Ressorts à spirale
Muelles de suspensión

General information

1. As a producer of original equipment GKN Driveline supplies vehicle manufacturers on a world wide basis.
2. SPIDAN is the trade mark of GKN Driveline in the European Automotive Aftermarket.
3. SPIDAN stands for quality, service reliability and profitability.
4. Please accept slight differences in detail between real products and the pictures in this catalogue.
5. Reference numbers of parts or designation of types by vehicle manufacturers or competitors are stated for purposes of comparison only. The use of such details in invoices to vehicle owners is not allowed. Damage claims based on statements made in this catalogue are excluded. Subject to change without notice.
6. Copyright by GKN Driveline. Copies, even extracts, are only allowed with the permission in writing of GKN Service International GmbH.

Allgemeine Hinweise

1. GKN Driveline beliefert mit ihren Produkten als Erstausrüster weltweit die Hersteller von Kraftfahrzeugen.
2. SPIDAN ist das europaweit eingeführte Warenzeichen für Kfz-Ersatzteile der GKN Driveline.
3. SPIDAN steht für Qualität, hohen Servicegrad und Gewinn für unsere Kunden.
4. Die Abbildungen im Katalog können aus drucktechnischen Gründen geringfügig vom Originalteil abweichen.
5. Die Angaben von Ersatzteilnummern oder Typenbezeichnungen der Fahrzeughersteller oder des Wettbewerbs dienen nur zu Vergleichszwecken. Eine Verwendung von solchen Angaben ist in Rechnungen an Fahrzeugbesitzer nicht statthaft. Ersatzansprüche auf Grund von Angaben in diesem Katalog sind ausgeschlossen. Änderungen vorbehalten.
6. Copyright GKN Driveline. Vervielfältigungen, auch auszugsweise, sind nur mit schriftlicher Genehmigung der GKN Service International GmbH zulässig.

Algemene informatie

1. GKN Driveline levert haar producten als eerste montage leverancier aan de automobielproducenten over heel de wereld.
2. SPIDAN is het handelsmerk van de GKN Driveline in de Europese vervangingsmarkt automobielonderdelen.
3. SPIDAN staat voor kwaliteit, service, betrouwbaarheid en rendement.
4. Kleine afwijkingen tussen de producten en afbeeldingen zijn mogelijk.
5. Vermeldingen van onderdeelnummers of typeaanduidingen van de automobiefabrikanten of van andere aanbieders dienen alleen ter vergelijking. Gebruik van zulke vermeldingen op rekeningen aan de autobezitter is niet toegestaan. Schadeclaims op grond van vermeldingen in deze catalogus worden niet erkend. Veranderingen voorbehouden.
6. Copyright GKN Driveline. Vermenigvuldiging, ook gedeeltelijk, is alleen toegestaan met schriftelijke toestemming van GKN Service International GmbH.

Information générale

1. GKN Driveline, fabricant de pièces d'origine, fournit ses produits aux constructeurs automobiles du monde entier.
2. SPIDAN est la marque commerciale de GKN Driveline pour le marché européen de la pièce de rechange.
3. SPIDAN signifie qualité, service fiabilité et profit.
4. Pour des raisons techniques d'impression, les pièces peuvent être très légèrement différentes des photos figurant dans ce catalogue.
5. Les références des pièces détachées ou la désignation des types des constructeurs ou de leurs concurrents ne sont mentionnées qu'à être indicatif. Ces données ne doivent en aucun cas apparaître sur les factures transmises aux clients. Un droit de recours concernant l'utilisation des données figurant dans de catalogue est exclu. Contenu indicatif, sous réserve de modifications.
6. Copyright GKN Driveline. Toute reproduction intégrale ou partielle ne peut être effectuée sans une autorisation écrite de la société GKN Service International GmbH

Información general

1. Como fabricante de piezas originales GKN Driveline es el proveedor de los principales fabricantes de automóviles en todo el mundo.
2. SPIDAN es la marca registrada con la que GKN Driveline comercializa sus productos en el mercado de recambio de automoción.
3. SPIDAN es sinónimo de calidad, servicio, fiabilidad y rentabilidad.
4. Por razones técnicas de Impresión pueden existir pequeñas diferencias entre las fotografías del catalogo y el producto real.
5. Las referencias de las piezas o las descripciones de los modelos de los fabricantes de vehículos o de la competencia aparecen solo con el propósito de poder comparar. El uso de dicha información en las facturas del propietario del vehículo no está permitido. Las reclamaciones por daños y perjuicios basadas en declaraciones hechas en este catalogo están excluidas. Sujeto a cambios sin previo aviso.
6. Copyright de GKN Driveline. Cualquier copia, total o parcial de este documento solo estará permitida con la aprobación por escrito de GKN Service International GmbH.

Dear Customer,

This special "Coil Springs" catalogue lists the applications for springs of the European, Japanese and Korean automotive manufacturers in standard and heavy-duty versions.

This catalogue contains very detailed information and goes into the different variations in terms of motorisation, equipment and options. This is necessary in order to guarantee that the vehicle has the correct chassis height and driving characteristics. The original equipment installed in the vehicle by the manufacturer (standard springs) must generally be taken as the basis - the catalogue does not include any applications for chassis tuning!

Our coil springs are produced according to the standards of the original spare parts of the vehicle manufacturers and therefore do not require additional general certification (Allgemeine Betriebserlaubnis - ABE). Please exercise corresponding care when selecting the right chassis springs and pay attention to the supplementary information for the various vehicles (colour codes, chassis and organisational numbers, etc.).

We recommend that you always replace all the springs on an axle.

We hope that this catalogue, and the diversity of our product range that it reflects, will effectively cater to the needs of our customers.

Sehr geehrter Kunde,

in diesem Spezialekatalog „Spiralfedern“ finden Sie die Anwendungen für Federn der europäischen, japanischen und koreanischen Automobilhersteller in Standard- und verstärkten Ausführungen aufgelistet.

Dieser Katalog ist in seiner Ausführung sehr detailliert und geht auf die verschiedensten Variationen der Motorisierungen, Ausstattungsvarianten und Optionen ein. Dieses ist notwendig, um die korrekte Fahrhöhe und Fahrcharakteristik des Fahrzeugs zu garantieren.

Grundsätzlich ist von der herstellerseitigen Ausrüstung des Fahrzeugs auszugehen (Standardfedern). Der Katalog beinhaltet keine Applikationen für das Fahrwerkstuning!

Unsere Spiralfedern werden nach den Maßstäben eines Originalersatzteils der Fahrzeughersteller gefertigt und benötigen daher keine zusätzliche Allgemeine Betriebserlaubnis (ABE). Wenden Sie bitte entsprechende Sorgfalt beim Heraussuchen der richtigen Fahrwerksfedern an und beachten Sie die Zusatzinformationen zu den verschiedenen Fahrzeugen (Farbcodierungen, Chassis- und Organisationsnummern etc.).

Wir empfehlen grundsätzlich den achsweisen Austausch der Federn.

Wir hoffen mit diesem Katalog und der sich darin widerspiegelnden Produktvielfalt den Wünschen unserer Kundschaft gerecht zu werden.

Geachte klant,

In deze speciale catalogus « Spiraalveren » treft u een overzicht aan van de verschillende toepassingen voor veren van Europese, Japanse en Koreaanse autofabrikanten in standaard en versterkte uitvoeringen.

Deze catalogus geeft een zeer gedetailleerde beschrijving en gaat uitvoerig in op de diverse soorten motorisaties, uitrustingen en opties. Dit is noodzakelijk om de juiste rijhoogte en rijkarakteristiek van het voertuig te kunnen garanderen. Principieel dient er te worden uitgegaan van de uitrusting van het voertuig af fabriek (standaard veren) en de catalogus bevat geen applicaties voor de tuning van het chassis!

Onze spiraalveren worden zodanig vervaardigd dat ze voldoen aan de criteria van originele reserveonderdelen van de autofabrikanten en hebben daarom geen ABE-typegoedkeuring (Allgemeine Betriebserlaubnis) nodig. Wees zorgvuldig met het uitkiezen van de juiste veren behorend bij het chassis en raadpleeg de aanvullende informatie bij de verschillende voertuigen (kleurcodes, chassis- en serienummers enz.).

Wij adviseren principieel de veren per as te vervangen.

Wij hopen dat wem et deze catalogus en het daarin opgenomen ruime aanbod aan producten voldoen aan de wensen van onze klanten.

Cher client,

Vous trouverez dans ce catalogue spécial sur le « ressorts à spirale » une liste des applications pour ressorts des constructions automobiles européens, japonais et coréens dans des versions standards et perfectionnées.

La réalisation de ce catalogue est très détaillée et traite des différents modes de motorisation, d'équipement et d'options. Ceci est nécessaire afin de garantir la hauteur et les caractéristiques de conduite correctes du véhicule. En principe, nous nous basons sur l'équipement du véhicule conçu par le constructeur (ressorts standards) et le catalogue ne contient pas d'applications servant au tuning du châssis !

Nos ressorts à spirale sont fabriqués selon les critères d'une pièce de rechange d'origine des constructeurs automobiles et ne nécessitent donc pas d'autorisation générale d'exploitation supplémentaire. Soyez particulièrement attentifs lors du choix de ressorts de châssis correspondants et tenez compte des informations supplémentaires concernant les différents véhicules (codifications de couleur, numéros de châssis et d'organisation, etc.).

Nous recommandons fondamentalement l'échange des ressorts essieu par essieu.

Nous espérons répondre, avec ce catalogue et la diversité des produits qui y est présentée, aux souhaits de notre clientèle.

Estimado cliente,

Este catálogo específico de "muelles en espiral" recopila las aplicaciones de los muelles de los fabricantes automovilísticos europeos, japoneses y coreanos en versiones estándar y para trabajo pesado.

Este catálogo contiene información muy detallada y explica las diferentes variantes en términos de motorización, equipamiento y opciones. Esto resulta imprescindible para garantizar que el vehículo posee la altura de chasis y las características de conducción adecuadas. El equipamiento original instalado en el vehículo por el fabricante (muelles estándar) se debe tomar en general como la base - ¡el catálogo no incluye aplicaciones para tunear el chasis!

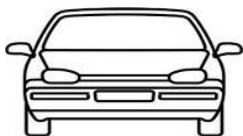

Nuestros muelles en espiral se fabrican conforme a los estándares de los fabricantes de vehículos y piezas originales y, por tanto, no precisan de ninguna certificación general adicional (Allgemeine Betriebserlaubnis – ABE). Le rogamos preste el cuidado pertinente a la hora de seleccionar los muelles de chasis correctos y a la información complementaria de los diversos vehículos (códigos de color, números de bastidor y organización, etc.).

Le recomendamos que sustituya siempre todos los muelles de un mismo eje.

Esperamos que este catálogo, y la gama de productos presentada en él satisfagan efectivamente las necesidades de nuestros clientes.

AA		Denotes a spring of cylindrical shape with open or closed ends. Note that some springs may have a taper wire.
		Spiralfeder mit zylindrischer Form und offenen oder geschlossenen Federenden. Beachte, diese Federn können auch als Taper Wire ausgeführt sein.
		Duidt aan dat de veer een cilindrische vorm heeft met open of gesloten einden. Merk op dat sommige veren een spits (taps toelopend) draadeind kunnen hebben.
		Ressort en spirale de forme cylindrique à extrémités ouvertes ou fermées. Attention ces ressorts peuvent également avoir des extrémités dréssées (le diamètre des extrémités est plus petit qu'au centre du ressort).
		Muelle en espiral de forma cilíndrica con extremos abiertos o cerrados. Fíjese en que algunos muelles también pueden tener los extremos cónicos.
AAF		Denotes a spring of conical (funnel) shape with open or closed ends. Springs of this type generally have progressive pitch and some may have taper wire.
		Spiralfeder mit konischer Form und offenen oder geschlossenen Federenden. Federn dieses Types haben generell eine progressive Steigung und können auch als Taper Wire ausgeführt sein.
		Duidt aan dat de veer een kegel (trechter) vorm heeft, met open of gesloten einden. De veren van dit type zijn over het algemeen progressieve veren en kunnen een in diameter variërende draad hebben.
		Ressort en spirale de forme conique à extrémités ouvertes ou fermées. Les ressorts de ce type ont généralement un pas progressif et peuvent avoir des extrémités dréssées.
		Muelle en espiral de forma cónica con extremos abiertos o cerrados. Los muelles de este tipo tienen en general un aumento progresivo y también pueden tener los extremos cónicos.
AB		Denotes a spring of cylindrical shape with one open (or closed) end, the other end being ground square to the spring axis. Note that some springs may have a taper forged end instead of a ground end and some springs may have taper wire.
		Spiralfeder mit zylindrischer Form, einem offenen (oder geschlossenen) und einem rechtwinklig zur Längsachse der Feder plangeschliffenen Federende. Beachte, einige Federn haben ein konisch geschmiedetes anstelle eines geschliffenen Endes. Diese Federn können auch als Taper Wire ausgeführt sein.
		Duidt aan dat de veer een cilindrische vorm heeft met één open (of gesloten) eind, het andere eind van de veer is vlak gelepen. (90 graden t.o.v. langsas van de veer) Merk op dat sommige veren een spits gesmeed eind, in plaats van een geslepen eind en sommige veren een in diameter variërende draad kunnen hebben.
		Ressort en spirale de forme cylindrique avec une extrémité ouverte (ou fermée) et une rectification plane, perpendiculaire à l'axe du ressort, de l'autre coté. Attention certains ressorts ont une extrémité conique forgée en remplacement de la réctification plane. Ces ressorts peuvent également avoir des extrémités dréssées.
		Muelle en espiral de forma cilíndrica, con un extremo abierto (o cerrado) y otro rectificad plano y perpendicular al eje del muelle. Fíjese en que algunos muelles tienen un extremos cónico forjado en vez de rectificad.
ABC		Denotes a spring of cylindrical shape with one open (or closed) end, the other end reducing in outside diameter to a pigtail shape at the tip. Note that some springs may have a taper forged end instead of a ground end and some springs may have taper wire.
		Spiralfeder mit zylindrischer Form, einem offenen (oder geschlossenen) Ende, das andere Ende verjüngt sich im Durchmesser der Windung zum Ende. Beachte, einige Federn haben ein konisch geschmiedetes anstelle eines geschliffenen Endes. Diese Federn können auch als Taper Wire ausgeführt sein.
		Duidt aan dat de veer een cilindrische vorm heeft, met één open (of gesloten) eind. Het andere eind van de veer vermindert sterk qua diameter tot een varkensstaart vorm. Merk op dat sommige veren een conisch gesmeed eind hebben in plaats van een geslepen eind. Deze veer kan ook in een in diameter variërende draad uitgevoerd zijn.
		Ressort en spirale de forme cylindrique avec une extrémité ouverte (ou fermée), et un rétrécissement du diamètre de la dernière spire de l'autre extrémité. Attention certains ressorts ont une extrémité conique forgée en remplacement de la réctification plane. Ces ressorts peuvent également avoir des extrémités dréssées.
		Muelle en espiral de forma cilíndrica, con un extremo abierto (o cerrado) y el otro extremo se reduce en diámetro exterior. Fíjese en que algunos muelles tienen un extremo cónico forjado en vez de rectificad.
ABF		Denotes a spring of conical (funnel) shape with one open (or closed) end, the other end being ground square to the spring axis. Springs of this type generally have progressive pitch. Note that some springs may have taper forged instead of a ground end.
		Spiralfeder mit konischer Form, einem offenen (oder geschlossenen) und einem rechtwinklig zur Längsachse der Feder plangeschliffenen Federende. Federn dieses Types haben generell eine progressive Steigung. Beachte, einige Federn haben ein konisch geschmiedetes anstelle eines geschliffenen Endes.
		Duidt een veer aan met een conische (trechter) vorm met één open (of gesloten) eind. het andere eind van de veer is vlak geslepen. (90 graden t.o.v. de langsas van de veer). Veren van dit type zijn over het algemeen progressief gewonden. Merk op dat sommige veren een conisch gesmeed eind hebben, i.p.v. een geslepen eind.
		Ressort en spirale de forme conique à une extrémité ouverte ou fermée et une rectification plane, perpendiculaire à l'axe du ressort, de l'autre coté. Les ressorts de ce type ont généralement un pas (pente) progressif (ve). Attention certains ressorts ont une extrémité conique forgée en remplacement de la réctification.
		Muelle en espiral de forma cónica, con un extremo abierto (o cerrado) y el otro extremo rectificad plano y perpendicular al eje del muelle. Los muelles de este tipo tienen generalmente un aumento progresivo.
AC		Denotes a spring of cylindrical shape with one open (or closed) end, the other end (slightly) reducing in outside diameter to a pigtail shape at the tip. Note that some springs may have taper wire.
		Feder mit zylindrischer Form und einem offenen (oder geschlossenen) Ende, das andere Ende verjüngt sich (teilweise geringfügig) im Durchmesser der Windung zum Federende. Einige Federn können auch als Taper Wire ausgeführt sein.
		Duidt aan dat de veer een cilindrische vorm heeft, met één open (of gesloten) eind. Het andere eind van de veer vermindert sterk qua diameter tot een varkensstaart vorm. Merk op dat één of andere veren een spitse draad kan hebben.
		Ressort en spirale de forme cylindrique avec une extrémité ouverte (ou fermée), et un rétrécissement (insignifiant dans certains cas) du diamètre de la dernière spire de l'autre extrémité. Certains ressorts peuvent également avoir des extrémités dréssées.
		Muelle de forma cilíndrica con un extremo abierto (o cerrado), y el otro reduciéndose en diámetro exterior (muy poco en algunos casos). Algunos muelles también pueden tener extremos cónicos.

ACF		Denotes a spring of conical (funnel) shape with one open (or closed) end, the other reduction in outside diameter to a pigtail shape at the tip.
		Spiralfeder mit konischer Form, einem offenen (oder geschlossenen) Ende, das andere Ende verjüngt sich im Durchmesser der Windung zum Federende.
		Duidt een veer aan met een conische (trechter) vorm met één open (of gesloten) eind, het andere eind vermindert vloeiend qua diameter en eindigt in een varkensstaart vorm.
		Ressort en spirale de forme conique avec une extrémité ouverte (ou fermée), et un rétrécissement du diamètre de la dernière spire de l'autre extrémité.
		Muelle en espiral de forma cónica, con un extremo abierto (o cerrado), el otro extremo se reduce en diámetro exterior.
BB		Denotes a spring of cylindrical shape with both ends ground square to the spring axis. Note that some springs of this type may have taper forged ends instead of ground ends.
		Feder mit zylindrischer Form, beide Enden sind plangeschliffen und rechtwinklig zur Längsachse der Feder. Beachte, einige Federn haben ein konisch geschmiedetes anstelle eines geschliffenen Federendes.
		Duidt een veer met een cilindrische vorm aan, waarvan beide einden vlakgeslepen zijn. (90 graden t.o.v. de langsas van de veer). Merk op, dat sommige veren van dit type gesmede einden, in plaats van geslepen einden kunnen hebben.
		Ressort de forme cylindrique avec rectification plane, perpendiculaire à l'axe du ressort, de chaque coté. Attention certains ressorts ont une extrémité conique forgée en remplacement de la rectification plane.
		Muelle de forma cilíndrica, con ambos extremos rectificados planos y en perpendicular al eje del muelle. Fíjese en que algunos muelles tienen un extremo cónico forjado en vez de rectificado.
BBF		Denotes a spring of conical (funnel) shape with both ends ground square to the spring axis. Springs of this type generally have progressive pitch.
		Feder mit zylindrischer Form, beide Enden sind plangeschliffen und rechtwinklig zur Längsachse der Feder. Federn dieses Types haben generell eine progressive Steigung.
		Duidt een veer met een conische (trechter) vorm aan, waarvan beide einden vlakgeslepen zijn. (90 graden t.o.v. de langsas van de veer). Veren van dit type zijn over het algemeen progressief gewonden.
		Ressort de forme conique avec rectification plane, perpendiculaire à l'axe du ressort, de chaque coté. Les ressorts de ce type ont généralement un pas progressif.
		Muelle de forma cilíndrica, ambos extremos están rectificados planos y en perpendicular al eje del muelle. Los muelles de este tipo generalmente tienen un aumento progresivo.
BC		Denotes a spring of cylindrical shape with one ground (or taper forged) end, the other (slightly) reducing in outside diameter to a pigtail shape at the tip.
		Feder mit zylindrischer Form, einem geschliffenen (geschmiedeten) Ende, das andere Ende verjüngt sich (teilweise geringfügig) im Durchmesser der Windung zum Federende.
		Duidt aan dat de veer een cilindrische vorm heeft, met één vlak geslepen eind. (90 graden t.o.v. de langsas van de veer). Het andere eind van de veer vermindert sterk qua diameter tot een varkensstaart vorm.
		Ressort de forme cylindrique avec une extrémité rectifiée (forgée) et un rétrécissement (insignifiant dans certains cas) du diamètre de la dernière spire de l'autre extrémité.
		Muelle de forma cilíndrica, un extremo rectificado (forjado), el otro extremo se reduce (muy poco en algunos casos) en diámetro exterior.
CC		Denotes a spring of cylindrical shape with both ends reducing in outside diameter to a pigtail shape at the tip, the pigtails having different diameters so care is needed when fitting.
		Feder mit zylindrischer Form, beide Enden verjüngen sich im Windungsdurchmesser. Der Drahtdurchmesser an den Federenden ist unterschiedlich, welches bei der Montage unbedingt zu berücksichtigen ist.
		Duidt aan dat de veer een cilindrische vorm heeft, waarbij beide einden sterk verminderen qua diameter tot een varkensstaart vorm. De veereinden verschillen qua diameter, let dus op bij montage!
		Ressort de forme cylindrique avec rétrécissement du diamètre de la dernière spire des deux cotés. Le diamètre du fil est différent sur les extrémités, et doit être pris en considération lors du montage.
		Muelle de forma cilíndrica, ambos extremos se reducen en diámetro exterior. El diámetro de cable en los extremos es diferente; hay que tenerlo en cuenta durante el montaje.
E		Denotes a spring of cylindrical shape with both ends reducing in outside diameter to a pigtail shape at the tip, the pigtails having the same diameters.
		Feder mit zylindrischer Form, beide Enden verjüngen sich im Windungsdurchmesser. Der Drahtdurchmesser an den Federenden ist gleich.
		Duidt aan dat de veer een cilindrische vorm heeft, waarbij beide einden sterk verminderen qua diameter tot een varkensstaart vorm. De veereinden zijn qua diameter gelijk!
		Ressort de forme cylindrique avec rétrécissement du diamètre de la dernière courbe des deux cotés. Le diamètre du fil est identique aux deux extrémités.
		Muelle de forma cilíndrica, ambos extremos se reducen en diámetro exterior. El diámetro del cable es igual en los dos extremos.
MB		Denotes a MINIBLOCK spring with barrel or conical shape and which is always manufactured from taper wire to combine compact dimension with progressive spring rate. In the case of the barrel shape, the ends of the spring are formed into pigtails and these may not be identical so care is needed when fitting.
		MINIBLOCK- Feder mit einer bauchigen oder konischen Form, wird wie eine "Taper Wire"-Feder hergestellt und kombiniert progressive Federrate mit kompakter Bauweise. Im Fall der bauchigen Ausführung sind die Federenden eingedreht und dies ist bei der Montage unbedingt zu berücksichtigen.
		Duidt een zogenaamde MINIBLOCK veer aan, met vat of kegelvorm en die altijd van een in diameter variërende draad wordt vervaardigd, om een veer met compacte afmeting te combineren met een progressief karakter. In het geval van de vatvorm, zijn de veereinden mogelijk verschillend qua diameter en vorm, let dus op bij montage!
		MINIBLOCK- Ressort en forme de baril ou conique réalisé avec un fil de diamètre plus fin aux extrémités, pour combiner l'exécution compacte avec un pas progressif. Pour les exécution en forme de baril les extrémités du ressort sont orientées vers l'intérieur et il s'agit d'y prêter attention lors du montage.
		Muelle MINIBLOCK con una forma abombada o cónica, se fabrica como un muelle de menor diámetro en los extremos y combina una tasa elástica progresiva con una forma compacta. En el caso del modelo abombado, los extremos están orientados hacia el interior; hay que tenerlo en cuenta durante el montaje.

1) including vehicles with dynamic control.									
2) 2.4 L JTD 10V & 20V models fitted with vehicle dynamic control require front spring part number 48661.									
Note !									
Part number 56828 is also suitable for vehicles fitted with vehicle dynamic control.									
The coil-springs listed above are not suitable for vehicles fitted with factory sports- or 'TI' suspension.

MERCEDES - BENZ (D)										
General Information										
<u>Spring Shims</u>										
<p>Rubber shims, fitted at the uppermost spring end, allow for fine adjustment of the vehicle ride-height and are available in different thicknesses.</p> <p>Shim thickness can be easily determined by counting the number of 'pips' on the shim lip, e.g. 1 pip (8 mm), 2 pips (13 mm), 3 pips (18 mm) and 4 pips (23 mm). Check the condition of the rubber shim during spring replacement and if damaged, replace with a new shim to guarantee correct ride-height.</p>										
<u>Ausgleichsunterlage zum Korrigieren der Fahrhöhe</u>										
<p>Die Gummiunterlage am obenliegenden Federende dient zur Einstellung der Fahrzeughöhe (Bodenfreiheit) und ist in verschiedenen Stärken verfügbar. Die Stärke der Unterlage kann durch die Anzahl der Markierungspunkte an der Lippe der Unterlage unterschieden werden. Zum Beispiel: 1 Punkt (9.5 mm), 2 Punkte (14 mm), 3 Punkte (19 mm) und 4 Punkte (23 mm). Überprüfen Sie den Zustand der Gummiunterlage und ersetzen Sie diese gegebenenfalls, bzw. stellen Sie damit die richtige Fahrhöhe ein.</p>										
<u>Rubberen spiraalveer zittingen</u>										
<p>De rubberen ring, gemonteerd aan de bovenkant van de spiraalveer, dient ter compensatie van de wagenhoogte en is verkrijgbaar in verschillende diktes. De dikte van de ring kan gemakkelijk bepaald worden door het aantal markerings punten te tellen op de lip van de ring. Voorbeeld: 1 punt (9.5 mm), 2 punten (14 mm), 3 punten (18 mm) en 4 punten (23 mm). Controleer de toestand van de rubberen ring tijdens het vervangen van de spiraalveer en vervang deze indien nodig, zodat de correcte wagenhoogte gewaarborgd blijft.</p>										
<u>Calage du ressort</u>										
<p>Les cales en caoutchouc sont montés aux extrémités supérieur des ressorts afin d'ajuster la hauteur du véhicule et disponibles en plusieurs épaisseurs.</p> <p>L'épaisseur de ces cales est facilement identifiable en comptant le nombre de points par exemple :1 point = (8mm), 2 points (13mm), 3 points (18mm) et 4 points (23mm)</p> <p>Vérifier l'état de ces cales et si elles sont endommagées, les remplacer afin de garantir une hauteur correcte.</p>

VOLKSWAGEN (D)**VOLKSWAGEN T4 TRANSPORTER - AUFLASTUNG auf 2.81 t. Gesamtgewicht****Hinweis nur für Deutschland !****Auflastung des T4 auf über 2.81 t. Gesamtgewicht**

Bei "Sonderkraftfahrzeugen" werden ab 2.81 t. das zulässige Gesamtgewicht nicht nach Hubraum sondern nach dem Gesamtgewicht besteuert. Es besteht die Möglichkeit einen PKW, als LKW zuzulassen.

Dafür ist allerdings eine Eintragung im Fahrzeugbrief notwendig, die man beim TÜV bekommt, wenn man eine Unbedenklichkeitsbescheinigung von VW vorlegt.

Voraussetzung zur Auflastung**• T4 Kasten Bj. 1991 - 2003**

- 1) Bei Fahrzeugen kurz mit 1.9 L DIESEL und 2.0 L Benziner ist eine Auflastung nur eingeschränkt möglich. **
- 2) evtl. müssen Reifen mit einer höheren Traglast montiert werden. **
- 3) Die vorderen Drehstäbe müssen den Lasten gemäss Werksangaben entsprechen. **
- 4) Hinterachsfedern 701 511 105 M einbauen (Spidan-Nr.49764).
- 5) Die Zugfedern des Bremskraftreglers hinten müssen evtl. ersetzt werden. **
- 6) ab 1993 sind 15 Zoll Räder und Reifen zur Auflastung erforderlich.

** beim Hersteller erfragen.

• T4 Kombi / Caravelle / Multivan Bj. 1991 - 2003

- 1) Bei Fahrzeugen kurz mit 1.9 L DIESEL und 2.0 L Benziner ist eine Auflastung nur eingeschränkt möglich. **
- 2) evtl. müssen Reifen mit einer höheren Traglast montiert werden. **
- 3) Die vorderen Drehstäbe müssen den Lasten gemäss Werksangaben entsprechen. **
- 4) Hinterachsfedern einbauen :-
 - 701 511 105 B (Spidan-Nr. 49763) bis 1992
 - 701 511 105 M (Spidan-Nr. 49764) ab 1993 (ab ch.-no. 70-PH-000 000)
- 5) Die Zugfedern des Bremskraftreglers hinten müssen evtl. ersetzt werden. **
evtl. müssen auch Unterlagen und Dämpfungspuffer ersetzt werden. **
- 6) ab 1993 sind 15 Zoll Räder und Reifen zur Auflastung erforderlich.
- 7) Die hinteren Stossdämpfer müssen evtl. ersetzt werden. **

** beim Hersteller erfragen.

**Für Fahrzeuge Bj. 1999 & 2000 mit 2.5 L DIESEL (111 kW) ist eine Auflastung nicht möglich.
Fahrzeuge mit ESP können nicht nachgerüstet werden.**

• T4 Pritsche / Doppelkabine / Fahrgestell Bj. 1991 - 2003

- 1) Bei Fahrzeugen kurz mit 1.9 L DIESEL und 2.0 L Benziner ist eine Auflastung nur eingeschränkt möglich. **
- 2) evtl. müssen Reifen mit einer höheren Traglast montiert werden. **
- 3) Die vorderen Drehstäbe müssen den Lasten gemäss Werksangaben entsprechen. **
- 4) Hinterachsfedern 701 511 105 B einbauen (Spidan-Nr. 49763).
- 6) ab 1993 sind 15 Zoll Räder und Reifen zur Auflastung erforderlich.

** beim Hersteller erfragen.

• T4 California Bj. 1991 - 2003

bis ch.-no. 70MH-078 749

- 4) Hinterachsfedern 701 511 105 K einbauen (Spidan-Nr. 49147).
- 5) Die Zugfedern des Bremskraftreglers hinten müssen evtl. ersetzt werden. **
- 7) Die hinteren Stossdämpfer müssen evtl. ersetzt werden. **

ab ch.-no. 70MH-078 750

Auflastung ohne technische Änderung möglich.

** beim Hersteller erfragen.

Farbmarkierung der Auflastungsfedern

Alle Auflastungsfedern sind mit einer Farbmarkierung auf der mittleren Windung versehen.

Farbmarkierung

Art.-Nr. 49763 : rot-braun

Art.-Nr. 49764 : rosa

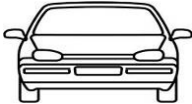

Art.-Nr. 49147 : gelb

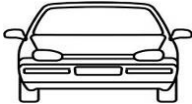

**Die HA-Feder mit der Art.-Nr. 49146,
(Farbmarkierung : weiss) darf zur Auflastung
nicht verbaut werden !**
