Re: Formula modification

Date 07/09/2020

Dear distributor!

Let me inform you that due to some FDA requirements for cosmetic manufacturing the formula of our products including Pain Freeze Gel, Stop Red gel, BC ointment and some others has been slightly changed. As you can see now it is mostly based on completely organic plants' extracts.

Let me assure you that this modification is a result of serious scientific research. ALL our products keep their excellent quality and effectivity, so you can use it with pleasure and numerous health benefits.

Best regards,

General Manager for Corona Colors Inc.,

Joseph Velasques

This modification doesn't affect it's perfect properties and even made it more effective.
