## EN - IMPORTANT

Reproduction of this catalogue or parts thereof is only allowed with our explicit permission in writing. Pictorial representations and design are copyrighted. Claims for damages, of any form whatsoever, resulting from details made in this catalogue or from incorrect use, application, storage or handling, are explicitly excluded. Contractual rights and any resulting or related claims based thereon, irrespective of form, initially come into being on the basis of a separate written agreement, in particular on the basis of our general terms of sale and delivery.

All former statements lose their validity with the publication of this catalogue.

The catalogue is not an operating manual for the use and installation of cylinder head gaskets, oil seals and cylinder headbolts. It does not contain any advice in a legal sense. The catalogue neither replaces the constantly applicable technical regulations – particularly for tolerances – nor the installation and maintenance stipulations of the individual engine manufacturer.

Also, it is not possible to forego the expertise of those carrying out the installation and application. The individual references made in this catalogue for the installation and the application of cylinder head gaskets, oil seals and cylinder headbolts are instructions solely for the technically qualified specialist and are to be checked and verified by them for their suitability in each case. Federal-Mogul accepts no responsibility for application decisions.

The contents of the catalogue are not intended to create or substitute any contractual agreement which has to be reserved exclusively to a separate agreement between 2 identified parties, whereby seller can be only one of our Federal-Mogul entities as mentioned on the inside back cover.

The right is retained to correct errors and alterations, particularly with regard to amendments in the engine manufacturers' details and stipulations.

Schadenersatzansprüche in jedweder Form unter Berufung auf die Angaben in diesem Katalog oder infolge unsachgemäßen Gebrauchs, unsachgemäßer Anwendung, Lagerung oder Handhabung sind ausdrücklich ausgeschlossen. Vertragliche Rechte und etwaige hieraus folgende oder abgeleitete Ansprüche jedweder Art werden erst durch getrennte schriftliche Vereinbarung, im Besonderen auf der Grundlage unserer allgemeinen Verkaufs- und Lieferbedingungen, begründet. Mit Erscheinen dieses Katalogs verlieren alle früheren Angaben ihre Gültigkeit.

Der Katalog stellt keine Anleitung für den Gebrauch und den Einbau von Zylinderkopfdichtungen, Wellendichtringe und Zylinderkopfschrauben dar. Es werden keine Ratschläge im rechtlichen Sinne abgegeben. Der Katalog ersetzt weder die jeweils geltenden technischen Maßgaben – insbesondere für Toleranzen – noch die Einbau- und Wartungsvorschriften des jeweiligen Motorenherstellers. Auch ist die Sachkenntnis derer, die den Einbau und die Anwendung vornehmen, eine wesentliche Größe. Die Aussagen in diesem Katalog zum Einbau und Einsatz von Zylinderkopfdichtungen, Wellendichtringe und Zylinderkopfschrauben richten sich ausschließlich an den technisch versierten Fachmann und sind von diesem von Fall zu Fall auf Eignung und Gültigkeit zu überprüfen. Federal-Mogul übernimmt keine Verantwortung für Anwendungsentscheidungen.

**Attention:** mesurer systématiquement les dépassements de pistons au PMH pour déterminer le joint de culasse d'épaisseur optimale (voir les notes techniques en fin de catalogue pour identifier la correspondance entre le dépassement du piston et la réf. de joint).

**Warning:** it is strongly recommended that the gasket selection be made after measuring the UDC piston protrusion; see the technical notes at the end of the catalogue to have the link between the piston protrusion and the gasket part number.

**Attention:** mesurer systématiquement les dépassements de pistons au PMH pour déterminer le joint de culasse d'épaisseur optimale (voir les notes techniques en fin de catalogue pour identifier la correspondance entre le dépassement du piston et la réf. de joint).

**Warning:** it is strongly recommended that the gasket selection be made after measuring the UDC piston protrusion; see the technical notes at the end of the catalogue to have the link between the piston protrusion and the gasket part number.
