

ERGON

ПРОИЗВОДСТВО
АВТОМОБИЛЬНЫХ ЗЕРКАЛ

КАТАЛОГ 2016

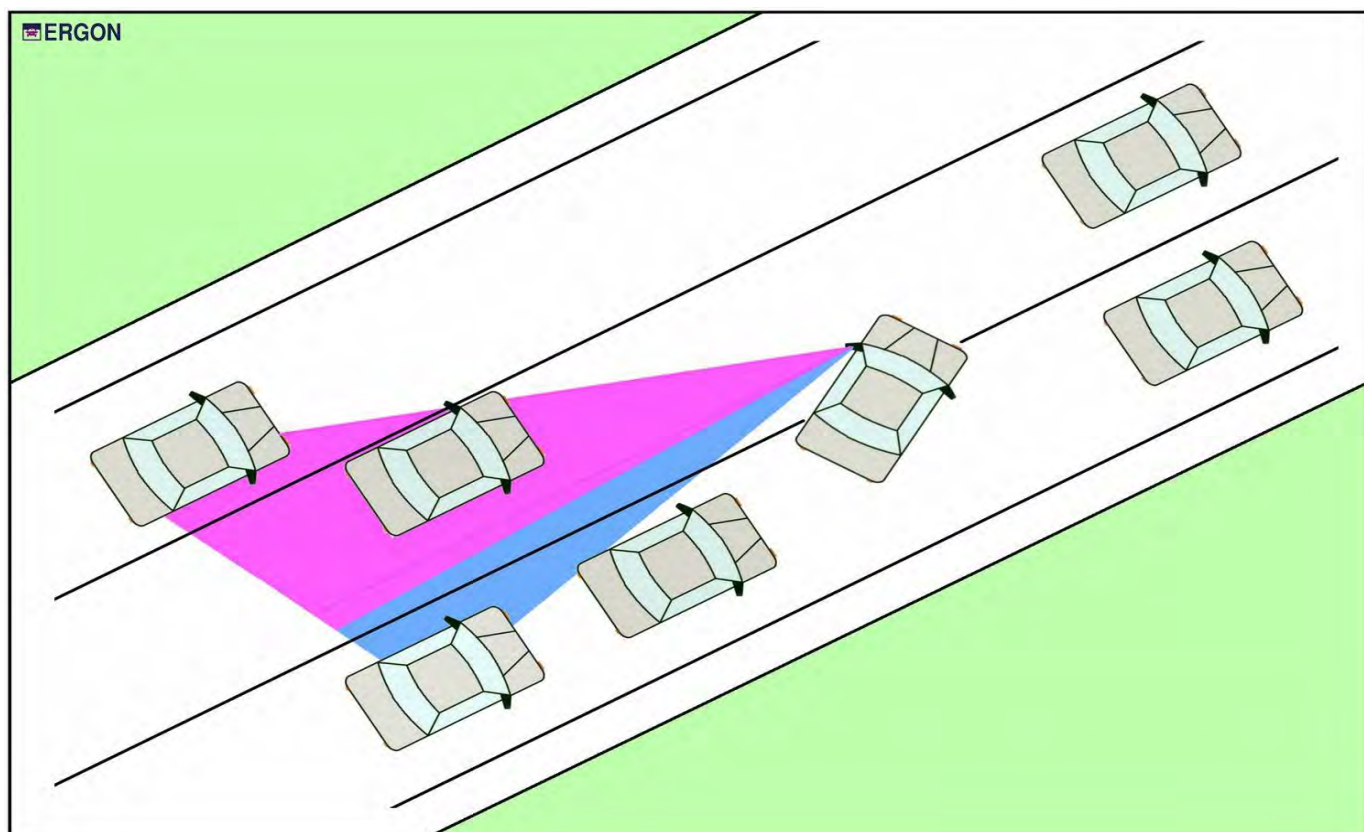

Зеркала ERGON™ – российское изобретение и продукт отечественного производства. В основе производства зеркал ERGON лежат высокие технологии оборонной промышленности. Торговой марке "ERGON" уже более 13 лет. За эти годы изделия "ERGON" приобрели известность благодаря оптимальному соотношению "Цена/Качество"

Уже много лет наше предприятие выпускает зеркала для автомобилей в подмосковном городе Фрязино. За это время была в совершенстве отработана уникальная технология и налажен серийный выпуск зеркал с противоослепляющим покрытием и асферической геометрией поверхности. Уникальна так же система обогрева – настоящий помощник водителя в условиях длительной и холодной российской зимы.

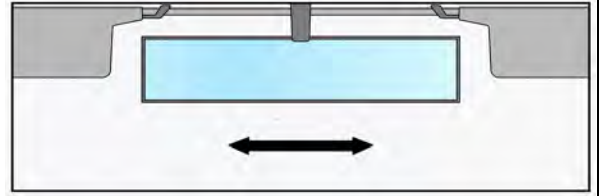

Для того, чтобы увеличить срок службы зеркальных элементов ERGON, в процессе производства они подвергаются дополнительной антикоррозионной обработке и проходят многоступенчатый контроль качества. Благодаря этому исключается появление брака в готовой продукции и «оползание» отражающего слоя во время эксплуатации.

Наши Специалисты, работавшие когда-то на «оборонку», не уехали за рубеж искать красивой жизни, а живут и работают здесь, в России, что, согласитесь, не только приятно, но и немаловажно. Они лучше, чем зарубежные производители, знают, что нужно автомобилисту на российской дороге, владеют спецификой и особенностями вождения отечественных автомобилей и создают действительно качественный и необходимый автолюбителям продукт, обеспечивающий безопасность водителей на принятом в Евросоюзе уровне.

Использование только самых современных технологий, знание рынка и опыт общения с зарубежными коллегами, соотношение действительно высокого качества и сравнительно невысокой стоимости, и просто искреннее желание помочь водителю на дороге – позволили за короткое время завоевать популярность и зарекомендовать торговую марку ERGON, как одну из лучших в России.
