FP3010/FP3020/FX3030

December 2017

NEW MOTOR SINCE CW24/2017

All BRAUN FP3010/3020 (type 3205) and FX3030 (type 3202) have a new motor since production week 24/2017.

The new motor (called ABJ) can be used also for older models – but additional parts are needed for that case.

So in case the motor has to be changed for repairs, please check at first the date code on the bottom of the device:

Date code has three digits, which mean YWW – year and calendar week (CW).
In this case, 604 means CW04/2016.

- 1) If date code is 724 (CW24/2017) or later, e.g. 725, 726, 727,...
 - ➔ Only motor needs to be changed
 - ➔ Please order: 7322010874 ICS FP/FX3XXX MOTOR ABJ INT

- 2) If date code is 723 (CW23/2017) or earlier, e.g. 715, 603, 542, 450, 312,...
 - ➔ Additional parts **must** be changed
 - ➔ Please order and change Motor, PCB, Toothed Belt, Cable Guide and Powercord.
There are differences depending the type (FP or FX) and the country versions:
 - (1) New Motor is the same for FP and FX
 - (2) PCB needs to be changed due to a different capacitor used for new motor
It exists one PCB, that is the same for FP and FX
 - (3) Toothed Belt and Cable Guide need to be changed due to different dimensions of the new motor
Both parts have different versions for FP and FX
 - (4) Powercord needs to be changed as there is added a ferrit core due to safety reasons
