## Questions and Answers:

**FOR PUBLIC  
RELEASE**

**Q:** The LCD monitor didn't show the camera ?

**A:** ① Please check if the camera is powered on .

② If camera is powered on please reset the camera to factory settings and add the camera according to steps 3.1.

**Q:** There is annoying sound when use the talk function in near distance?

**A:** When the camera and monitor is within 2meter distance there might be some noise which is a normal Physical phenomena. You can adjust the monitor volume down or keep the camera and monitor from longer distance.

**Q:**The monitor battery drains fast?

**A:**① If you don't open the Dormant mode and the monitor will works all the time so the battery will run faster. Suggest to use Dormant mode with 30S or 60S to save battery.

② The brightness of the monitor maybe too much high could lower down the brightness to expand the standby time.

**Q:**The transfer distance between the camera and monitor not far?

**A:** In an open environment the camera and monitor could transfer as far as 300meters .While for indoor use in case of interference the transfer distance will be influenced like too many walls and wireless electronic devices .
