## More than 60 years of experience in the IAM

With more than 60 years of experience, SWAG is one of the leading global partners to the wholesale with manufacturing competence for automotive spare parts in the independent after-market. SWAG has been a synonym for high quality with extremely short delivery times since 1954 and moreover, is certified according to the quality management system DIN EN ISO 9001:2008. The company, which is located in Germany, is a strategic partner of leading manufacturers of the automotive supplier industry as well as a distributor of high-quality spare parts for motor vehicles.

**Our complete portfolio you will find in our online parts search at:  
[www.swag-parts.com](http://www.swag-parts.com)**

## ”Best Choice for Spare Parts“

We are committed to this motto ”to your benefit“ because SWAG stands for over 22,000 popular parts for all German and European vehicle types. We offer an always up-to-date range of professional vehicle repair products for all popular vehicle types. Of course in OE-matching quality!

- Excellent packaging and distribution
- More than 22,000 common spare parts for German and European vehicle types

# Quality and Service

## High availability from stock – short delivery times

SWAG spare parts are available just when you need them. To ensure we are able to quickly supply our partners on a global scale, we continuously invest in our logistics capabilities and stock availability. You can rely on our products to arrive at the workshop when required for a fit-first-time installation.

## Is there still a need to discuss quality at this day and age?

Yes, because the quality of car components is essentially a question of safety for people. With this in mind, SWAG has established itself as a long-term partner of leading automotive manufacturers.

## We constantly invest in quality!

Be it for processes and products: we expect certified quality from all our suppliers and of course also from ourselves. One partner – one brand: For more than half a century, professionals in the car business worldwide have put their trust in SWAG parts.

## SWAG Advantages at a glance

- OE-matching quality
- Variety in range
- Manufacturing expertise
- Triple-Checking-System
- A strong brand from Germany
- Delivery in 140 countries

## Triple Checking System - Quality System and Supplier Control by Auditation

### STEP I

#### Supplier Audits

All suppliers must comply with bilstein group's General Quality Assurance Agreement.

### STEP II

#### Initial Sample Checks

Initial sample checks ensure that the part meets the functional, dimensional and material standards.

### STEP III

#### Goods-In Control

Regular and detailed goods-in control ensure the consistent quality of all SWAG products.

The management system  
of SWAG has been certified  
according to

### Key facts

Founded	1954

Turnover Group	> 450 Mio. €

## Cabin filters from SWAG – for clean, fresh air...

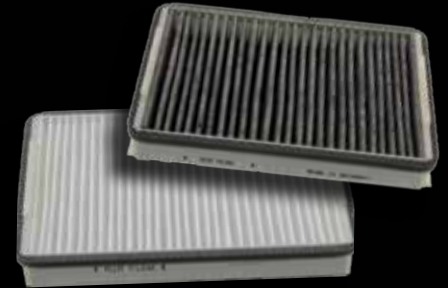

Cabin air filters are essential in ensuring the comfort of everyone in the vehicle, which is why all air filters from SWAG are produced to certified OEM quality standards.

The technical highlights at a glance:

- OEM quality filter media guarantees optimum separation and absorption values
- Combi filters with an activated carbon element have a mass per unit area of 525 g/m<sup>2</sup> and ensure the best possible binding of pollutants over their entire service life
- Exceptional Quality „Made in Germany“
- Extremely accurate, first fit assurance

## The difference between particle and activated carbon filters

## Der Unterschied zwischen Partikel- und Aktivkohle- filtern

- Less dirt formation on the inside of the windscreen
- No windscreen mist

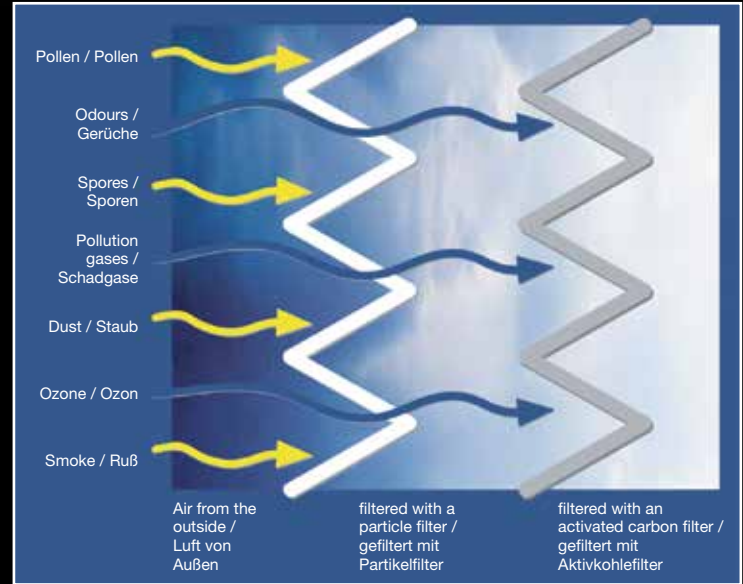

Benefits to the occupants at a glance:

- Up to 100% protection from external dust and pollen
- Excellent reduction of the pollutant concentration in the vehicle
- No headaches and nausea as a result of poor air quality
- Effective relief for allergy and asthma sufferers

In addition to functioning as cabin particle filters, combi filters with an activated carbon layer also bind harmful gases such as ozone, nitrogen oxides or sulphur dioxides. The extremely fine pores are 10,000 times smaller than a human hair.

**Regular replacement of the cabin air filter can help to extend the service life of heating, ventilation and air conditioning systems.**

**SWAG advises replacing the filter every 15,000 kilometres, or at least once a year.**

### **Innenraumluftfilter von SWAG: Immer eine saubere Sache**

Innenraumluftfilter leisten einen wichtigen Beitrag zum Wohlbefinden von Fahrer und Mitfahrern. Daher bietet SWAG ausschließlich Luftfilter in geprüfter Erstausrüstungsqualität an.

#### **Die technischen Vorteile auf einen Blick:**

- Filtermedien in Erstausrüstungsqualität garantieren bestmögliche Abscheide- und Adsorptionswerte
- Kombifilter mit Aktivkohleelement verfügen über ein Flächengewicht von 525 g/m<sup>2</sup> und garantieren über den gesamten Einsatzzeitraum eine bestmögliche Bindung von Schadstoffen
- Fertigung „Made in Germany“

### **Les filtres d'habitacle SWAG : la propreté à chaque instant !**

Les filtres d'habitacle contribuent grandement au bien-être du conducteur et des passagers. C'est pourquoi SWAG propose uniquement des filtres à air d'une qualité d'origine homologuée.

#### **Les avantages techniques en un coup d'œil :**

- Les éléments filtrants de qualité d'origine garantissent les meilleures taux d'adsorption possibles
- Les filtres combinés à charbon actif présentent une masse surfacique de 525 g/m<sup>2</sup>. Ils garantissent la meilleure liaison chimique des polluants sur toute la durée d'utilisation
- Fabrication „Made in Germany“

- Absolute Passgenauigkeit, dadurch fester Sitz im Filtergehäuse
- Kein Beschlagen der Windschutzscheibe
- Reduzierung der Verschmutzung der Windschutzscheibeninnenfläche

Die gesundheitlichen Vorteile auf einen Blick:

- Nahezu 100% Rückhaltung von Staub und Pollen
- Zuverlässige Senkung der Schadstoffkonzentration im Fahrzeug
- Vorbeugung von Kopfschmerzen und Übelkeit durch schlechte Atemluft
- Wirksame Linderung der Beschwerden von Allergikern und Asthmatikern

Neben der Leistung von Partikelfiltern für den Fahrgastraum binden Kombifilter mit Aktivkohleschicht zusätzlich schädliche Gase, beispielsweise Ozon, Stickoxide oder Schwefeldioxide. Die sehr feinen Poren sind 10.000 Mal kleiner als ein menschliches Haar.

**Ein regelmäßiger Wechsel des Innenraumluftfilters kann die Lebensdauer von Heizungs-, Lüftungs- und Klimasystem verlängern. SWAG rät, den Filter alle 15.000 Kilometer, mindestens aber einmal pro Jahr auszutauschen.**

- Une précision absolue, d'où une fixation solide dans le corps de filtre
- Aucun risque de formation de buée sur le pare-brise
- Réduction de l'encrassement de la surface intérieure du pare-brise

Les effets bénéfiques sur la santé en un coup d'œil :

- Récupération à quasiment 100 % des poussières et du pollen
- Réduction fiable de la concentration en polluants dans le véhicule
- Prévention des maux de tête et des nausées provoqués par la mauvaise qualité de l'air inhalé
- Soulagement efficace des gênes ressenties par les personnes allergiques et asthmatiques

Mise à part l'efficacité des filtres à particules pour l'habitacle, les filtres combinés dotés d'une couche de charbon actif assurent en plus la liaison chimique des gaz nocifs comme par exemple l'ozone, l'oxyde d'azote ou le dioxyde de soufre. Les pores très fins sont 10 000 fois plus petits qu'un cheveu humain.

**Le remplacement régulier du filtre d'habitacle peut prolonger la durée de vie du système de chauffage, de ventilation et de climatisation. SWAG conseille de remplacer le filtre tous les 15 000 kilomètres, et ou au moins une fois par an.**

### Filtri abitacolo SWAG: aria pulita

I filtri abitacolo contribuiscono in maniera rilevante al benessere di guidatore e passeggeri. È per questo che SWAG offre esclusivamente filtri aria di qualità collaudata analoga all'originale.

I vantaggi tecnici:

- gli agenti filtranti impiegati di qualità analoga all'originale garantiscono i migliori valori di separazione e adsorbimento possibili
- filtri multifunzione con elemento al carbone attivo presentano un peso superficiale di 525 g/m<sup>2</sup> e garantiscono la massima capacità adsorbente nei confronti delle sostanze nocive durante l'intero periodo di impiego
- lavorazione „Made in Germany“
- precisione assoluta che consente un posizionamento esatto all'interno della scatola filtro

### Filtros de habitáculo de SWAG: Para un aire limpio y fresco

Los filtros de habitáculo suponen una importante contribución al bienestar del conductor y de los acompañantes.

De ahí que SWAG ofrezca exclusivamente filtros de aire con calidad de equipamiento original certificada.

Relación de las ventajas técnicas:

- los medios filtrantes con la calidad del equipamiento original garantizan los mejores valores de depositación y absorción posibles
- los filtros combinados con elemento de carbón activado cuentan con un gramaje de 525 g/m<sup>2</sup> y garantizan durante todo el período de utilización la mejor fijación posible de sustancias nocivas
- fabricación: „Made in Germany“
- total precisión de ajuste, asiento firme en la caja de filtro

- il parabrezza non si appanna
- riduzione dello sporco sulla superficie interna del parabrezza

I vantaggi per la salute:

- ritenzione di polvere e pollini pari quasi al 100%
- riduzione sicura della concentrazione di sostanze nocive all'interno del veicolo
- prevenzione di cefalea e nausea dovute alla cattiva aria respirata
- alleviamento dei disturbi tipici delle persone allergiche e asmatiche

Oltre alle consuete prestazioni dei filtri antiparticolato per abitacolo, grazie allo strato al carbone attivo i filtri multifunzione legano inoltre i gas nocivi, ad esempio l'ozono, gli ossidi di azoto e i diossidi di zolfo. I pori sono tanto sottili da risultare 10.000 volte più piccoli di un capello umano.

**Una sostituzione regolare del filtro abitacolo può aumentare la durata utile dei sistemi di riscaldamento, ventilazione e climatizzazione. SWAG consiglia di sostituire il filtro ogni 15.000 km, o comunque almeno una volta all'anno.**

- el parabrisas no se empaña
- se reduce la suciedad de la superficie interior del parabrisas

Relación de las ventajas para la salud:

- casi el 100% de retención de polvo y polen
- se disminuye de forma segura la concentración de sustancias nocivas en el vehículo
- se previenen las jaquecas y náuseas causadas por una mala calidad del aire
- alivio efectivo de las molestias para las personas alérgicas o asmáticas

Además del rendimiento de los filtros de partículas para el habitáculo, los filtros combinados atrapan con su capa de carbón activado gases perjudiciales como, por ejemplo, ozono, óxidos de nitrógeno o dióxidos de azufre. Los finísimos poros son 10.000 veces más pequeños que un pelo humano.

**Se puede alargar la vida útil de los sistemas de calefacción, ventilación y climatización realizando cambios periódicos del filtro de habitáculo. SWAG recomienda un cambio de filtro cada 15.000 kilómetros o al menos una vez al año.**

### Filtry kabinowe SWAG: czyste powietrze we wnętrzu samochodu ma kluczowe znaczenie

Filtry kabinowe mają znaczący wpływ na dobre samopoczucie kierowcy i pasażerów samochodu. To dlatego SWAG oferuje filtry przeciwpyłkowe wyłącznie w jakości spełniającej wymagania pierwszego montażu.

#### Najważniejsze zalety techniczne:

- Wkłady filtracyjne o jakości pierwszego montażu zapewniają najlepsze parametry w zakresie wychwytywania i absorpcji zanieczyszczeń
- Zaawansowane technicznie filtry z wkładami z węgla aktywnego charakteryzują się gramaturą o wartości 525 g/m<sup>2</sup> i przez cały okres eksploatacji gwarantują możliwie maksymalne wychwytywanie cząstek stałych
- Produkcja „Made in Germany“
- Dokładne wymiary, a dzięki temu pewne mocowanie w obudowie filtra

### Воздушные фильтры салона от SWAG: Чистота всегда

Воздушные фильтры салона играют важную роль в обеспечении комфорта водителя и пассажиров. Поэтому SWAG предлагает исключительно воздушные фильтры проверенного оригинального качества.

Краткий обзор технических преимуществ:

- фильтрующие материалы оригинального качества гарантируют оптимальные показатели фильтрации и впитывания
- вес единицы поверхности комбинированных фильтров с активным угольным элементом составляет 525 г/м<sup>2</sup>, что гарантирует оптимальное связывание вредных веществ на протяжении всего времени применения
- производство «Made in Germany»
- абсолютная точность посадки, обеспечивающая надежное крепление в корпусе фильтра

- Uniknięcie parowania przedniej szyby
- Mniejsze zabrudzenie wewnętrznej powierzchni przedniej szyby

Najważniejsze zalety z punktu widzenia zdrowia:

- Praktycznie stuprocentowe zatrzymywanie kurzu i pyłków
- Zdecydowane obniżenie poziomu substancji szkodliwych we wnętrzu samochodu
- Zapobieganie bólom głowy i złemu samopoczuciu wynikającemu z niskiej jakości powietrza
- Skuteczne ograniczenie niekorzystnego wpływu na osoby cierpiące na alergię oraz astmę

Obok podstawowych funkcji filtrów kabinowych, wkłady zawierające aktywny węgiel dodatkowo zatrzymują szkodliwe gazy, takie jak ozon, tlenki azotu lub dwutlenki siarki. Pory materiału filtracyjnego mają średnicę 10.000 razy mniejszą od ludzkiego włosa.

Regularna wymiana filtra kabinowego pozwala na wydłużenie żywotności układu ogrzewania, wentylacji i klimatyzacji. Firma SWAG zaleca wymianę filtra kabinowego co 15.000 kilometrów, przynajmniej raz w roku.

- отсутствие запотевания ветрового стекла
- уменьшение загрязнения внутренней поверхности ветрового стекла

Краткий обзор преимуществ для здоровья:

- почти 100% удерживание пыли и пыльцы
- надежное снижение концентрации вредных веществ в автомобиле
- предотвращение головных болей и тошноты, вызванных вдыханием некачественного воздуха
- эффективное смягчение осложнений у аллергиков и астматиков

Помимо функции фильтров твердых частиц для пассажирского салона, комбинированные фильтры дополнительно осуществляют связывание вредных газов, например озона, оксида азота или диоксида серы, посредством слоя активированного угля. Очень мелкие поры в 10 000 меньше человеческого волоса.

**Регулярная смена воздушного фильтра салона может увеличить срок эксплуатации системы обогрева, вентиляции и кондиционирования. SWAG рекомендует заменять фильтр через каждые 15 000 километров пробега, но не менее одного раза в год.**

- Regular replacement of the cabin air filter can help to extend the service life of heating, ventilation and air conditioning systems. SWAG advises replacing the filter every 15,000 kilometres, or at least once a year.
- Ein regelmäßiger Wechsel des Innenraumluftfilters kann die Lebensdauer von Heizungs-, Lüftungs- und Klimasystem verlängern. SWAG rät, den Filter alle 15.000 Kilometer, mindestens aber einmal pro Jahr auszutauschen.
- Le remplacement régulier du filtre d'habitacle peut prolonger la durée de vie du système de chauffage, de ventilation et de climatisation. SWAG conseille de remplacer le filtre tous les 15 000 kilomètres, et ou au moins une fois par an.
- Una sostituzione regolare del filtro abitacolo può aumentare la durata utile dei sistemi di riscaldamento, ventilazione e climatizzazione. SWAG consiglia di sostituire il filtro ogni 15.000 km, o comunque almeno una volta all'anno.
- Se puede alargar la vida útil de los sistemas de calefacción, ventilación y climatización realizando cambios periódicos del filtro de habitáculo. SWAG recomienda un cambio de filtro cada 15.000 kilómetros o al menos una vez al año.

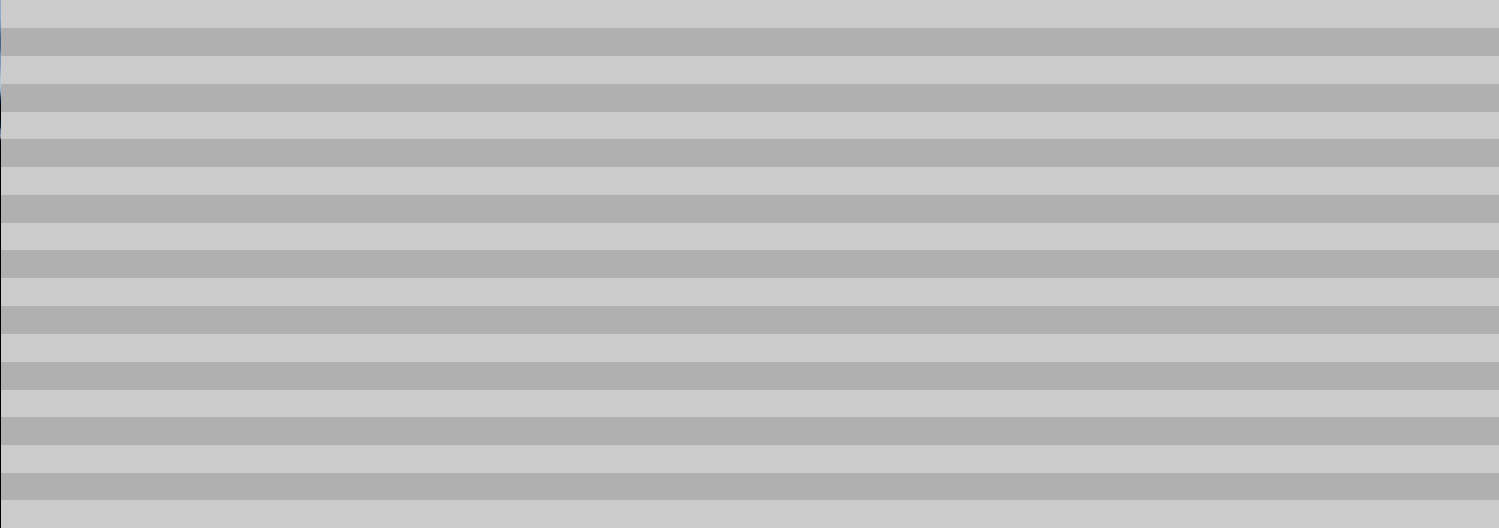

- **Regularna wymiana filtra kabinowego pozwala na wydłużenie żywotności układu ogrzewania, wentylacji i klimatyzacji. SWAG zaleca wymianę filtra kabinowego co 15.000 kilometrów, przynajmniej raz w roku.n.**
- **Регулярная смена воздушного фильтра салона может увеличить срок эксплуатации системы обогрева, вентиляции и кондиционирования. SWAG рекомендует заменять фильтр через каждые 15 000 километров пробега, но не менее одного раза в год.**
