Finding	Cause	Remedy
Hissing/humming	Noises occur in all hydraulic steering systems. They are most clearly perceptible at low speeds and in the steering stop position. The intensity of the noise is not related to the output of the power-steering pump. Do not replace the pump or the steering rack unless the noises are unmistakable. A replaced power-steering pump or steering rack generates a slight humming noise.	
Poor self-alignment of steering wheel	Steering column drags	Align steering column
	Steering linkage or wheel suspension stiff (supporting joint, suspension strut bearing)	Replace
	Steering rack stiff	Set play according to manufacturer's instructions
	Steering column not aligned with steering rack	Align steering column
	Steering-column joint stiff	Adjust or replace
	Too little air pressure in tyres	Correct tyre pressure according to manufacturer's instructions
	Front wheels set incorrectly	Check steering geometry and adjust, if necessary
Jerky movement when turning steering wheel	Too little fluid in steering system	Correct as necessary

	Pump drive shaft bearings worn	Replace pump
	Insufficient fluid, resulting in entrainment of air in high-pressure fluid pump	Look for leaks in hydraulic system. To do so, turn steering to left and right-hand position to obtain max. pressure. Clean all parts beforehand. Eliminate leak and correct fluid level. Bleed system.
Howling	Pump drive shaft bearings worn	Replace pump
Squeaking/twittering	Loose or worn drive belt	Tension or replace drive belt

Gevonden klacht	Oorzaak	Mogelijke oplossing
Sissen / zoemen	In alle hydraulische stuursystemen treden bijgeluiden op. Bij geringe snelheid en het stuur volledig in linker of rechter positie (voll-edige stuuruitslag) zijn deze het duidelijkst waarneembaar. De sterkte van het geluid staat niet in verhouding met het gevraagde vermogen van de stuurpomp. De stuurpomp en/of stuurhuis niet vervangen tenzij het zeker is dat het geluid veroorzaakt wordt door een defect! Een stuurhuis of stuurpomp dat vervangen is zal een licht zoemend geluid maken.	
Stuurwiel komt niet, of slecht terug in neutrale stand	Stuurkolom loop aan Fuseekogels en/of stuurstangen of veerpotlagers van de wielophan-ging lopen zwaar Stuurhuis loopt zwaar Stuurkolom niet in lijn met aansluiting op het stuurhuis Stuurkoppeling van de stuurkolom gaat zwaar Bandenspanning onjuist (te laag) Slechte uitlijning Camber, Caster	Stuurkolom uitlijnen Vervangen Speling volgens gegevens van de fabrikant afstellen Lijn stuurkolom uit Afstellen, of indien nodig; vervangen Bandenspanning wijzigen (vlgs. voorschriften fabrikant) Uitlijnen

Constatations	Causes	Actions
Sifflement, Ronflement	Des bruits se produisent dans toutes les commandes de direction hydrauliques. Ils sont le plus souvent perceptibles à basses vitesses et à l'arrêt. L'intensité du bruit n'est pas liée au rendement de la pompe de direction. Ne remplacez pas la pompe ou la crémaillère de direction à moins que les bruits soient indubitables. Une pompe ou une crémaillère de direction remplacée génèrent un léger bruit de ronflement.
