Overrunning Alternator Pulley (OAP)

www.waiglobal.com

WAI, A USA COMPANY

CLUTCH PULLEYS

The Overrunning Alternator Pulley (OAP) has a one-way clutch inside the pulley allowing the alternator's rotor to coast to a stop position when the engine is shut down. This "overrunning" feature eliminates "chirp" sounds that happens when the engine decelerates quickly, causing the belt to slip at the alternator pulley.

- ▶ Robust Patented Design
- ▶ Meets/exceeds O.E.M specifications
- ▶ Zinc-Nickel plated for superior corrosion resistance

Patented Design

PART NO. INDEX

Clutch Pulley Functionality and Benefits

The Overrunning Alternator Pulley (OAP) has a one-way clutch inside the pulley allowing the alternator's rotor to coast to a stop position when the engine is shut down. This "overrunning" feature eliminates "chirp" sounds that happen when the engine decelerates quickly, causing the belt to slip at the alternator pulley (engine shut down or transmission shifting). Other benefits are:

- **Belt**
 - Reduction of belt vibrations / force level
 - Avoid slippage at deceleration (gear shift 1-2)
- **Tensioning system**
 - Reduced forces and displacement
- **Alternator**
 - Reduced load on alternator bearings
 - Rotor is uncoupled
- **System**
 - Extended system life
 - Improved noise, vibration and harshness

The Overrunning Alternator Decoupler (OAD) has an internal one-way clutch that incorporates a torsion spring designed to absorb the base engine vibrations before reaching the alternator's rotor. With the installation of an OAD, you will notice less tensioner motion, reduced NVH (noise, vibration and harshness) plus an all around robust accessory drive. This will allow the use of a narrower belt with lower output tensioner that will result in longer life of the alternator, water pump and other accessories' bearings. Other benefits are:

- **Belt**
 - Stabilization of belt vibrations
 - Reduced force level on the belt
- **Tensioning system**
 - Reduced tensioning force and travel on tensioner
 - Increased service life on belt and tensioner system
- **Alternator**
 - Reduced load on alternator bearings
 - Rotor is uncoupled
- **System**
 - Extended system life
 - Improved noise behavior
 - Reduced idle speed to improve fuel economy
