# WARNING!!

# Your brake

Noise when pressing the brake pedal.

Brake fluid loss without a leak.

Brakes becoming less effective.

Are your  
brakes  
okay?

## Brake pads are wearing parts

Tire

and

Brake pad

## Replacement are similar.

**Safe**

### Drive safely by inspecting your brake pads early!

Brake replacement timing will differ depending on how often they are used, but about every 30,000km they should be changed, similar to the tire replacement cycle.

**Replace**

### Replace your brake pads early!

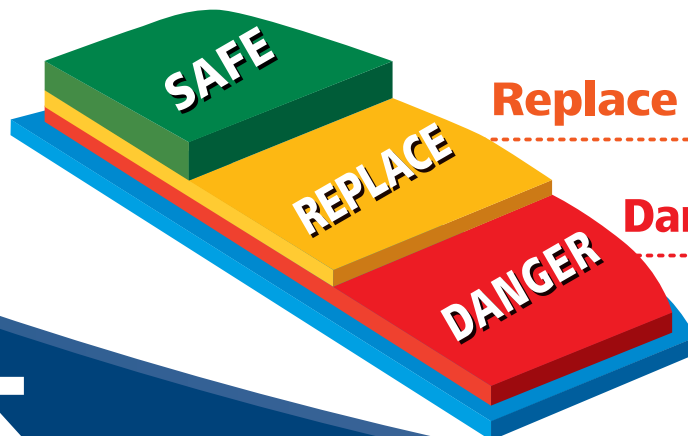

When the friction material of the brake pad has gone down around 5 or 6 mm the rate of wear accelerates drastically due to increasing friction heat.

**Danger**

### Replace your brake pads today!

When the drag surface is 3 mm or less your car is in danger. Continuing to drive in this state may lead to rotor damage (a major repair) or serious accident.

**Wear Condition  
Guidelines**

**Replace : 5 - 6mm or less**

**Danger : 3mm or less**

# pads are **wearing out!**

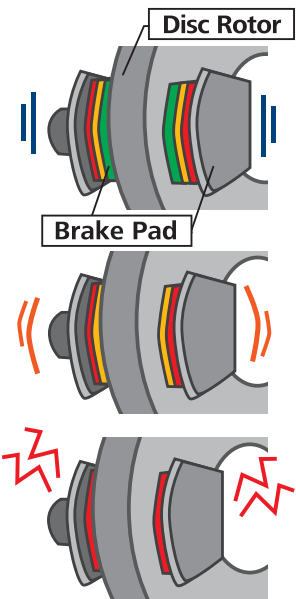

**If you have any of the symptoms on the left, get inspected right away!**

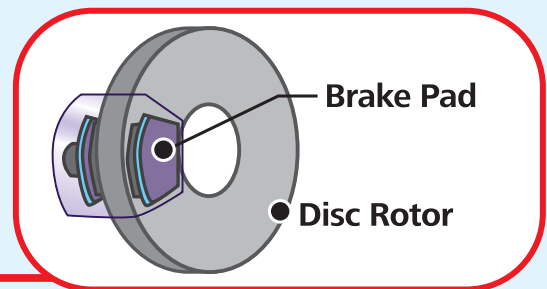

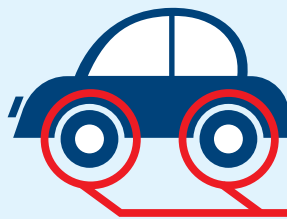

Taking action and getting your brakes checked early can prevent serious accidents.

**cycles**

\* May differ depending on use.

## Brake Pad

- The brake pad pinches the disc rotor and stops the car with the friction generated. **The pad is a wearing part that slowly wears down through the friction and heat created through this process.**
- As the pad thins the rate at which it does so increases. **Continuing to use the pad reduces the responsiveness of the brake and can lead to damage such as scratching the rotor.** When replacement is recommended, make sure that you replace your brake pads for safety's sake.

## Brake Pad

Stay safe with diligent inspection!

# Tips for Routine Checking

**Danger!**  
**These symptoms**  
**require attention!**

- Brake fluid loss without a leak.
- Brakes become less effective.
- Screeching when pressing the brake pedal.

**Check the source!**

- Brake pad wear.

**Leaving it**  
**may result in...**

- Brake malfunction leading to serious accident.
- Rotor damage.

**attention is so important. Check early and stay safe.**

# CATALOG 2013-2014

## **IMPORTANT NOTICE**

The purpose of this catalog is to furnish our customers with as complete a listing of their disc brake pad requirements as possible.

All listings, applications or interchanges contained in this catalog are based on the latest information available at the time of printing. Every effort has been made to ensure that the information contained in this catalog is correct, but we do not assume any responsibility for errors which may occur.

All references to manufactures names or part numbers are only used as a guide when ordering disc brake pad.
