Your Cool Business Our A/C Diagnostic Tools

A/C Diagnostic Tools

With the new A/C diagnostic tools HC-CARGO expands the AirCon range with new and up-to date technology helping you with eliminating potential failures on compressors and other aircon components.

Along with the comprehensive and extended compressor and components program HC-CARGO offers high market coverage and makes it easy for you to get your parts at one supplier.

Benefits of HC-CARGO Testing Tools

- Easy to apply and use
- Fast and accurate testing
- The tools can be used for testing after end repair to ensure the system is performing optimally
- Quality! Tested to comply with specification in the automotive market
- Saves time, saves money, provides happy customers

Leak Detector

With the new HC-CARGO Leak Detector you can extensively test for any leaks in your A/C System. An advanced microprocessor (The CT-CPU Series) is the heart of this unit. Its Digital Signal Processing permits better management of the circuitry and sensing tip signal than ever before possible.

Additionally, the number of components used in the circuit is reduced nearly 40%, increasing reliability and performance.

The microprocessor monitors the sensing tip and battery voltage levels 4000 times per second, compensating for even the most minor fluctuations in signal. This translates into a stable and dependable tool in almost any environment.

1. Microprocessor controlled circuit with advanced Digital Signal processing.
2. True Mechanical pump provides positive air flow through sensing tip.
3. Tactile keypad controls with one touch reset and adjustable sensitivity.
4. Flexible 14" Stainless Steel Probe.
5. Six (6) levels of sensitivity.
6. High and Low sensitivity levels.
7. Detects all halogenated refrigerants, certified for R134a, R12, R22.
8. CE Approved.
9. Battery Capacity test
10. Mute function

HC-CARGO 253528 Temperature Testing Tool

With the HC-CARGO temperature testing tool, you can easily test and diagnose potential failures within the air conditioning system.

- Manual incl. calculation sheet for converting measurements

HC-CARGO 253527 Compressor tester

With the HC-CARGO compressor tester, you can test the functionality of your compressor and possible failures in three easy steps.

- 1 set of power leads and wire harness
- 1 set connector/adaptor for various EU applications and universals
- 1 instruction guide
