Product Name: Melanotan II
CAS Number: 121062-08-6

Catalog No.: 2566 **Batch No.:** 9

1. PHYSICAL AND CHEMICAL PROPERTIES

Batch Molecular Formula: C₅₀H₆₉N₁₅O₉
Batch Molecular Weight: 1024.19
Physical Appearance: White lyophilised solid
Counter Ion: TFA
Solubility: Soluble to 0.70 mg/ml in water
Storage: Store at -20°C
Peptide Sequence: Ac-Nle-cyclo-(β-Asp-His-D-Phe-Arg-Trp-ε-Lys)-NH₂

2. ANALYTICAL DATA

HPLC: Shows 98.4% purity
Mass Spectrum: Consistent with structure

3. AMINO ACID ANALYSIS DATA

Amino Acid Theoretical Actual			Amino Acid Theoretical Actual		
Ala			Lys	1.00	0.95
Arg	1.00	0.97	Met		
Asx	1.00	1.08	Phe	1.00	1.94
Cys			Pro		
Glx			Ser		
Gly			Thr		
His	1.00	1.07	Trp	1.00	0.60
Ile			Tyr		
Leu			Val

Product Name: Melanotan II

Catalog No.: 2566

Batch No.: 9

CAS Number: 121062-08-6

Description:

Melanotan II is a high affinity melanocortin receptor agonist (K_i values are 0.67, 6.6, 34 and 46 nM for MC₁, MC₄, MC₃ and MC₅ receptors respectively). Stimulates erectile activity, inhibits food intake and displays neuroprotective properties in vivo.

Physical and Chemical Properties:

Batch Molecular Formula: C₅₀H₆₉N₁₅O₉

Batch Molecular Weight: 1024.19

Physical Appearance: White lyophilised solid

Peptide Sequence:

Ac-Nle-cyclo-(β-Asp-His-D-Phe-Arg-Trp-ε-Lys)-NH₂

Storage: Store at -20°C

Solubility & Usage Info:

Soluble to 0.70 mg/ml in water

This product is supplied in lyophilized form. It may appear as a solid, gel or film and be very hard to visualize. Solutions should be made by adding solvent directly to the vial. The vial should then be vortexed vigorously to ensure the product has completely dissolved.

Counter Ion: TFA

Stability and Solubility Advice:

Some solutions can be difficult to obtain and can be encouraged by rapid stirring, sonication or gentle warming (in a 45-60°C water bath).

Peptides in solution are much less stable than in lyophilized form. This is especially true for peptides whose sequences contain amino acids such as Cys, Met, Trp, Asn, Gln, and N-terminal Glu.

Therefore we recommend storing peptides in solution for as short a time as possible. Avoid repeated freeze thaw cycles by dividing the peptide solution into aliquots and storing the aliquots at -20°C. Any portion of an aliquot unused after thawing should be discarded.

Peptides stored in solution can occasionally be susceptible to bacterial degradation. We recommend using sterile solutions or passing the peptide solution through a 0.2 µm filter to remove potential bacterial contamination whenever possible.
