ROCCIA

Mouldable mineral plaster.

Roccia is a mouldable high thickness coating for interior use. It has been formulated with elastomeric emulsions and high resistant fillers and pigments. Its lightness allows the tools to move smoothly without much effort, retaining the pattern left by the tool that created it The irregularities of the old walls, the effects wood, the reproduction of antique fabrics are just a few examples of the versatility of the product enriched with special color cards specifically designed for the realization of the new environment.

Suitable for the decoration of walls, columns, internal and external elements of prestigious, ancient or modern buildings such as villas, showrooms public spaces.

Application

Stainless steel Trowel and the appropriate decorative tool: Apply the product as such. The filling and elastomeric properties of the product allows the application also on imperfect walls or having problems with cracks and fractures; the thickness that is obtained by the play of different finishes can level and enhance the properties of the support in an optimal manner and stable over time. Apply ROCCIA by means of a spatula made of steel or plastic, for thicknesses of about 1-3 mm and then, still wet work it by means of special decor tools until obtaining the desired effect.

Temperature of application: +5 - +35 °C
Relative humidity of application: < 85 %
Touch dry: 4-6 hours
Recoatable after: 12-24 hours
Completely Cured: 24 days
Cleaning tools: by water

Density: 1,15 -1,25 Kg/L
pH: 7 -8
Weight Solids: 62%
Coverage: 0,5-1 m^2/Kg
Colour: Color chart
Aspect: Matt
Pack Size: 4 - 20 -24 Kg

System

Step	Name	Coats	Yields	Color code	Tools
1	Primer Normal	1	1lt/10 m^2	x	Roller
2	RUVIDO	1	1lt/10 m^2	x	Roller
3	Roccia	3	1kg/0,8-1 m^2	Color chart	Inox trowel
4	Velatura	1-2	1lt/10-15 m^2	Color chart	Sponge
