

Pure

Allow your wine to mature in optimal conditions

Maturing, serving and multi-function (maturing and serving) wine cabinets, the Pure range respects the environment.

It has elegant finishes to allow it to complement all living areas.

Three functions

Wine maturing cabinets recreate the same conditions found in a natural cellar, by meeting the criteria essential for storing wine.

Wine serving cabinets offer up to ten temperature zones (temperature graduated from 5 - 22°C), and allow you to store, in one same cabinet, several types of wine (rosé, white, red), at an ideal serving temperature.

Multi-function cabinets they have three separate temperature zones: 1 zone for maturing wine (9-15°C), 1 chilling zone at the bottom (6-10°C) and 1 zone at the top for bringing wine to room temperature (15-22°C).
