The next step is to connect the SSID, please follow the instructions in the picture.
The password for the SSID is 1234567890.

After you connect to the SSID, your devices can connect to the network if there is no accident. If your device cannot connect to the network normally, please check if your SIM card's frequency band is compatible with the product. If it is compatible, we suggest that you disable the SIM card's PIN code or modify the SIM card's APN.

RELEASE**

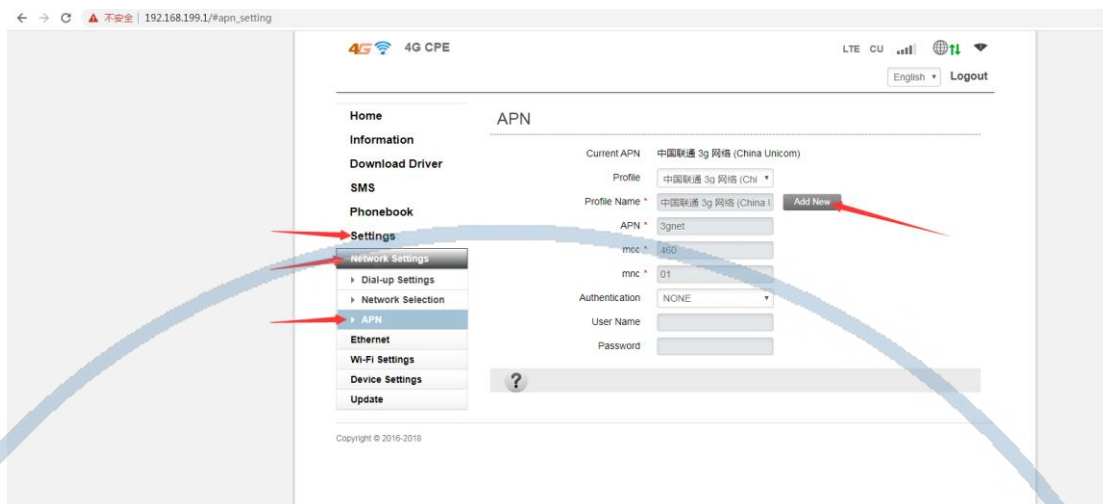

About the setting method of PIN:

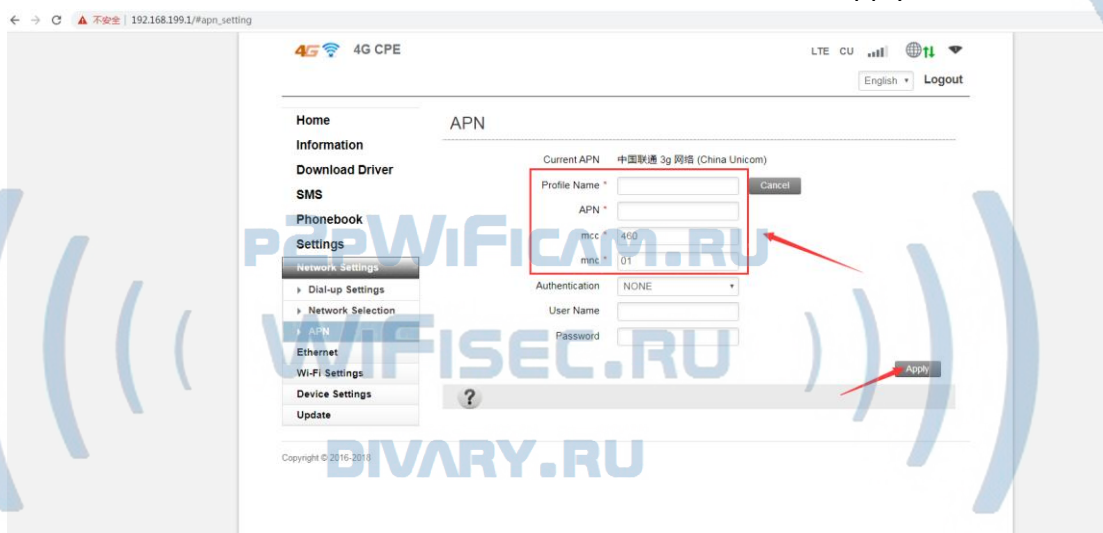

The following is how to set the APN:

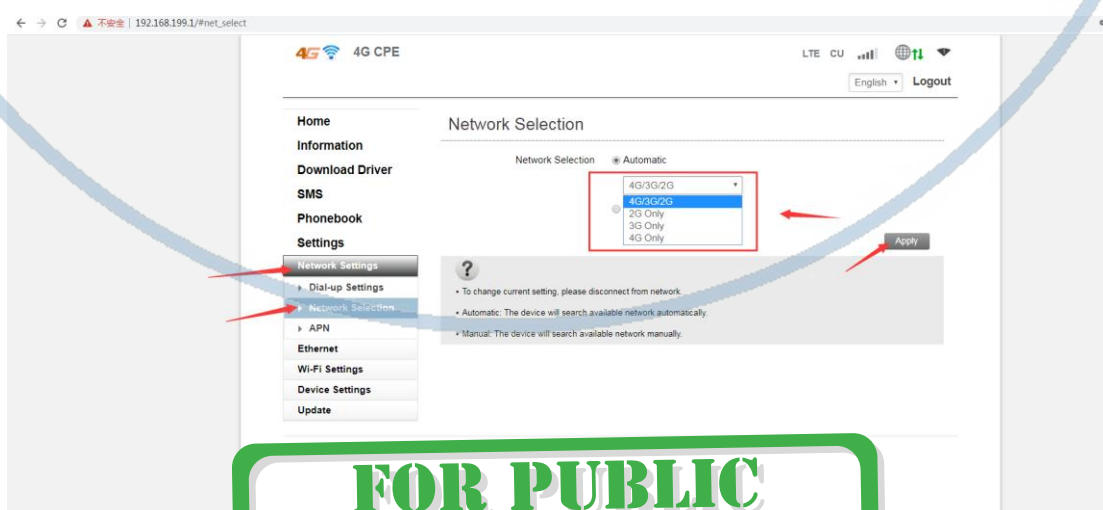

You need to click on "APN" in "network settings" and then click on "add new".

Please fill in "Profile Name", "APN", "mcc" and "mnc" and click "Apply".

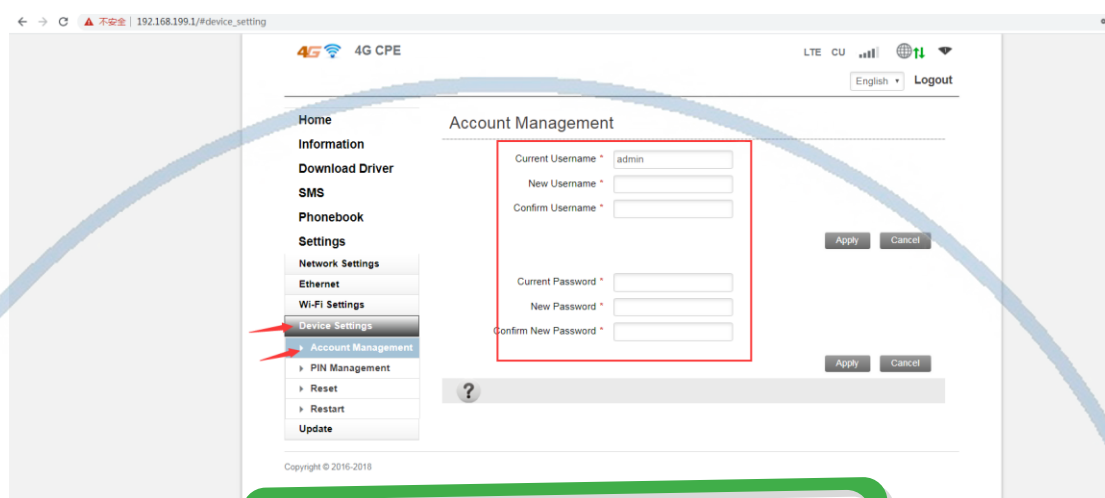

If signal is unstable, you can also manage the settings page, lock 4G or 3G network, can effectively improve the stability of the network.

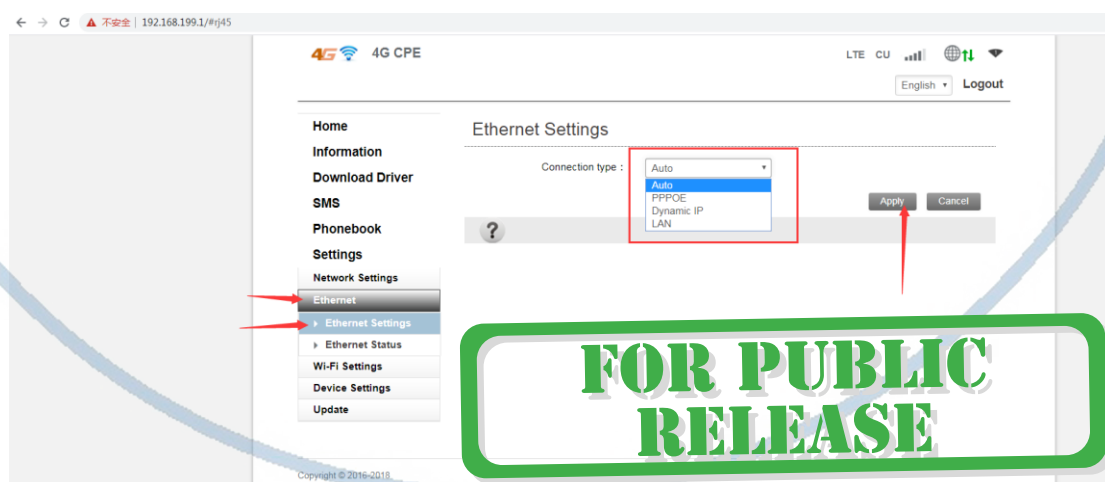

**FOR PUBLIC
RELEASE**

You can change the username and password of the SSID at will:

This is the setting option for the network cable:
