

THERMOSTATS

The entire product range in tried-and-tested quality

The optimal operating temperature under all conditions.

Professionalism and expertise

For more than half of a century, the name HELLA has represented innovative solutions in the automotive market. As a leading original equipment manufacturer for passenger cars and commercial vehicles, we attract customers all over the world with comprehensive expertise, experience and first-class quality. Thanks to the ability to quickly translate new trends into appealing products, HELLA is an in-demand development partner and series supplier to the international automotive industry.

Premium quality for the aftermarket

For over 50 years, quality awareness and responsibility have been the two key terms defining our actions and, at the same time, providing the sustainable foundation of a partnership strategy that benefits all sides. In the aftermarket sector, HELLA not only provides reliable products, tried and tested many times over, but also optimal security through increased market coverage and, no less importantly, by using the original data of a certified TecDoc-Data supplier. The thermostat product range covers numerous application areas for globally leading passenger car and commercial vehicle brands. The extremely multifaceted product range spans from thermostat inserts to map thermostats with a state-of-the-art design. You can be sure that these are products in tried-and-tested quality in all cases.

THERMOSTAT INSERTS

Simple, efficient and tried-and-tested in millions of applications

Technology and impact:

- Used in millions of applications.
- Cost-effective and tried-and-tested technology.
- Condensing and expanding wax in pressure-resistant housing starting at a specified temperature.
- Pin is pushed out of the housing, the disc valve is lifted and the large cooling circuit is opened.
- This ensures that the engine is kept at an optimum operating temperature.

HOUSING/INTEGRAL THERMOSTATS

Perfect mixture with direct connection

Technology and impact:

Integral thermostats

- Further development of thermostat inserts.
- All components, such as a thermostat insert, cover and seal are perfectly integrated.
- Integral thermostats can be directly flange-mounted to the engine block.

Casing thermostats

- Complete thermostats for hose connection.
- Unlike integral thermostats, they already have a casing with a perfectly designed mixing chamber.
- They can be flange-mounted directly to the engine block or cooling water hoses (only valid for one type).

TECDOC

Reach the correct thermostats in only a few clicks

TecDoc Informations System GmbH, as a leading standard system for electronic part searches, is firmly established in the European automotive aftermarket. TecDoc gives you the ability to identify parts for orders without errors, thus preventing costly and time-consuming incorrect orders.

Overall, the platform offers information for around 1.7 million spare parts. Here, you can find detailed product descriptions, images and installation instructions for the entire product range of HELLA thermostats. In addition to part information, all necessary data is available for calculating and carrying out accumulated repair, installation, service and maintenance work for passenger cars and commercial vehicles. Thus, you can present your customer a cost estimate or repair order within a few minutes. HELLA thermostats are always delivered as garage-oriented sets.

HELLA TecDoc:

- 300 insert thermostats
- 182 housing thermostats
- 135 seals (also available as spare parts)
- This corresponds to a market coverage of over 90%
- Program supplement: map thermostats in preparation

SUITABLE TOOLS FROM HELLA GUTMANN SOLUTIONS:

Airlift set

Filling the engine cooling systems.

Radiator vacuum filling unit

Can be used to bleed parking heaters in a process-reliable and maintenance-free manner. Independent of the volume of the cooling system. Quick and bubble-free filling.

Cooling system test device

The cooling system tester is used to test for leaks in the cooling system. It detects a leaky cooling system by a pressure decrease.

Refractometer

Tried-and-tested garage testing device for determining the antifreeze concentration in the coolant and in the windscreen washer fluid, and for determining the state of AdBlueR.
