

# Coil Spring

**Made in Japan**

[nhkspring.ru](http://nhkspring.ru)

**№1 В МИРЕ ПОСТАВЩИК ПРУЖИН  
НА КОНВЕЙЕРЫ АВТОПРОИЗВОДИТЕЛЕЙ**

## О компании.

Компания **NHK SPRING CO., LTD** является самым крупным производителем пружин в мире, поставляя свою продукцию на конвейеры основных японских автопроизводителей, а также нескольких американских и европейских в качестве OEM комплектующих.

Компания **NHK SPRING CO., LTD** была основана в 1939г. и на сегодняшний день заводы и представительства **NHK** расположены в 8 странах мира, в том числе, в Европе и Америке. Центральный офис и 9 заводов компании находятся в Японии.

Вся продукция **NHK** соответствует самым высоким требованиям качества. На каждом этапе производства пружины проходят контроль качества. Завод по производству пружин **NHK** в г. Йокогама первым в Японии получил сертификат контроля качества ISO 14001.

Компания **NHK SPRING CO., LTD** особое внимание уделяет исследовательской деятельности, разработке новых материалов, исследованию и внедрению новых технологий производства.

## О продукции.

Основной продукцией компании **NHK SPRING CO., LTD** являются элементы подвески автомобиля и главное место в ассортименте компании занимают пружины.

Важным отличием пружин **NHK** является материал, из которого они изготовлены. Это высоколегированная сталь, запатентованная разработка компании **NHK**, в составе которой используются 7 легирующих компонентов: углерод, кремний, медь, хром, никель, ванадий и титан. Благодаря этим компонентам и особой термообработке физические характеристики сплава значительно превосходят другие материалы, из которых изготавливаются пружины.

Изготовленная из этого материала пружина **NHK** на 50% легче и в полтора раза прочнее пружин предыдущего поколения.

*Результаты сравнительных тестов, проведенных в Японии в специализированном исследовательском центре.*

### Тест на динамическую выносливость.

Для испытаний было взято два образца пружин **NHK**, два образца пружин другого оригинального поставщика и три образца неоригинальных пружин хорошо известного в России японского бренда.

**Тип пружин:** задняя пружина для NISSAN SUNNY FB15

Лучшими оказались пружины **NHK**, которые по показателю выносливости имеют подавляющее преимущество перед другими пружинами.

Эти показатели чрезвычайно актуальны в условиях эксплуатации российских дорог, когда пружины автомобиля подвергаются запредельным нагрузкам.

### Тест на проседание.

Для испытаний было взято два образца пружин **NHK**, два образца пружин другого оригинального поставщика и три образца неоригинальных пружин хорошо известного в России японского бренда.

**Тип пружин:** задняя пружина для NISSAN SUNNY FB15

**Условия тестирования:** пружины удерживались в сжатом состоянии под максимальной нагрузкой (4670 N) в течении 96 часов при температуре 80 градусов С.

Испытания показали, что величина проседания пружин **NHK** наименьшая по сравнению с конкурентами и составляет в среднем 2,35%, тогда как величина проседания других тестируемых пружин в среднем до 7%!

## Усиленные пружины NHK HEAVY DUTY

Усиленные пружины **NHK HEAVY DUTY** предназначены для автомобилей, на заднюю ось которых периодически приходится повышенные нагрузки. Жесткость таких пружин по отношению к оригинальной пружине увеличена на 10%, поэтому применение усиленных пружин **NHK Heavy Duty** оправдывает себя при эксплуатации автомобиля на плохих дорогах.

При установке полного комплекта усиленных пружин клиренс автомобиля увеличивается для передней оси на 12,5-15 мм, для задней оси - 20-25 мм (в среднем в зависимости от модели).

Замену на усиленные пружины необходимо производить одновременно на передней и задней оси полным комплектом (4 шт.)

Пружины **NHK Heavy Duty** обеспечивают вам безопасность и комфорт даже на дорогах с плохим покрытием и в тяжелых условиях эксплуатации.

## Защита от подделок.

Отдел технологий безопасности компании **NHK SPRING CO., LTD** разрабатывает и производит передовые продукты в области обеспечения защиты от подделок. Последняя разработка компании, трастограмма, – это особенная разновидность голограммы, на поверхность которой нанесена оптическая пленка. Трастограмму, в отличие от голограммы, подделать невозможно, поэтому вся продукция компании защищена от подделок с помощью трастограммы. Для распознавания оригинального качества **NHK** используется ручной прибор - Handy Viewer. Принцип действия заключается в следующем: если трастограмма настоящая, то в правом окошке Handy Viewer виден голографический рисунок, а в левом окошке голографического рисунка видно не будет.

Вся продукция компании упакована в фирменные коробки **NHK**, информация на упаковке представлена на русском языке и полностью соответствует требованиям Госстандарта России. На каждой упаковке нанесен знак соответствия.

# ИНСТРУКЦИЯ К КАТАЛОГУ «Пружины подвески NHK»

## I. Выбор пружин по каталогу

1. В содержании каталога NHK выберите марку и название автомобиля.
2. В таблице выберите модель, год, двигатель, тип трансмиссии, модификацию.
3. Выберите **новые номера пружин NHK** для передней и задней оси в таблице:

Модель	Год	Двигатель	Объём двигателя	Тип трансмиссии	Модификация	Передняя пружина				Задняя пружина			
						NHK No.	OEM No.	Устаревший No.	HD NHK No.	NHK No.	OEM No.	Устаревший No.	HD NHK No.

4. Также Вы можете использовать **устаревшие номера NHK** для подбора:

Модель	Год	Двигатель	Объём двигателя	Тип трансмиссии	Модификация	Передняя пружина				Задняя пружина			
						NHK No.	OEM No.	Устаревший No.	HD NHK No.	NHK No.	OEM No.	Устаревший No.	HD NHK No.

5. При выборе усиленных пружин используйте **номера NHK Heavy Duty (HD)**:

Модель	Год	Двигатель	Объём двигателя	Тип трансмиссии	Модификация	Передняя пружина				Задняя пружина			
						NHK No.	OEM No.	Устаревший No.	HD NHK No.	NHK No.	OEM No.	Устаревший No.	HD NHK No.

## II. Выбор пружин по О.Е.М. номеру

Выберите в кросс - таблице номер пружины NHK, соответствующий О.Е.М. номеру пружины.

**MEMO**

A series of horizontal dotted lines spanning the width of the page, providing a template for writing a memo.

## **Информация по установке пружины**

---

- Сжимайте пружину равномерно, надавливая на всю поверхность;
- Не путайте верх и низ. Обычно наиболее плоская сторона пружины является верхом, так как на нее надевается чашка амортизатора;
- Не убирайте резиновый отбойник с амортизатора. Используйте оригинальный отбойник. Неправильно подобранный отбойник или его отсутствие ведет к проседанию пружины;
- Проверьте прокладки под чашками амортизатора. Повреждение прокладок ведет к возникновению люфта пружины в чашках;
- Будьте внимательны в выборе амортизатора. Установка пружины на амортизатор с более коротким нежели OEM штоком ведет к перегрузке пружины и в результате к проседанию и слому пружины.

## **Для того, чтобы пружина работала долго и надежно, мы настоятельно рекомендуем:**

---

- Не модернизировать пружину (обрезать витки, распиливать, надпиливать, делать надсечки, сверлить и т.д.);
- Бережно обращаться с пружиной (не бить молотком, не зажимать в тиски, не обрабатывать кислотой и другими химическими растворами и т.д). Повреждения на пружине приводят к ее быстрому износу;
- Не разогревать/накалять пружину. Воздействие высокой температуры ведет к химическому дисбалансу пружины и потере необходимой гибкости;
- Не повреждать окрасочный покров пружины. На пружину нанесено специальное антикоррозийное покрытие. Его повреждение ведет к коррозии и слому пружины.
