

Navigator Gaff Yawl suggested rigging list

This is a spreadsheet that I used to compile what hardware to order from Duckworks. It should help you get started, but please note that it comes with several disclaimers. Everyone rigs their boats differently. Yours won't be exactly the same as mine. Don't just order everything on this list!!! I built the gaff rig sailplan. If you're building the lug or sloop, obviously there will be differences. Duckworks has expanded their selection of hardware since this spreadsheet was made. Look around their site. You may find hardware you like better than what I used. I especially like the new Mantus anchors. I think if you review my blog post at <http://navigatorjoel.blogspot.com/> - and shop duckworks, you will be fine. - Joel Bergen
