

## Certification

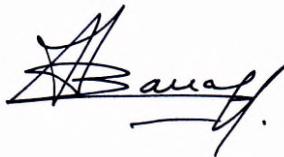

This is to certify that the cast iron pipes and fittings for the evacuation of water from buildings, according to EN 877, produced by

**SAINT-GOBAIN HES GmbH as well as by SAINT-GOBAIN PAM, Nancy,  
 and their factories**

had been subjected to an initial and surveillance test for the first time in 2004. The tests had been performed on the basis of the General Quality and Test Provisions Water Evacuation Technology Cast Iron, Quality Assurance RAL-GZ 698, edition June 2003. The subsequent surveillance tests and inspections were performed twice a year on the basis of General Quality and Test Provisions Water Evacuation Technology Cast Iron, Quality Assurance RAL-GZ 698, in the respectively valid setting.

For the year 2006 and for the subsequent years only one surveillance visit and inspection test is scheduled per annum.
