## A different angle on performance.

Unique diagonal slot.

Nisshinbo brake pads feature a diagonal slot, designed to ensure optimal strength, flexibility and consistent performance, together with outstanding noise reduction.

- **Strength and flexibility** - the optimal degree of thermal expansion to prevent stress and surface cracking.
- **Noise prevention** - Diagonal design evenly distributes the contact between the pad and disc minimising noise and judder effect.

## Formulated for the future.

Next generation NAO.

The energy efficiency vehicles of tomorrow are being driven by ever-more complex technology. Developed through advanced materials expertise, Nisshinbo NAO formulations are trusted to deliver the braking performance and environmental qualities demanded by world-leading car manufacturers.

- **Sustainable performance and comfort** - Advanced low dust, low noise NAO formulation, with no compromise in braking effectiveness throughout the friction lifespan.
- **Consistent stopping power** - Tested to provide braking you can rely on 100%.
- **Long lasting quality** - A new generation of NAO material, engineered for excellent wear characteristics and maximum replacement intervals.

# Article Number Information

1. The first two letters determine the product group

- **NP** for **N**isshinbo **P**ads
- **ND** for **N**isshinbo **D**isc

2. The first digit determines the car manufacturer

## The shape of quiet braking.

### Nisshinbo J-chamfer.

Brake pad chamfers have a key role to play in reducing brake noise. The unique profile of the Nisshinbo J-chamfer leads to longer lasting noise reducing properties of the Nisshinbo brake pads.

- **Unique J-profile** - Available with Nisshinbo brake pads for Asian vehicles.
- **Super-quiet** - Specifically designed 'curve' reduces squeal, during bedding-in and throughout the working life of the friction material.
