UNI-B

CONTINUOUSLY ADJUSTABLE STROKE

Feedback of UNi-B

on the skin. But the application on black is very good. The lines are not easy to come out good because of this problem i mentioned. The weight of the machine is good. The screen display is good. Battery functions good and it lasts similarly to the uni-A

I recorded these samples to hear also the sound of the machine and the chances it makes. Except from that i like this machine i think it is strong

No the sounds changes throughout the session. While working it gets loud then makes a more smooth sound and gets faster.

你回复了自己

I want to know how many tattoos have you made with our UNI-B

and this question

I use it 4 days so i did 5 tattoos and changed 3 batteries

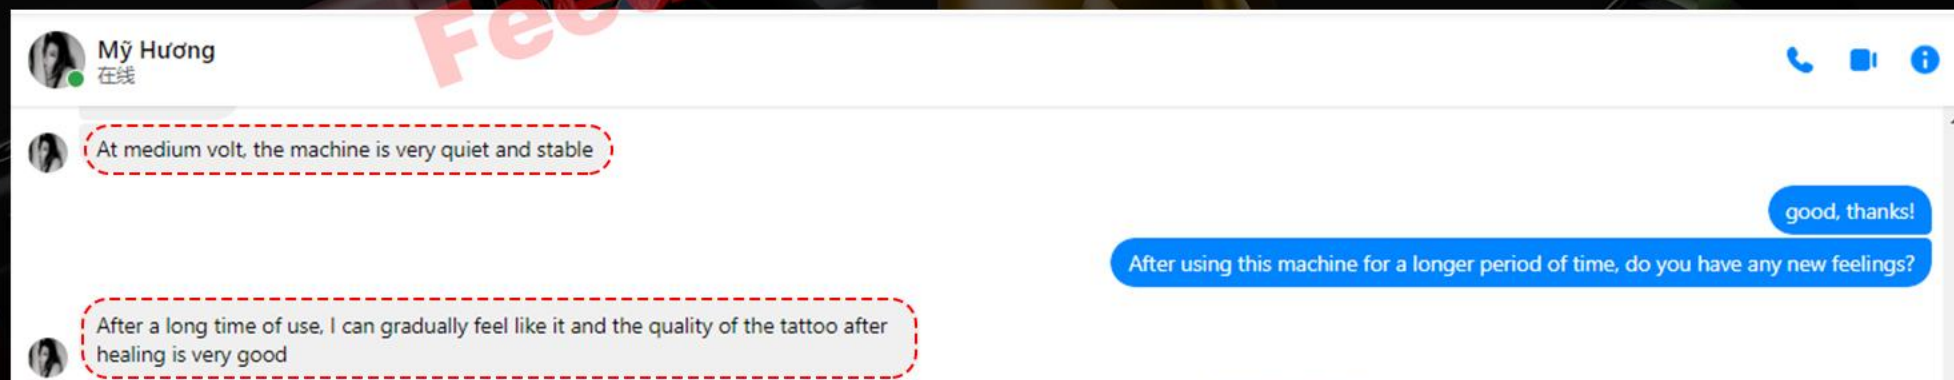

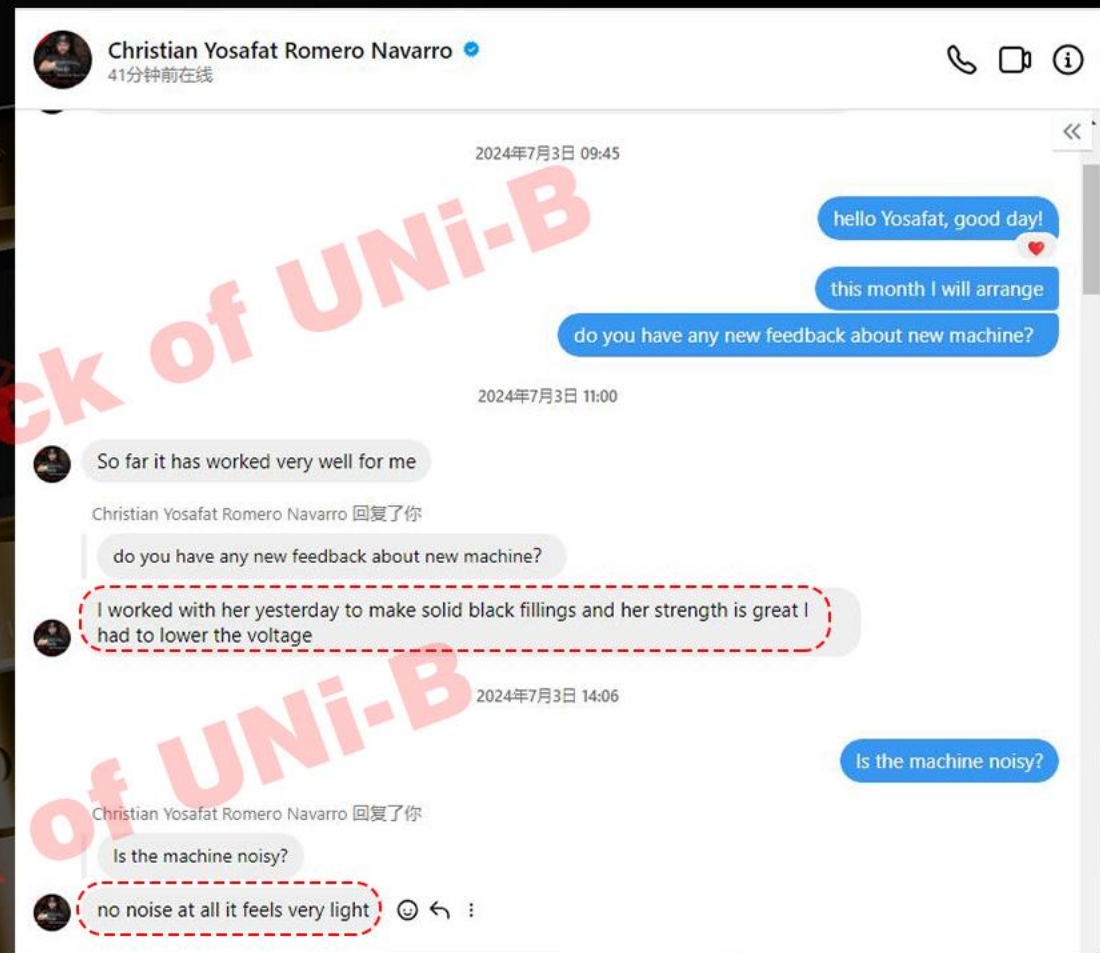

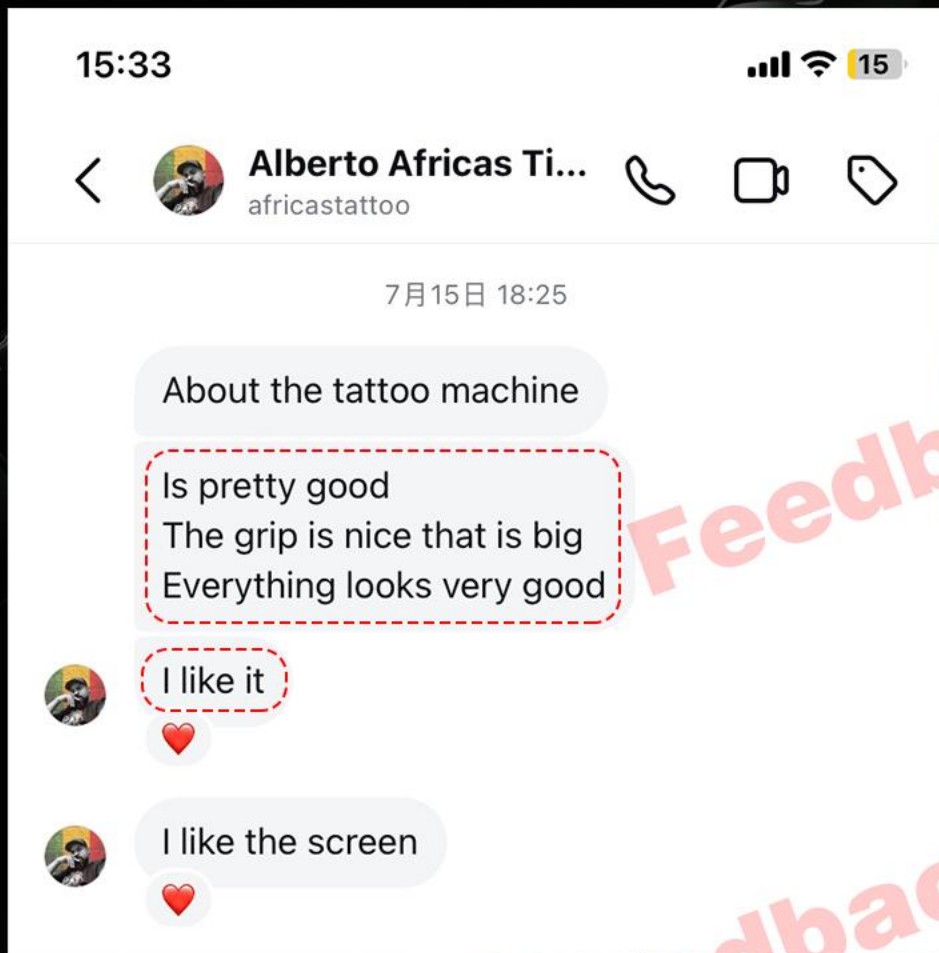

5 or 6

Ok I know thanks

We hope you can continue to use it to help us test

Yes i will work more with it and i will try to film a little bit more of the working
