

## “What are your favourite pastimes?”

### Use these words:

decrease ['di:kri:s] n

[di:kr'i:s] v

increase ['iŋkri:s] n

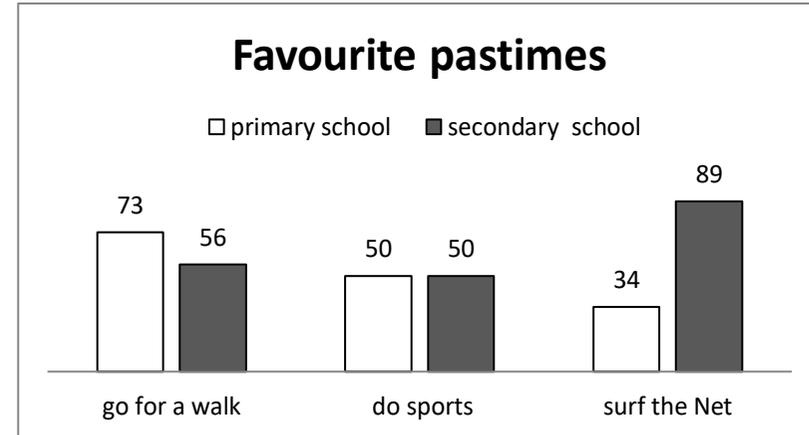

[iŋk'ri:s]v

percentage [pə'sentɪdʒ]

approximately [ə'prɒksɪmətli]

conversely [kən'vɜ:sli]

higher / lower

I'd like to analyse what 1) \_\_\_\_\_ 2 groups of people have. These groups are students of primary school and teenagers.

There is a 2) \_\_\_\_\_ in going for a walk with age. Nearly 3) \_\_\_\_\_% young children prefer to go for a walk during their holidays. This percentage 4) \_\_\_\_\_ to about 5) \_\_\_\_\_% among the students of Grade 7 . 6) \_\_\_\_\_ half of both age groups are fond of 7) \_\_\_\_\_. Conversely, the number of those who surf the Internet in their free time among teenagers is 8) \_\_\_\_\_ than among younger children changing from 9) \_\_\_\_\_% to 10) \_\_\_\_\_%.

In conclusion, it is possible to say that primary students like to 11) \_\_\_\_\_ more while secondary school students spend more time 12) \_\_\_\_\_.
