# SUNSTOP®

UV PROTECTION, MULTIFILAMENT POLYESTER SEWING THREAD

A&E's Sunstop® is a high-performance, multifilament polyester sewing thread, offering advanced ultra-violet light protection. Sunstop® is ideal for outdoor applications where seam strength retention and fade prevention during UV exposure are required.

Sunstop® is also available in non-wick to help diminish moisture migration through the seams. Finishes include BT (Bonded) and SST (Stretched).

## ADVANCED UV PROTECTION

This sewing thread features advanced ultra-violet light protection, reducing strength degradation over traditional filament polyesters and color loss through fading.

## EXCELLENT SEWING PERFORMANCE

Engineered to provide an excellent sewing performance, this thread boasts excellent ply security with a consistent diameter and low moisture regain when bonded.

## COLOR AVAILABILITY

This sewing thread is available in popular, standard marine and outdoor shade colors for maximum color selection versatility.
