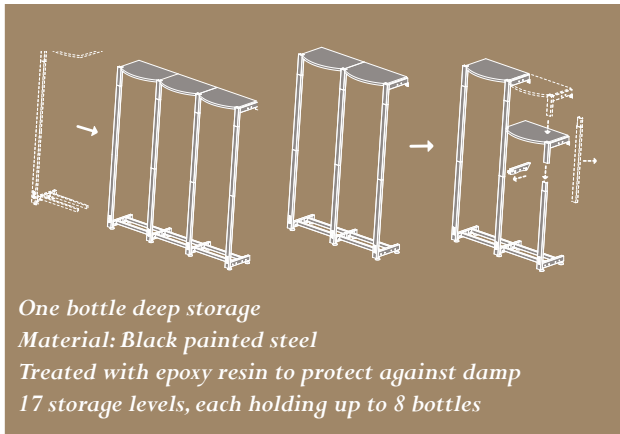

Modulosteel

by EuroCave

Modulosteel by EuroCave is made up of steel modules which are easy to assemble and can be fitted together in an infinite number of ways! A structure with clean modern lines for a decidedly contemporary style.

A modular design

Customisable, Modulosteel can be assembled in an infinite number of ways with its modules, which attach to each other. 17 storage racks per module allow optimised configuration. Can be adjusted to half its height for vaulted cellars or low ceilings!

A strong structure

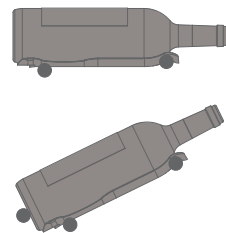

The structure was designed to be easy to assemble. Three fastening systems ensure complete stability.

- 4 adjustable cylinder bases
- 1 screw system at the top of each metal post. To be fixed directly to the wall using an alignment washer
- 1 slide system at the top of each metal post in order to set and adjust any possible gap between the wall and the storage system

Optimised storage

2 types of storage: "storage" and/or "display" mode. Simply move the steel tubes and fix the Main du Sommelier supports in the desired position.

Two optional extras available

A choice of finishes to optimise your storage area and give it a more homely feel.

Optional extra no.1

- One body + 6 ACMS shelves
- Increase your storage capacity: 72 bottles
- Material: Panels of black damp-proof melamine-faced MDF

Optional extra no.2

- A finishing top cover
- Easy to fit, on top of the central bottle storage section. Can be used on the structure at full or half-height.
- Material: Panels of black damp-proof melamine-faced MDF
