Kilen is one of Europe's leading suppliers of springs, offering one of the widest ranges of replacements springs for passenger cars, on the market today.

Kilen springs are manufactured in Sweden by the cold coiling of prehardened, oil tempered wire. This method, the most modern available today, was first developed in the production of engine valve springs. The major advantage of cold coiling is that the material consistently maintains maximum precision.

Kilen springs are subject to shotpeening after the coiling. This process builds in stresses in the surface, thus maximising product life by preventing early fatigue and breakage.

All Kilen springs are inspected and tested to ensure the highest quality standards.

Kilen springs are protected from corrosion by an advanced zinc phosphate and epoxy powder resin paint system.

Kilen springs are prior to dispatch packed in strong, attractively designed boxes, complete with application data and part number, to ensure that the customer receives the correct spring for the desired application.

Kilen also offers a wide range of sport springs, gas springs and leaf springs.

## Important information

1. Always replace springs in pairs. Different types of spring on the same axle may cause the car body to lean and consequently cause poor roadhandling.  
No guarantees are applicable when only one spring is replaced.
2. When replacing the front springs, it is advisable to have the wheels re-aligned.
3. Kilen springs are designed to match specific OEM-specifications. There are however, some occasions, when we produce slightly modified versions of the OEM springs to accommodate our production methods. The ride characteristics and performance remain the same.
4. Saloon and Estate models normally have the same front springs.
5. Petrol and Diesel models normally have the same rear springs.
6. An ideal opportunity to fit new springs is when the shock absorbers are being replaced, since the spring mostly has to be removed anyway.
7. Always check that the spring's diameter and end shapes are correct before attempting to fit it into the spring pan.
8. Generally the models stated in this catalogue are 2WD hatchback or saloon cars with petrol engines and without sport chassis or a self levelling device. All other models are specifically listed on separate lines.

36	Кроме Mi16.	139	Кроме MPS.
37	Кроме Coup .	140	Кроме T5.
38	Кроме S 16 / Gti / Xsi.	141	Только для автомобилей с максимальной нагрузкой на заднюю ось 1720кг
39	Кроме Scenic.	142	До шасси № 751044.
40	Кроме моделей 2,0 16V	143	От шасси № 751045.
41	Для машин с дополнительными пружинами на задних амортизаторах	144	Устанавливать только на автомобили, где оригинальная пружина имеет цветное обозначение "Красный ("Red")
42	Кроме MG или ZT	145	Устанавливать только на автомобили, где оригинальная пружина имеет цветное обозначение "Зеленый ("Green")
43	Кроме моделей BRM	148	Кроме ABC.
44	Кроме моделей CDE, Aero или Talladega	149	Кроме Brabus.
45	Кроме машин с уширенным кузовом	150	От шасси № M45255-.
46	Кроме машин с размером шин 235/60R16	151	До шасси № 2087505.
47	Кроме Verso	152	От шасси № 2087506.
48	Кроме 4-цилиндровых моделей	153	От шасси № 3301665.
49	Кроме моделей Variant	154	Также для SXi в случае использования заниженного спортивного шасси
50	Только для машин с задней подвеской Multilink	155	Кроме S-line.
51	Кроме T4	156	Проверьте дизайн пружины для правильного выбора
52	Только для машин с пружинами с сошлифованным верхним концом	157	Кроме Hunter
53	Кроме XC	158	Кроме автомобилей, оборудованных усиленной подвеской
54	До шасси № -1010583.	159	Кроме автомобилей, оборудованных Four-C
55	От шасси № 1010584-.	161	Для автомобилей с задней подвеской, имеющей Красно-Коричневое цветное обозначение, используйте усиленные задние пружины от Syncco
56	До шасси № -D2526389.	162	До шасси № 602984
		163	Начиная с шасси № 602985
		164	Кроме Abarth
