The future of WIDIN is always bright.

WIDIN share the same vision with it's customers in a way of providing top quality products at competitive price and best service, and Pursue the core management's policy "Customer-forcused company".

WIDIN has grow rapidly both domestic sales and export. This performance from its innovation of technology, Quality and marketing activity.

As WIDIN's mission, will do its best to deliver customer satisfaction to around the world.

Greeting

Making customer's dreams a reality- The best mechanical solution.

Since its establishment in 1988, WIDIN CO.,LTD. has been contributed to pursue the utmost customer satisfaction for the current and potential customers in the globalized market.

With continuously doing development and creativeness of the new technology through the great initiative, we, WIDIN CO.,LTD. is always ready to response of customer needs in customer mind and eye.

To cope with the enormous, various customer demands and satisfaction from popular products to high value added products in the cutting tools industry, WIDIN CO.,LTD. will put its best effort and will play a role of marketing initiator to lead the new 21st era by production and marketing linkage.

Aim to provide the best for money, fine tuned price, utmost quality, excellent customer services based on professionalism, all WIDIN CO.,LTD. will promise to do its best effort at time and where it is.

Thank you.

TiCN coating for general use

- Designed for high performance of threading Carbon steel, Alloy steel and Nonferrous metals.
- By applying TiCN coating, it provides stable and highly efficient operation due to enhanced durability.

TiN coating for general use

- It is applicable regardless of steel or Nonferrous alloys.
- By applying TiCN coating, it provides stable and highly efficient operation due to enhanced durability.

TiCN coating for general use

- It is applicable regardless of steel or Nonferrous alloys.
- By applying TiCN coating, it provides stable and highly efficient operation due to enhanced durability.

Recommended tapping speeds and lubricants DIN STANDARD

Tapping speeds depend on very important factors such as material and type of tap, chamfer length, dimension of holes, work materials and fluids.

Users need to check every aspect before applying it.

Moreover, lubricant, cooling and abrasion resistance are three important factors affecting cutting fluids. Therefore, users should provide enough fluids during the tapping process.

Standard Recommended tapping speeds and applicable lubricants

Work Material		Recommended tapping speeds(m/min)				lubricants
