Die Nr. 1 von Anfang an

1976 hat Bosch die Lambdasonde erfunden. Heute ist Bosch weltweit die Nr. 1 in Erstausrüstung und Handel – mit einer Gesamtproduktion von über 500 Millionen gefertigten Lambdasonden.

Alle europäischen und weltweit die meisten Fahrzeughersteller setzen auf Lambdasonden von Bosch. Mit Bosch-Lambdasonden sind Sie dem Wettbewerb den entscheidenden Schritt voraus und können Ihren Kunden bieten, was sie brauchen: umweltfreundliche, kraftstoffsparende und langlebige Ersatzteile.

en

Number one from the beginning

Bosch invented the Lambda oxygen sensor in 1976. Bosch is now the world's number one name for original equipment and aftermarket requirements – with a total of more than 500 million Lambda oxygen sensors produced to date.

All European vehicle manufacturers, and most companies worldwide, rely on Lambda sensors from Bosch. Bosch Lambda sensors keep you one step ahead of the competition and allow you to offer customers exactly what they need – environmentally friendly spare parts that save fuel and have a long service life.

fr

Le n° 1, dès le début

Bosch a inventé la sonde lambda en 1976. Bosch est aujourd'hui le n° 1 mondial dans la première monte et la vente, avec une production totale de plus de 500 millions sondes lambda.

Tous les constructeurs automobiles européens et la plupart des constructeurs dans le monde misent sur les sondes d'oxygène «lambda» de Bosch. Avec les sondes d'oxygène «lambda» de Bosch, vous avez sur la concurrence une avance décisive et êtes en mesure de proposer à vos clients ce dont ils ont besoin, à savoir des pièces de rechange respectueuses de l'environnement, économes en carburant et à longue durée de vie.

it

N. 1 fin dall'inizio

Nel 1976 Bosch inventò la sonda Lambda e, oggi, è la n. 1 a livello mondiale, sia nel primo equipaggiamento che nell'aftermarket, con una produzione complessiva di oltre 500 milioni di unità.

Tutti i costruttori automobilistici europei e la maggior parte dei costruttori a livello mondiale optano per sonde Lambda di Bosch. Con sonde Lambda Bosch avrete un vantaggio decisivo rispetto alla concorrenza e potete offrire ai vostri clienti quello che cercano: ricambi ecologici e di lunga durata che aiutano a ridurre il consumo di carburante.

es

Líder mundial desde el principio

Bosch inventó la sonda lambda en 1976. En la actualidad, Bosch es el líder mundial tanto en el sector de Equipo Original como en el de Recambios, habiendo fabricado hasta hoy más de 500 millones de sondas lambda.

Todos los fabricantes de vehículos europeos y la mayoría de fabricantes a nivel mundial emplean las sondas Lambda de Bosch. Con las sondas Lambda de Bosch estará un paso decisivo por delante de su competencia y ofrecerá a sus clientes lo que necesitan – piezas de recambio respetuosas con el medio ambiente, que ahorran combustible y con una larga vida útil.

ru

Лидер с самого начала

В 1976 году компания Bosch изобрела лямбда-зонд. На сегодняшний день компания Bosch является мировым лидером в области первичной комплектации и продаж, выпуская в целом свыше 500 миллионов лямбда-зондов.

Все европейские и многие остальные изготовители транспортных средств во всем мире делают ставку на лямбда-зонды от Bosch. Лямбда-зонды компании Bosch дают Вам значительные конкурентные преимущества и возможность удовлетворить потребность Ваших клиентов в экологических и долговечных запасных частях, позволяющих экономить топливо.

Lambdasonden unterliegen extremen Beanspruchungen

Eine einwandfreie Lambdasonde ist Voraussetzung für eine verlässliche Funktion des Motors und damit für niedrigen Kraftstoffverbrauch, geringen Schadstoffausstoß und korrekte Abgaswerte. Lambdasonden von Bosch überzeugen durch hohe Lebensdauer, korrekte Funktion und optimale Anpassung an den Motor.

Darum lohnt sich ein regelmäßiges Prüfen und Wechseln

Für Autofahrer gibt es viele gute Gründe, auf voll funktionstüchtige Lambdasonden von Bosch zu setzen:

- ▶ Bis zu 15% Kraftstoffersparnis im Vergleich zu einer gealterten Lambdasonde
- ▶ Vermeidung teurer Katalysatorschäden
- ▶ Einhaltung strenger Abgasnormen
- ▶ Bessere Fahrleistung

Lambda sensors are subject to extreme conditions

A Lambda sensor in perfect condition is a requirement for a reliably functioning engine and thus for ensuring low fuel consumption, low pollutant emissions and the correct emission values. Bosch Lambda sensors are unbeatable thanks to their long service life, excellent operation and optimum engine compatibility.

Regular checking and replacement are therefore vital

There are any number of good reasons why motorists should make sure their Bosch Lambda sensors are always in perfect condition:

- ▶ Up to 15% fuel savings compared to an old Lambda sensor
- ▶ Avoidance of expensive catalytic-converter damage
- ▶ Compliance with stringent emission standards
- ▶ Improved performance

Les sondes Lambda subissent des contraintes extrêmes

La sonde Lambda doit être en parfait état pour garantir un fonctionnement fiable du moteur et par là-même une faible consommation de carburant, une émission réduite de polluants et des valeurs d'échappement correctes. Les sondes Lambda Bosch se distinguent par leur longue durée de vie, leur parfait fonctionnement et leur adaptation optimale au moteur.

Un contrôle et un remplacement réguliers sont donc payants

Les automobilistes ont de nombreuses raisons de miser sur des sondes Lambda en parfait état:

- ▶ Jusqu'à 15% d'économie de carburant par rapport à une sonde Lambda usagée
- ▶ Prévention des coûteux dommages du catalyseur
- ▶ Respect des sévères normes antipollution
- ▶ Meilleures performances du véhicule

Le sonde Lambda lavorano in condizioni estreme

La sonda Lambda in perfette condizioni è un requisito fondamentale per il funzionamento affidabile del motore, per un contenimento del consumo di carburante e delle emissioni di sostanze inquinanti e per il rispetto dei valori ammessi per i gas di scarico. Le sonde Lambda di Bosch assicurano i requisiti richiesti, grazie a un ciclo di vita elevato, al funzionamento corretto e ad un adattamento ottimale al motore.

Ecco perché conviene effettuare controllo e sostituzione ad intervalli regolari

Gli automobilisti hanno diversi motivi per optare per una sonda Lambda Bosch ed assicurarne il corretto funzionamento regolare:

- ▶ Un risparmio di carburante che arriva fino al 15% rispetto ad una sonda Lambda invecchiata
- ▶ Prevenzione efficace di danni costosi al catalizzatore
- ▶ Rispetto di norme antinquinamento severe
- ▶ Migliori prestazioni di marcia

Las sondas Lambda deben soportar cargas extremas

Una sonda Lambda en perfecto estado es un requisito para un funcionamiento fiable del motor y, por lo tanto, para un bajo consumo de combustible, emisiones reducidas de sustancias nocivas y valores de gases de escape correctos. Las sondas Lambda de Bosch convencen por su larga vida útil, su funcionamiento correcto y la adaptación óptima al motor.

Revisiones periódicas:

Se recomienda comprobarla cada 30.000 km

Una sonda defectuosa o de baja calidad provoca:

- ▶ Aumento de consumo de combustible hasta un 15%
- ▶ Daños en el catalizador
- ▶ Incumplimiento de las estrictas normas de emisiones de gases
- ▶ Irregularidades en el rendimiento del motor

Лямбда-зонды подвергаются экстремальным нагрузкам

Безупречно действующий лямбда-зонд является важным условием для надежной работы двигателя и тем самым для снижения расхода топлива, уменьшения выбросов вредных веществ и обеспечения надлежащих показателей состава ОГ. Лямбда-зонды от Bosch отличаются длительным сроком службы, правильным порядком работы и возможностью оптимального согласования с работой двигателя.

Поэтому целесообразна регулярная проверка и замена

У водителей много уважительных причин, чтобы предпочесть абсолютно надежные в эксплуатации лямбда-зонды от Bosch:

- ▶ Экономия топлива до 15% по сравнению с устаревшим лямбда-зондом
- ▶ Исключение дорогостоящих повреждений катализатора
- ▶ Соблюдение строгих требований норм токсичности ОГ
- ▶ Улучшение ходовых качеств

Bosch gibt Ihnen Sicherheit

Beim Wechsel von Lambdasonden können Sie sich auf Bosch verlassen:

- ▶ Sicherheit durch garantierte Erstausrüstungsqualität
- ▶ Sicherheit bei der Auswahl der richtigen Sonde

Immer genau die richtige Lambdasonde

Viele genaue technische Vorgaben u.a. wie

- ▶ passende Kabellänge
 - ▶ passende Stecker
 - ▶ vorgefettetes Gewinde
- ergeben eine große Typenvielfalt.

Alle Lambdasonden von Bosch passen maßgeschneidert zum jeweiligen Fahrzeugmodell und sind optimal auf die Werkstatt zugeschnitten.

So garantieren Bosch Lambdasonden Sicherheit und bieten einfache und schnelle Montage.

You can't go wrong with Bosch

When it comes to replacing Lambda sensors you can trust Bosch:

- ▶ No risks thanks to guaranteed original-equipment quality
- ▶ Help in choosing the right sensor

Always the best Lambda sensor for the job

Numerous specific technical features such as

- ▶ matching cable length
 - ▶ matching connectors
 - ▶ pre-greased thread
- provide a wide variety of types.

All Bosch Lambda sensors are tailored to the relevant vehicle model and are optimized for the workshop.

As a result, Bosch Lambda sensors guarantee reliability allied to quick and easy fitting.

Bosch, c'est la sécurité

Lors du remplacement des sondes Lambda, vous pouvez faire confiance à Bosch:

- ▶ Sécurité de la qualité première monte garantie
- ▶ Sécurité du choix de la bonne sonde

Toujours exactement la bonne sonde Lambda

Les nombreux paramètres techniques précis comme

- ▶ une longueur de câble adaptée
 - ▶ des connecteurs adaptés
 - ▶ un filetage pré-lubrifié
- induisent un grand nombre de types.

Toutes les sondes Lambda Bosch s'adaptent comme sur mesure au modèle concerné de véhicule et tiennent parfaitement compte des besoins de l'atelier.

Les sondes Lambda offrent la sécurité et garantissent un montage simple et rapide.

Bosch è garante di sicurezza

In caso di sostituzione della sonda Lambda, affidatevi a Bosch:

- ▶ Sicurezza grazie alla garanzia di una qualità identica al primo equipaggiamento
- ▶ Sicurezza nella scelta della sonda giusta

Per ogni veicolo la sonda Lambda giusta

Il rispetto delle specifiche tecniche precise, come ad es

- ▶ lunghezza corretta del cavo
 - ▶ connettori corretti
 - ▶ filettatura preingrassata
- assicurano una vasta gamma di modelli disponibili.

Tutte le sonde Lambda di Bosch si adattano perfettamente al relativo modello di veicolo e sono concepite su misura per soddisfare le esigenze delle officine.

In questo modo le sonde Lambda di Bosch garantiscono sicurezza offrendo nel contempo semplicità e rapidità di montaggio.

Bosch le ofrece seguridad

Al cambiar las sondas Lambda puede confiar en Bosch:

- ▶ Seguridad gracias a una calidad de primer equipo garantizada
- ▶ Seguridad al seleccionar la sonda correcta

Siempre la sonda Lambda adecuada

Muchas preespecificaciones técnicas como, por ejemplo

- ▶ la longitud de cable correcta
 - ▶ conectores adecuados
 - ▶ rosca preengrasada
- resultan en una gran variedad de diferentes tipos.

Todas las sondas Lambda de Bosch están hechas a la medida para el modelo de vehículo correspondiente y están adaptadas óptimamente para el taller.

Así, las sondas Lambda de Bosch garantizan seguridad y permiten un montaje fácil y rápido.

Bosch garantisce надежность

При замене лямбда-зондов Вы всегда можете положиться на Bosch:

- ▶ Безопасность благодаря гарантированному качеству от предприятия-изготовителя
- ▶ Надежность выбора подходящего зонда

Всегда самый подходящий лямбда-зонд

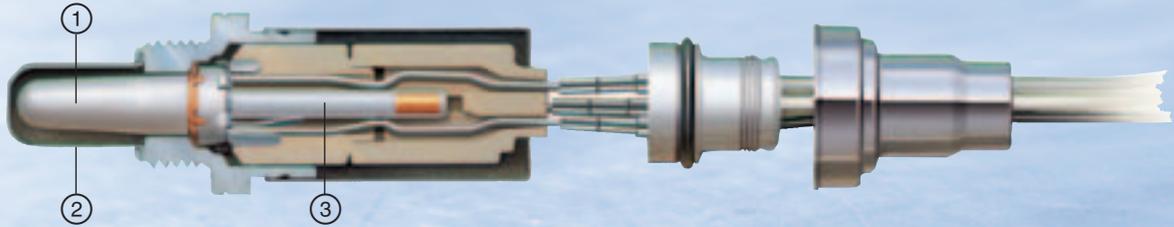

Множество точных технических условий, например, в отношении

- ▶ подходящей длины кабеля,
 - ▶ подходящих штекеров и
 - ▶ предварительно смазанной резьбы
- обуславливает широкое разнообразие типов.

Все лямбда-зонды от Bosch точно подходят к соответствующей модели автомобиля и оптимально адаптированы к применению в СТО.

Таким образом, лямбда-зонды от Bosch гарантируют высокую надежность, а также легко и быстро монтируются.

A

Funktion der Lambdasonde

- ▶ Misst den Restsauerstoffgehalt im Abgas:
 - Sprungsonde** (≤ 4 Adern):
Sie erzeugt eine Spannung zwischen ca. 25 und 900 mV entsprechend dem Sauerstoffgehalt im Abgas.
 - Breitbandsonde** (= 5 Adern):
Für Direkteinspritzung und Dieselfahrzeuge. Sie erzeugt einen elektrischen Strom zwischen -2 mA und $+3$ mA entsprechend dem Sauerstoffgehalt im Abgas.
- ▶ Vergleicht den Restsauerstoffgehalt im Abgas mit dem Sauerstoffgehalt der Umgebungsluft.
- ▶ Erkennt den Übergang vom fetten zum mageren Gemisch und umgekehrt.

Aufbau der Lambdasonde

Die **Fingersonde** A enthält als Kernstück eine fingerförmige Sensorkeramik. Diese wird von einem separaten Heizer beheizt, da ein Regelbetrieb erst ab einer Temperatur von 350°C möglich ist. Die **planare Lambdasonde** B ist die Weiterentwicklung der Fingersonde. Im Sensorelement ist außer der Messzelle auch der Heizer integriert. Damit wird eine schnellere Betriebsbereitschaft erzielt.

Function of Lambda sensor

- ▶ Measures the residual oxygen content of the exhaust gas:
 - Step-change sensor** (≤ 4 wires):
Generates a voltage of between approx. 25 and 900 mV depending on the oxygen content of the exhaust gas.
 - Broadband sensor** (= 5 wires):
For direct injection and diesel vehicles. Generates an electrical current between -2 mA and $+3$ mA depending on the oxygen content in the exhaust gas.
- ▶ Compares the residual oxygen content of the exhaust gas with the oxygen content of the surrounding air.
- ▶ Detects the transition from a rich to a lean mixture and vice versa.

Design of Lambda sensor

The **finger-type sensor** A contains a finger-shaped sensor ceramic element as the core. This is heated with a separate heater as control action requires a temperature of at least 350°C . The **planar Lambda sensor** B is a more advanced form of the finger-type sensor. Both the measurement cell and the heater are integrated into the sensor element. This means that the sensor is ready for operation more quickly.

Fonction de la sonde Lambda

- ▶ Mesure de la teneur en oxygène résiduel des gaz d'échappement:
 - Sonde à saut de tension** (≤ 4 conducteurs) :
Elle génère une tension comprise entre env. 25 et 900 mV en fonction de la teneur en oxygène des gaz d'échappement.
 - Sonde à large bande** (= 5 conducteurs) :
Pour l'injection directe et les véhicules diesel. Elle génère un courant électrique compris entre -2 mA et $+3$ mA en fonction de la teneur en oxygène des gaz d'échappement.
- ▶ Comparaison de la teneur en oxygène résiduel des gaz d'échappement et de la teneur en oxygène de l'air ambiant.
- ▶ Détection du passage d'un mélange riche à un mélange pauvre et inversement.

Constitution de la sonde Lambda

La **sonde-doigt** A renferme un élément céramique en forme de doigt qui en constitue la partie centrale. Cet élément est chauffé par un chauffage séparé car la régulation n'est possible qu'à partir d'une température de 350°C . La **sonde Lambda planaire** B est l'évolution de la sonde-doigt. L'élément sensible intègre la cellule de mesure et le chauffage, ce qui permet à la sonde d'être opérationnelle plus rapidement.

Funzionamento e struttura

es

Función y estructura

ru

Функции и строение

Funzionamento della sonda Lambda

- Misura la percentuale dell'ossigeno residuo nei gas di scarico:

Sonda a salto (di tipo on/off)

(≤ 4 conduttori): Questa sonda genera una tensione tra ca. 25 e 900 mV in base alla quantità di ossigeno presente nei gas di scarico.

Sonda a banda larga (= 5 conduttori): Per iniezione diretta e veicoli diesel.

Questa sonda genera una corrente elettrica tra -2 mA e $+3$ mA in base alla quantità di ossigeno presente nei gas di scarico.

- Confronta la percentuale dell'ossigeno residuo nei gas di scarico con i valori di ossigeno presenti ambiente.
- Riconosce il passaggio da una miscela ricca ad una miscela povera e viceversa.

Struttura della sonda Lambda

La **sonda a dito** ① contiene un sensore in ceramica a forma di dito. Questo sensore viene riscaldato da un riscaldatore separato, poiché la regolazione è possibile solo a partire da una temperatura di 350°C .

La **sonda Lambda planare** ② rappresenta il perfezionamento tecnico della sonda a dito. Nell'elemento sensore sono integrati sia la cella di misurazione che il riscaldatore. In questo modo si ottengono tempi di risposta più elevati.

Función de la sonda Lambda

- Mide el contenido de oxígeno residual en los gases de escape:

Sonda tipo «saltos» (≤ 4 hilos):

Genera una tensión entre aprox. 25 y 900 mV, que corresponde al contenido de oxígeno en los gases de escape.

Sonda de banda ancha (= 5 hilos):

Para inyección directa y vehículos diesel. Genera una corriente eléctrica entre -2 mA y $+3$ mA, de conformidad con el contenido de oxígeno en los gases de escape.

- Compara el contenido de oxígeno residual en los gases de escape con el contenido de oxígeno del aire ambiente.
- Reconoce la transición de una mezcla rica a una mezcla pobre y viceversa.

Estructura de la sonda Lambda

La **sonda convencional** ① contiene como pieza central un sensor cerámico en forma de la punta de un dedo. Éste es calentado por un calentador separado, ya que un servicio de regulación sólo es posible a partir de una temperatura de 350°C .

La **sonda Lambda plana** ② es el perfeccionamiento de la sonda convencional. En el elemento de sensor (en forma de una placa alargada) está integrado, además de la celda de medición, también el calentador. De esa forma se obtiene el estado de funcionamiento más rápidamente.

Функции лямбда-зонда

- Определяет остаточное содержание кислорода в ОГ:

Зонд со скачком сигнала перехода

(≤ 4 провода):

Он создает напряжение от ок. 25 до 900 мВ в соответствии с содержанием кислорода в ОГ.

Широкополосный зонд (= 5 проводов):

Для непосредственного впрыскивания и автомобилей с дизельным двигателем. Он создает электрический ток от -2 мА до $+3$ мА в соответствии с содержанием кислорода в ОГ.

- Сравнивает остаточное содержание кислорода в ОГ с содержанием кислорода в окружающем воздухе.
- Распознает переход от богатой к бедной смеси и наоборот.

Строение лямбда-зонда

Основу **пальцевого зонда** ① составляет пальцевидный чувствительный керамический элемент. Данный элемент нагревается от отдельного нагревателя, так как нормальный режим работы возможен только по достижении температуры 350°C .

Планарный лямбда-зонд ② является усовершенствованной моделью пальцевого зонда. Помимо измерительной ячейки, в чувствительный элемент встроен также нагреватель. Благодаря этому быстрее достигается готовность к работе.

Anordnung im Einspritzsystem

Bei neueren Motoren befinden sich die Lambdasonden im Abgassystem vor und nach dem Katalysator. Eine Elektrodenseite wird vom Abgas umspült und die andere steht mit der Außenluft in Verbindung. Die Außenluft dient als Referenzluft für die Restsauerstoffmessung.

Arbeitsweise

Anhand des Lambdasondensignals erkennt das Steuergerät die Gemischzusammensetzung. Bei der Saugrohreinjection steuert die Lambdasonde die Einspritzmenge so, dass eine optimierte Gemischzusammensetzung ($\lambda = 1$) gewährleistet ist. Hierbei wird die Motorlast berücksichtigt. Bei zu fettem Gemisch ($\lambda < 1$) muss die Kraftstoffmenge reduziert und bei zu magerem Gemisch ($\lambda > 1$) erhöht werden. Eine mögliche zweite Lambdasonde (Diagnosesonde nach dem Katalysator) erkennt, ob die Regelsonde (vor dem Katalysator) noch optimal arbeitet. Das Steuergerät kann diese Abweichung dann rechnerisch kompensieren.

Integration in injection system

On more modern engines, the Lambda sensors are located in the exhaust system upstream and downstream of the catalytic converter. One side of the electrode is exposed to the exhaust gas, whereas the other is in contact with the surrounding air. The surrounding air is used as the reference air for measurement of the residual oxygen.

Mode of operation

The control unit uses the Lambda sensor signal to detect the A/F mixture composition. With intake-manifold injection, the Lambda sensor controls the injected fuel quantity in such a way that an optimized A/F mixture composition ($\lambda = 1$) is guaranteed. The engine load is taken into account. The fuel quantity must be reduced if the mixture is too rich ($\lambda < 1$) and increased if it is too lean ($\lambda > 1$). If fitted, a second Lambda sensor (the diagnostic sensor downstream of the catalytic converter) detects whether the control sensor (upstream of the catalytic converter) is still functioning optimally. The control unit then calculates the compensation required to rectify any deviation.

Disposition dans le système d'injection

Sur les moteurs récents, les sondes Lambda se trouvent dans le système d'échappement, en amont et en aval du catalyseur. Un côté de l'électrode baigne dans les gaz d'échappement et l'autre est en contact avec l'air extérieur. L'air extérieur sert de référence pour la mesure de l'oxygène résiduel.

Mode de fonctionnement

Grâce au signal de la sonde Lambda, la centrale de commande reconnaît la composition du mélange. Lors de l'injection, la sonde Lambda contrôle le débit d'injection de manière à optimiser la composition du mélange ($\lambda = 1$) en tenant compte de la charge du moteur. Si le mélange est trop riche ($\lambda < 1$), la quantité de carburant doit être réduite et s'il est trop pauvre ($\lambda > 1$), elle doit être augmentée. Une deuxième éventuelle sonde Lambda (sonde de diagnostic en aval du catalyseur) vérifie si le fonctionnement de la sonde de régulation (en amont du catalyseur) est encore optimal. Cette différence peut alors être compensée par la centrale de commande.

Disposizione e principio di funzionamento

es

Disposición y funcionamiento

ru

Место расположения и принцип работы

Posizione nel sistema di iniezione

Nei motori più recenti le sonde Lambda sono posizionate nel sistema dei gas di scarico a monte e a valle del catalizzatore. Un elettrodo è immerso nel gas di scarico, mentre l'altro è a contatto con l'aria esterna. L'aria esterna funge da aria di riferimento per la misurazione dell'ossigeno residuo.

Principio di funzionamento

In base al segnale della sonda Lambda, la centralina di comando riconosce la composizione della miscela. In caso di iniezione nel collettore di aspirazione, la sonda Lambda controlla la quantità da iniettare in modo tale che sia sempre garantita la composizione ottimale della miscela ($\lambda = 1$). In questo contesto viene tenuto conto del carico del motore. In presenza di una miscela troppo ricca ($\lambda < 1$), la quantità di carburante deve essere ridotta, in presenza di una miscela troppo povera ($\lambda > 1$) la quantità di carburante deve essere aumentata. Una possibile seconda sonda Lambda (sonda di diagnosi a valle del catalizzatore) riconosce se la sonda di regolazione (a monte del catalizzatore) funziona ancora in modo ottimale. La centralina è quindi in grado di compensare un eventuale scostamento tramite opportuni algoritmi.

Disposición en el sistema de inyección

En los motores más modernos, las sondas Lambda se encuentran en el sistema de escape, antes y después del catalizador. Un lado del electrodo está en contacto con los gases de escape, y el otro está en contacto con el aire exterior. El aire exterior sirve como aire de referencia para la medición del oxígeno residual.

Funcionamiento

Mediante la señal de la sonda Lambda, la unidad de mando reconoce la composición de la mezcla. En la inyección, la sonda Lambda controla la cantidad inyectada, de manera que esté garantizada una composición optimizada de la mezcla ($\lambda = 1$). Para ello se tiene en cuenta la carga del motor. En las mezclas demasiado ricas ($\lambda < 1$) debe reducirse la cantidad de combustible y en el caso de mezclas demasiado pobres ($\lambda > 1$), debe aumentarse. Una eventual segunda sonda Lambda (sonda de diagnóstico después del catalizador) reconoce si la sonda de regulación (antes del catalizador) funciona perfectamente. La unidad de mando puede calcular la cantidad de compensación necesaria para rectificar cualquier desvío.

Место расположения в системе впрыска

У современных двигателей лямбда-зонды располагаются в выхлопной системе до и после катализатора. Сторона электрода омывается ОГ, а другая – имеет контакт с наружным воздухом. Наружный воздух служит в качестве образца для измерения количества остаточного кислорода.

Принцип работы

На основании поступающего от лямбда-зонда сигнала блок управления распознает состав смеси. При впрыскивании во впускную трубу лямбда-зонд регулирует количество впрыскиваемого топлива таким образом, чтобы обеспечить оптимальный состав смеси ($\lambda = 1$). При этом учитывается нагрузка двигателя. При слишком богатой смеси ($\lambda < 1$) количество топлива необходимо уменьшить, а при слишком бедной ($\lambda > 1$) – увеличить. Возможно наличие второго лямбда-зонда (диагностического зонда-после катализатора), который определяет, по-прежнему ли оптимально работает регулирующий зонд (перед катализатором). Возникшее отклонение может быть затем скомпенсировано блоком управления путем вычисления.

de

Unbedingt vermeiden

① **Steckverbindungen:**
Kein Kontaktspray oder Fett benutzen, da Umgebungsluft zur Funktion der Lambdasonde benötigt wird.

Richtiger Umgang

① **Steckverbindungen:**
Vor Motorwäsche oder Auftragen von Unterbodenschutz unbedingt Sonde und Steckverbindung abdecken.

Unbedingt vermeiden

② **Anschlusskabel:**
Kabel nicht knicken und Scheuerstellen vermeiden, zusätzlich Zug, Druck oder Schwingungen ausschließen.

Richtiger Umgang

② **Anschlusskabel:**
Heiße Auflagestellen und Berührungspunkte auf oder an der Abgasanlage vermeiden.

en

To be avoided at all costs

① **Plug-in connections:**
Do not use contact spray or grease, as the surrounding air is required for Lambda-sensor operation.

Correct procedure

① **Plug-in connections:**
Always cover the sensor and connector before washing the engine or applying undersealing.

To be avoided at all costs

② **Connection cable:**
Do not kink the cable and avoid chafe marks; also prevent tension, pressure or vibrations.

Correct procedure

② **Connection cable:**
Avoid hot supporting and contact points on or at the exhaust system.

fr

Eviter impérativement

① **Connexions:**
Ne pas utiliser de spray de contact ou de graisse car la sonde Lambda a besoin de l'air ambiant pour fonctionner.

Correct

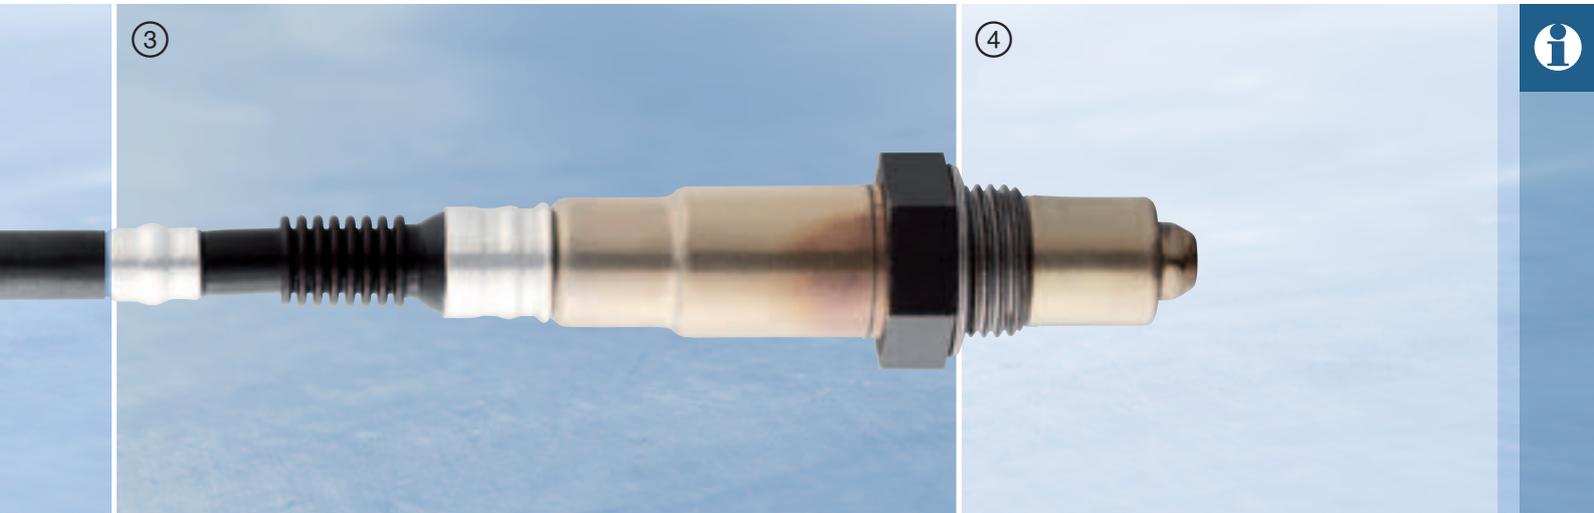

① **Connexions:**
Avant le nettoyage du compartiment-moteur ou l'application d'un produit de protection sur le dessous de caisse, protéger impérativement la sonde et la connexion.

Eviter impérativement

② **Câbles de raccordement:**
Ne pas plier les câbles et éviter les zones de frottement. Exclure les tractions, pressions et vibrations.

Correct

② **Câbles de raccordement:**
Eviter les zones d'appui et les points de contact brûlants sur le système d'échappement.

Unbedingt vermeiden

③ **Sondenkörper:**
Keine Schläge auf die Sonde,
keine Hochdruckreinigung.

To be avoided at all costs

③ **Sensor body:**
Sensor is not to be subjected
to impacts or high-pressure
cleaning.

Eviter impérativement

③ **Corps de la sonde:**
Ne pas donner de coups sur la
sonde, pas de nettoyage haute
pression.

Richtiger Umgang

③ **Sondenkörper:**
Lambdasonde sorgfältig behan-
deln, nicht werfen und nicht
fallen lassen! Vor mechanischen
Belastungen schützen.

Correct procedure

③ **Sensor body:**
Handle Lambda sensor with care,
no not throw or drop. Protect
against mechanical loads.

Correct

③ **Corps de la sonde:**
Manipuler la sonde Lambda avec
soin, ne pas la laisser tomber !
La préserver des contraintes
mécaniques.

Unbedingt vermeiden

④ **Sondenspitze:**
Keine bleihaltigen Kraftstoffe
verwenden, kein Gewindefett auf
das Schutzrohr.

To be avoided at all costs

④ **Sensor tip:**
Do not use leaded fuels, no
thread grease on the protective
tube.

Eviter impérativement

④ **Pointe de la sonde:**
Ne pas utiliser de carburants
contenant du plomb, ne pas
appliquer de graisse pour
filetage sur le tube protecteur.

Richtiger Umgang

④ **Sondenspitze:**
Einbau mit eingefettetem
Gewinde.

Correct procedure

④ **Sensor tip:**
Grease the thread when fitting.

Correct

④ **Pointe de la sonde:**
Montage avec un filetage graissé.

it

Da evitare assolutamente**① Connettori:**

Non impiegare spray per contatti o grasso, in quanto l'aria ambiente viene utilizzata per il corretto funzionamento della sonda Lambda.

Manutenzione corretta**① Connettori:**

Prima di effettuare un lavaggio del motore o applicare il protettivo sottoscocca, coprire la sonda e il relativo collegamento a spina.

Da evitare assolutamente**② Cavo di collegamento:**

Non piegare il cavo e nella posa evitare punti di sfregamento; escludere sollecitazioni a trazione, pressione o vibrazioni.

Manutenzione corretta**② Cavo di collegamento:**

Evitare punti di appoggio o di contatto caldi sull'impianto di scarico o in prossimità dello stesso.

es

Lo que debe evitarse a toda costa**① Conectores:**

Nunca aplicar un pulverizador de contacto o lubricantes, ya que el aire envolvente es necesario para el funcionamiento de la sonda Lambda.

Manipulación correcta**① Conectores:**

Cubra siempre la sonda y el conector antes de lavar el motor.

Lo que debe evitarse a toda costa**② Cable de conexión:**

No debe existir ningún daño provocado por corriente eléctrica, vibración, roce o retorcimiento de los cables.

Manipulación correcta**② Cable de conexión:**

Evitar puntos de contacto entre el cable y el tube de escape.

ru

Обязательно избегать**① Разъемные соединения:**

Не применять контактный спрей или консистентную смазку, так как для работы лямбда-зонда требуется окружающий воздух.

Правильное обращение**① Разъемные соединения:**

Перед мойкой двигателя или нанесением антикоррозионного средства защиты днища кузова необходимо обязательно закрыть зонд и разъемное соединение.

Обязательно избегать**② Соединительный кабель:**

Не сгибать кабель и избегать образования мест износа, а также не допускать натяжения, давления или колебаний.

Правильное обращение**② Соединительный кабель:**

Избегать наличия горячих мест контакта или соприкосновения с системой выпуска ОГ.

Manipulación de las sondas Lambda

ru

Порядок обращения с лямбда-зондами

Da evitare assolutamente

③ Corpo sonda:

Non esporre la sonda a colpi, non effettuare la pulizia ad alta pressione.

Manutenzione corretta

③ Corpo sonda:

Trattare la sonda Lambda con la massima cura, non lanciarla e non lasciarla cadere! Proteggerla da sollecitazioni meccaniche di qualsiasi genere.

Da evitare assolutamente

④ Punta della sonda:

Non adoperare carburanti contenenti piombo, non applicare grasso per filettature sul tubo di protezione.

Manutenzione corretta

④ Punta della sonda:

Montaggio con filettatura ingrassata.

it

Lo que debe evitarse a toda costa

③ Cuerpo de la sonda:

El sensor no puede estar afectado por impacto o limpieza de alta presión. Golpear la sonda, no limpiar a alta presión.

Manipulación correcta

③ Cuerpo de la sonda:

Manipular la sonda Lambda con cuidado, no se debe golpear.

Lo que debe evitarse a toda costa

④ Punta de la sonda:

No utilizar combustibles que contengan plomo, no aplicar grasa para roscas al tubo protector.

Manipulación correcta

④ Punta de la sonda:

Aplique lubricante (grasa especial) en la rosca cuando la instale.

es

Обязательно избегать

③ Тело зонда:

Избегать ударов по зонду, исключить очистку под высоким давлением.

Правильное обращение

③ Тело зонда:

Аккуратно обращаться с лямбда-зондом, не бросать его и не ронять! Защищать от механических нагрузок.

Обязательно избегать

④ Наконечник зонда:

Не использовать топливо с содержанием свинца, не наносить на защитную трубку консистентную смазку для резьбовых соединений.

Правильное обращение

④ Наконечник зонда:

Установка со смазанной резьбой.

Unbeheizte Lambdasonden

Die unbeheizten Lambdasonden ebneten den Weg für die Abgasregelung der Zukunft. Sie benötigen eine Mindest-Arbeitstemperatur von 350 °C und müssen deshalb in unmittelbarer Motornähe eingebaut werden.

Wechselintervall: alle 50.000 – 80.000 km

Beheizte Lambdasonden, 3-polig

Um Lambdasonden auch „motorfern“ einbauen zu können, wurden sie im nächsten Entwicklungsschritt mit einer Heizung versehen. Erstmals wurde so die Funktionstemperatur des Sensorelements von über 350 °C kontinuierlich gewährleistet.

Wechselintervall: alle 100.000 – 160.000 km

Beheizte Lambdasonden, 4-polig

Bei den 4-poligen Sonden wird das Sensor-signal nicht über das Gehäuse, sondern über einen zusätzlichen vierten Anschluss geleitet. Durch Beaufschlagung des Sensorsignals mit weiteren Signalen kann z. B. ein Kabelbruch erkannt werden, der die Lambda-Regelung unwirksam machen würde.

Wechselintervall: alle 160.000 km

en

Unheated lambda sensors

The unheated lambda sensors paved the way for the exhaust emission regulation of the future. They need a minimum working temperature of 350 °C and must therefore be installed in the direct proximity of the engine.

Replacement interval: every 50,000 – 80,000 km

Heated lambda sensors, 3-core

In order to facilitate the installation of lambda sensors away from the engine, they were equipped with a heater in their next stage of development. This is the first time that it has been possible to ensure a constant functional temperature of the sensor element above 350 °C.

Replacement interval: every 100,000 – 160,000 km

Heated lambda sensors, 4-core

The sensor signal is not guided over the housing, it is guided over an additional fourth connection. By superimposing additional signals on the control signal, it is possible to detect such faults as, for instance, a cable break which would make the lambda control ineffective.

Replacement interval: every 160,000 km

fr

Sondes Lambda non chauffées

Les sondes Lambda non chauffées ont ouvert la voie de la régulation des gaz d'échappement du futur. Elles nécessitent une température minimale de 350 °C et doivent par conséquent être montées à proximité directe du moteur.

Intervalle de changement: tous les 50.000 – 80.000 km

Sondes Lambda chauffées, 3 pôles

Pour que les sondes Lambda puissent être montées également « à distance » du moteur, l'étape suivante du développement a consisté à les munir d'un chauffage. C'est ainsi qu'une température de fonctionnement supérieure à 350 °C a pu être obtenue en continu pour l'élément sensible.

Intervalle de changement: tous les 100.000 – 160.000 km

Sondes Lambda chauffées, 4 pôles

Dans le cas des sondes à 4 pôles, le signal ne transite pas par le boîtier, mais par un quatrième contact supplémentaire. La conjugaison du signal de la sonde avec d'autres signaux permet par ex. d'identifier une rupture de câble qui rendrait la régulation Lambda inopérante.

Intervalle de changement: tous les 160.000 km

Planare Lambdasonden

Die planaren Lambdasonden bestehen aus mehreren keramischen Folien mit integriertem Heizer. Sie erreichen ihre Betriebstemperatur doppelt so schnell wie bisherige Lambdasonden und halbieren so die Emissionen in der kritischen Kaltstartphase.

Wechselintervall: alle 160.000 km

Planare Breitbandsonden

Im Gegensatz zu bisherigen Sonden besitzen die planaren Breitbandsonden zwei Messzellen und 5 Adern. Sie messen sowohl im fetten als auch im mageren Bereich äußerst genau. Auch Gas- und Dieselmotoren lassen sich damit regeln.

Wechselintervall: alle 160.000 km

Universal-Lambdasonden

Mit Hilfe ihres Universalsteckers können wenige Universalsonden eine große Zahl von Originalsonden ersetzen. Dabei wird das Kabel der eingebauten Sonde an einer geeigneten Stelle durchtrennt. Der Universalstecker verbindet nun die Universalsonde mit dem Kabelende im Fahrzeug.

de

Planar lambda sensors

The planar lambda sensors consist of several ceramic foils with a built-in heater. They reach their operating temperature twice as quickly as the previous lambda sensors, and can thus halve emissions in the critical cold-start phase.

Replacement interval: every 160,000 km

Planar wide-band sensors

Unlike the previous sensors, planar wide-band sensors have two measurement cells and 5 wires. These provide extremely accurate measurements in both the rich and the lean range. They can also be used to control gas engines and diesel engines.

Change interval: every 160,000 km

Universal lambda sensors

Thanks to the universal plug, a small number of universal lambda sensors replace a large number of original sensors. The cable of the fitted sensor is simply cut at a suitable point and connected to the cable in the vehicle by means of the universal plug.

en

Sondes Lambda planaires

Les sondes Lambda planaires se composent de plusieurs films céramiques intégrant un chauffage. Elles atteignent leur température de service deux fois plus vite que les précédentes sondes Lambda et divisent ainsi par deux les émissions au cours de la phase critique de démarrage à froid.

Intervalle de changement: tous les 160.000 km

Sondes planaires à large bande

Contrairement aux précédentes sondes, les sondes planaires à large bande possèdent deux cellules de mesure et 5 conducteurs. Leurs mesures sont extrêmement précises, tant dans la plage de mélange riche que pauvre. Elles permettent de réguler également les moteurs à gaz et les moteurs diesel.

Intervalle de changement: tous les 160.000 km

Sondes Lambda universelles

Grâce à un connecteur universel, il est possible de remplacer un grand nombre de sondes d'origine avec un nombre réduit de sondes universelles. Pour ce faire, il est nécessaire de sectionner le câble de la sonde posée à un endroit approprié. Le connecteur universel relie alors la sonde universelle à l'extrémité du câble dans le véhicule.

fr

it

Sonde Lambda non riscaldate

Le sonde Lambda non riscaldate hanno aperto la strada alla regolazione dei gas di scarico del futuro. Necessitano di una temperatura di lavoro minima di 350°C e devono essere montate nelle immediate vicinanze del motore.

Intervallo di sostituzione: ogni 50.000 – 80.000 km

Sonde Lambda riscaldate, a 3 poli

Per consentire il montaggio anche in posizioni lontane dal motore, le sonde Lambda riscaldate sono state dotate di un riscaldamento proprio. In questo modo è stato possibile garantire la temperatura di funzionamento dell'elemento sensore superiore a 350°C.

Intervallo di sostituzione: ogni 100.000 – 160.000 km

Sonde Lambda riscaldate, a 4 poli

Nelle sonde a 4 poli il segnale del sensore non viene trasmesso attraverso l'involucro, bensì attraverso un quarto collegamento supplementare. Sovrapponendo ulteriori segnali al segnale del sensore è possibile, ad esempio, riconoscere la rottura di un cavo, che renderebbe inefficace la regolazione Lambda.

Intervallo di sostituzione: ogni 160.000 km

es

Sondas Lambda no calefactadas

Las sondas Lambda no calefactadas abrieron el camino para la regulación de emisiones de gases de escape del futuro. Requieren una temperatura de trabajo mínima de 350°C y, por lo tanto, deben instalarse junto al lado del motor.

Intervalo de cambio: cada 50.000 – 80.000 km

Sondas Lambda, 3 polos

Con el objeto de poder instalar las sondas Lambda alejadas del motor, en el siguiente fase de su desarrollo se ha incorporado una calefacción. Por primera vez se logró así garantizar continuamente la temperatura de servicio del elemento de sensor, que sobrepasa los 350°C.

Intervalo de cambio: cada 100.000 – 160.000 km

Sondas Lambda calefactadas, 4 polos

En las sondas de 4 polos la señal de sensor no se dirige a través de la carcasa, sino a través de un cuarto conductor adicional. Con este aumento de señales es posible detectar una ruptura de cable, que podría inhabilitar la regulación Lambda.

Intervalo de cambio: cada 160.000 km

ru

Лямбда-зонды без нагрева

Лямбда-зонды без нагрева прокладывают себе путь в будущее в области регулирования ОГ. Их минимальная рабочая температура должна составлять 350°C, поэтому их необходимо устанавливать непосредственно вблизи двигателя.

Частота замены: каждые 50 000 – 80 000 км

Лямбда-зонды с нагревом, 3-полюсные

Для обеспечения возможности установки лямбда-зондов также «вдали от двигателя» были разработаны лямбда-зонды с системой нагрева. Впервые благодаря этому постоянно обеспечивается рабочая температура чувствительного элемента свыше 350°C.

Частота замены: каждые 100 000 – 160 000 км

Лямбда-зонды с нагревом, 4-полюсные

У 4-полюсных зондов сенсорный сигнал передается не через корпус, а через дополнительный, четвертый разъем. Путем нагрузки сенсорного сигнала прочими сигналами можно, например, распознать разрыв кабеля, который бы дезактивировал систему лямбда-регулирования.

Частота замены: каждые 160 000 км

it

Programma sonde Lambda Bosch

Sonde Lambda planari

Le sonde Lambda planari sono costituite da diverse lamine ceramiche con riscaldatore integrato. Esse raggiungono la loro temperatura di esercizio in un tempo due volte inferiore rispetto alle sonde Lambda precedenti e permettono di dimezzare le emissioni di sostanze nocive nella fase critica dell'avviamento a freddo.

Intervallo di sostituzione: ogni 160.000 km

Sondas Lambda planas

Las sondas Lambda planas constan de varias láminas cerámicas con un calentador integrado. Alcanzan su temperatura de servicio dos veces más rápido que las sondas Lambda utilizadas hasta ahora. Gracias a ello, reducen a la mitad las emisiones en la fase crítica de arranque en frío.

Intervalo de cambio: cada 160.000 km

Планарные лямбда-зонды

Планарные лямбда-зонды состоят из нескольких керамических слоев со встроенным нагревателем. Они достигают своей рабочей температуры в два раза быстрее обычных лямбда-зондов и таким образом сокращают вдвое уровень выбросов во время критической фазы холодного запуска двигателя.

Частота замены: каждые 160 000 км

es

Programa de sondas Lambda de Bosch

Sonde planari a banda larga

A differenza delle sonde precedenti, le sonde planari a banda larga dispongono di due celle di misurazione e di 5 conduttori. Esse sono in grado di effettuare misurazioni precisissime sia con miscele ricche che povere. Inoltre queste sonde possono essere impiegate anche per la regolazione di motori a gas o motori diesel.

Intervallo di sostituzione: ogni 160.000 km

Sondas planas de banda ancha

A diferencia de las sondas utilizadas hasta ahora, las sondas planas de banda ancha disponen de dos celdas de medición y de 5 hilos. Miden con una gran exactitud tanto en el rango rico como en el pobre. Permiten regular también motores a gas y diésel.

Intervalo de cambio: cada 160.000 km

Планарные широкополосные зонды

В отличие от обычных зондов планарные широкополосные зонды оснащены двумя измерительными ячейками и 5 проводами. Они обеспечивают чрезвычайно точное измерение как при богатой, так и при бедной смеси. С их помощью возможно также регулирование газовых и дизельных двигателей.

Частота замены: каждые 160 000 км

ru

Ассортимент лямбда-зондов от Bosch

Sonde Lambda universali

Grazie all'impiego di un connettore universale, un numero ridotto di sonde universali può sostituire una molteplicità di sonde originali. A tale scopo il cavo della sonda montata viene tranciato in un punto idoneo. Il connettore universale collega quindi la sonda universale con l'estremità del cavo già inserito nel veicolo.

Sondas Lambda universales

Gracias a sus «empales» universales, con pocas sondas universales puede sustituir una gran cantidad de sondas originales. En este caso, el cable de la sonda montada se corta en la zona adecuada. El «emplame» universal conecta entonces la sonda universal con el extremo del cable en el vehículo.

Универсальные лямбда-зонды

Благодаря наличию универсального штекера несколько универсальных зондов могут заменить большое количество оригинальных зондов. При этом в подходящем месте разрезают кабель встроенного зонда. Универсальный штекер служит теперь для соединения универсального зонда с концом кабеля в автомобиле.

Benutzerhinweise

In diesem Katalog sind die Daten von Fahrzeugen, Motoren und Geräten für den europäischen Markt von Baujahr 1988 bis einschließlich 2013 erfasst. Diese wurden aus Hersteller- und Importeurangaben, aus Fahrzeuguntersuchungen sowie aus Unterlagen von Bosch nach bestem Wissen sorgfältig zusammengestellt und geben den Stand zum Zeitpunkt der Drucklegung wieder.

Zwangsläufige Abweichungen durch länderspezifische technische Änderungen können nie ganz ausgeschlossen werden. Bosch kann daher insoweit nicht für die Vollständigkeit und Fehlerfreiheit der Daten haften. Für Irrtümer und Druckfehler, die zu Schäden am Eigentum oder Vermögen führen, haftet Bosch nur bei grob fahrlässiger Pflichtverletzung und bei Vorsatz für unmittelbare Schäden. Bei Personenschäden haftet Bosch auch bei leichter Fahrlässigkeit.

en

Notes for users

This catalog contains the data from the vehicles, engines, and equipment for the European market from year of manufacture 1988 up to and including the year 2013. This data has been assembled from information provided by manufacturers and importers, and taken from Bosch documentation, as well as from investigations made on vehicles. It has been compiled to the best of our knowledge and belief, and reflects the status at the date of going to print.

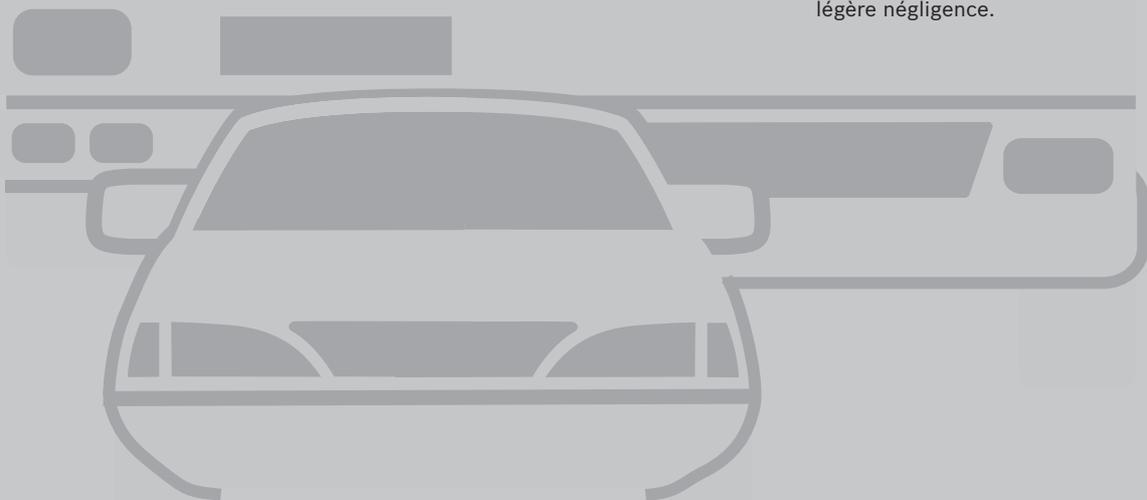

It is impossible to avoid deviations caused by technical changes resulting from the conditions and regulations applying in a particular country. Bosch can therefore accept no liability for the completeness and faultlessness of the data. In case of mistakes and misprints which result in damage to property or assets, Bosch is only liable for immediate damages insofar as a gross breach of duty or wrongful intent apply. If personal injury is involved, Bosch is liable also in case of ordinary negligence.

fr

A l'attention de l'utilisateur

Le présent catalogue mentionne les données spécifiques de véhicules, moteurs et appareils pour le marché européen depuis l'année de fabrication 1988 jusqu'au millésime 2013 inclus. Ces informations ont été rassemblées soigneusement et en toute impartialité à partir des indications des constructeurs et importateurs, des contrôles techniques des véhicules et de la documentation Bosch, et matérialisent le stade des connaissances au moment de la mise sous presse.

Il n'est jamais possible d'exclure totalement les divergences éventuelles dues aux modifications techniques, spécifiques des différents pays considérés. En aucun cas, Bosch n'engage sa responsabilité en ce qui concerne l'intégralité et l'exactitude des données. En ce qui concerne les erreurs et les fautes d'impression, qui peuvent entraîner des dommages à la propriété ou à la fortune, Bosch n'engage sa responsabilité pour les dommages directs qu'en cas d'atteinte et de négligence graves et intentionnelles envers ses obligations. En cas de dommages causés aux personnes, Bosch engage sa responsabilité aussi en cas de légère négligence.

Avvertenze per la consultazione

Nella seguente parte di catalogo sono contemplati veicoli, motori ed apparecchi a partire dall'anno di costruzione 1988 fino all'anno 2013. Tali informazioni sono state rilevate dalle documentazioni di Case Auto, Importatori, da verifiche eseguite sui veicoli, così come da documentazione Bosch.

Eventuali discordanze dovute a specifiche esigenze del Paese e variazioni tecniche non possono essere previste. Per questo Bosch non si assume alcuna responsabilità per mancanze ed eventuali errori riferite ai dati. Per danni a cose o danni patrimoniali, dovuti ad errori o refusi di stampa, Bosch è responsabile solo in caso di dolo o colpa grave. Per danni alla persona, Bosch è responsabile anche in caso di colpa meno grave.

es

Avertencia al usuario

Los datos recogidos en este catálogo para vehículos, motores y maquinaria del mercado europeo abarcan los años de fabricación entre 1988 y 2013, inclusive. Estos datos han sido recogidos del fondo documental de Bosch, así como de las inspecciones de vehículos, datos de fabricantes e importadores.

No obstante, y debido al cuantioso material de información, no se puede excluir la posibilidad de modificaciones, diferencias propias de aplicaciones específicas de los países, fallos, equivocaciones o errores. En caso de inexactitudes y errores de imprenta, la responsabilidad de Bosch se limita al daño inmediato, con posibles perjuicios patrimoniales, a no ser que el daño previsible y típico del contrato sea de mayor cuantía o se deba a dolo o culpa intencionada o a negligencia grave.

Вниманию пользователей

В настоящем каталоге приводятся данные по автомобилям европейского рынка, которые были выпущены в период с 1988 по 2013 год включительно. Они были тщательно подобраны из информации, предоставленной производителями и импортерами, по результатам тестирования автомобилей, а также из документации компании Bosch и отражают данные на момент подписания в печать. Неизбежные расхождения из-за специфических для каждой страны технических модификаций не могут быть полностью исключены. Поэтому компания Bosch не несет ответственность за полноту и точность предоставленных данных. В случае, если ошибки или опечатки привели к ущербу собственности или повлекли материальные затраты, компания Bosch берет на себя ответственность только в случае, если это является преднамеренным вредом или грубой небрежностью со стороны фирмы Bosch. Если пострадало физическое лицо, фирма Bosch несет ответственность даже при допущении незначительной небрежности.

Gegenüberstellung**Benutzerhinweise**

Im nachfolgenden Katalogteil sind Bestellnummern von Herstellern anderer Marken, für die es einbaugleiche Bosch-Erzeugnisse oder -Teile gibt, aufgeführt. Da die verschiedenartigsten Bezeichnungssysteme angewendet werden, konnten die fremden Bestellnummern nur in einer einheitlichen, alphanumerischen Sortierfolge geordnet werden. Sie weicht bei einigen Herstellern von der dort üblichen Sortierfolge ab.

„Werden Bosch-Teile mit Teilenummern versehen, sind aus wettbewerbsrechtlichen Gründen in jedem Fall die jeweiligen Bosch-Teilenummern zu verwenden und als solche kenntlich zu machen. Daneben können auch fremde Teilenummern verwendet werden, um die technische bzw. funktionale Gleichwertigkeit der jeweiligen Produkte zum Ausdruck zu bringen.

Ggf. sollten nach Möglichkeit fremde Teilenummern sogleich mehrerer Hersteller aufgeführt werden. Eine fremde Teilenummer ist dabei eindeutig als solche eines anderen Herstellers kenntlich zu machen, wie insbesondere durch gleichzeitige Nennung des fremden Herstellers bzw. der fremden Marke sowie deren eindeutige Zuordnung zu der fremden Teilenummer.

Alle Angaben dürfen nur in Standard-Schrift erfolgen. Insbesondere dürfen keine Logos oder besondere Schriftzüge der fremden Hersteller verwendet und ihre Marken bzw. Namen auch sonst nicht besonders hervorgehoben werden. Vielmehr sollte die Nennung fremder Namen, Marken und Teilenummern generell möglichst unauffällig erfolgen.“

Cross-reference**Notes for users**

The following catalog section lists part numbers of non-Bosch equipment for which there are interchangeable Bosch products or components available. Since a wide range of different designation systems are used, we were forced to arrange the non-Bosch part numbers in a uniform alphanumerical order. This differs from the customary order employed by some manufacturers.

“If part numbers are assigned to Bosch parts, the corresponding Bosch part numbers are always to be used and clearly identified as such to satisfy the law on competition. Use can additionally be made of non-Bosch part numbers to express the equivalent technical and functional properties of the products concerned.

If applicable, the non-Bosch part numbers of several manufacturers should be listed wherever possible. When doing so, a non-Bosch part number is to be clearly identified as that of another manufacturer, in particular by naming the other manufacturer or the non-Bosch make and clearly assigning this to the non-Bosch part number.

All such information must always be given in standard typeface. In particular, use is not to be made of any logos or special emblems of other manufacturers and their brands and names are not to be specially highlighted in any other way. On the contrary, mention should only be made of non-Bosch names, makes and part numbers as inconspicuously as possible.”

Table de correspondance**A l'attention de l'utilisateur**

Cette section du catalogue reprend les références des fabricants d'autres marques pour lesquelles il existe des produits ou des composants Bosch de montage identique. De multiples systèmes de codage étant utilisés, les références des produits d'autres marques ne peuvent être reprises que suivant un classement alphanumérique uniforme. Pour certains fabricants, ce classement peut différer de celui qu'ils utilisent habituellement.

«Si des pièces Bosch sont munies de références, pour des raisons liées à la législation sur la concurrence, les références Bosch correspondantes doivent être utilisées dans tous les cas et être rendues identifiables comme telles. Parallèlement, des références étrangères peuvent également être utilisées pour exprimer l'équivalence technique ou fonctionnelle des produits considérés. Le cas échéant, indiquer si possible concomitamment les références étrangères de plusieurs fabricants.

Une référence étrangère doit être identifiée clairement comme étant celle d'un autre fabricant, notamment par l'indication simultanée de l'autre fabricant ou de l'autre marque, de même que par leur correspondance claire à la référence étrangère.

Toutes les indications doivent être effectuées dans la police standard. Aucun logo ou monogramme particulier des fabricants étrangers ne doit en particulier être utilisé et leurs marques ou noms ne doivent être mis en valeur d'aucune autre façon. Au contraire, les noms, marques et références étrangers doivent, d'une manière générale, être cités de façon aussi discrète que possible.»

it

Comparazione**Avvertenze per la consultazione**

Nella seguente parte del catalogo vengono riportati i numeri di ordinazione di costruttori di prodotti d'altra marca, per i quali sono disponibili prodotti o parti di prodotti Bosch di corrispondente applicazione. Dato che vengono utilizzati i più diversi sistemi di denominazione, si è potuto ordinare i numeri di ordinazione di altra marca solo in una sequenza di classificazione unitaria ed alfanumerica. Per alcune case costruttrici si differenzia perciò dalla sequenza di classificazione normalmente usata. In questo confronto le sigle Bosch vanno considerate come dati indicativi.

«Qualora componenti Bosch vengano corredati di codici, per motivi legati alle leggi che regolano la concorrenza si devono utilizzare in ogni caso i relativi codici Bosch evidenziandoli come tali. L'utilizzo di codici di altra marca è comunque possibile per esprimere una equivalenza tecnica o funzionale dei relativi prodotti.

Possibilmente è da prediligere l'indicazione contemporanea di codici di diversi costruttori. Un codice che non sia Bosch va evidenziato in modo univoco in tal senso, in particolare nominando contestualmente il costruttore o la marca di appartenenza.

Tutte le indicazioni devono essere riportate ricorrendo a caratteri standard. In particolare non si devono utilizzare loghi o scritte particolari usati dai costruttori di prodotti di altra marca né si devono mettere in risalto i relativi marchi o nomi. Al contrario, l'indicazione di nomi, marche e codici diversi da Bosch dovrebbe essere in genere quanto più discreta possibile.»

es

Equivalencias**Indicaciones para el usuario**

A continuación se han relacionado números de pedido de fabricantes de otras marcas para los que existen productos o piezas Bosch de iguales características. Dado que se utilizan los más diversos sistemas de designación, los números de pedido ajenos han podido relacionarse tan sólo en un orden unificado, alfanumérico. En el caso de algunos fabricantes, el orden de esta clasificación difiere del que utilizan habitualmente.

«Si piezas Bosch se dotan de números de pieza, por motivos de índole legal relativos a la competencia se deben utilizar en cualquier caso los respectivos números de pieza Bosch, identificándolos como tales debidamente. Paralelamente se pueden usar también números de pieza ajenos para poner de manifiesto la equivalencia técnica o funcional de los respectivos productos. En su caso y en la medida de lo posible, se deberían citar al mismo tiempo números de pieza ajenos de varios fabricantes.

Un número de pieza ajeno se debe identificar en estos casos claramente como perteneciente a otro fabricante, por ejemplo citando simultáneamente al fabricante ajeno o la marca ajena así como estableciendo la correspondencia de éstos con el número de pieza ajeno.

Todos los datos se deben escribir solo con letra estándar. En particular, no se permite utilizar logotipos o caracteres gráficos propios de los fabricantes ajenos, ni tampoco destacar sus marcas y nombres de manera especial. Por el contrario, los nombres, las marcas y los números de piezas de empresas ajenas se deberían citar, en general, de la forma más discreta posible.»

ru

Сопоставления**Вниманию пользователей**

В следующей части каталога приводятся номера для заказов производителей других марок, для которых имеются идентичные изделия или запчасти компании Bosch. Поскольку используются различные системы обозначений, номера заказов других производителей располагаются в едином алфавитноцифровом порядке. Для некоторых производителей они отличаются от используемого у них порядка классификации.

«Если изделия Bosch имеют номера деталей, то по причинам законодательных положений в области конкуренции в любом случае необходимо использовать соответствующие номера Bosch и показывать их. Кроме того, можно использовать также номера деталей других производителей, чтобы показать техническую и функциональную равноценность соответствующих изделий.

В отдельных случаях необходимо по возможности указывать номера деталей нескольких производителей. Номер детали другого производителя явно показывать как таковой, например, одновременно называя другого производителя или другую марку, а также их однозначное отношение к номеру детали другого производителя.

Все данные должны указываться стандартным шрифтом. В особенности, не разрешается использовать логотипы и специальные надписи других производителей и особым образом выделять их марки и названия. Напротив, названия, марки и номера деталей других производителей всегда необходимо указывать по возможности неброско.»
