Detailed safety instructions

- For your safety and to be proficient in using this machine, please read and understand all the safety and operating instructions in this book before use.
- In order to use and maintain this machine more conveniently in the future, please keep this manual in a safe place for inspection if necessary.
- For the safer use of this machine, please observe all warnings and precautions on the device and in the instructions.
- Be sure to use the lithium battery and adapter supplied with this product to power the product! Using a poor quality battery may cause the battery to explode or cause a fire due to battery quality!
- If you are not using the visual microphone for a long time, remove the battery of the visual microphone and fully charge the battery!
- If you do not use the microphone handle for a long time, please keep this product out of the reach of children! Keep the battery in a place that is not easily accessible to children!

Please do not bring this product to children to play!

- Please consult and install the machine in accordance with the manufacturer's instructions, please place it in a place where it is easy to ventilate. Do not block all ventilation holes on the machine. Do not cover the machine with items such as newspaper, tablecloths, curtains, etc.; do not place the machine on a quilt or long velvet carpet.
- Do not use the machine near water or in damp places, such as bathtubs, toilets, laundry tubs, kitchen sinks, wet basements, swimming pools; do not drop or pour water or other liquids into the machine. Avoid using it in a place filled with flammable or explosive gases such as petrol stations or dust.
- Do not use the machine near a heat source, such as heaters, heaters, electric heaters, high-power amplifiers, etc.
- Do not place objects that are dangerous to the machine. For example, articles containing liquids such as cosmetics, vases, etc.; exposed flame sources such as ignited candles; flammable and explosive medical and chemical products such as alcohol and water.
- Do not use a chemical solvent such as alcohol to clean the machine. Doing so may cause damage to the surface of the machine. If necessary, wipe it with a clean, dry cloth.
- Avoid damage or damage to the power cord and plug. Do not force the power cord and other components. To remove the unit, unplug the power cord.
- When thunder or lightning, or if the machine is not used for a long time, immediately turn off the power of this unit and unplug the AC power cord.
- If the following abnormal conditions occur, immediately turn off the power of this unit and unplug the power cord, and contact your local dealer or have it been repaired by a professional:

"Metal or other foreign matter falls into the machine; water or other liquid enters the machine; or after rain."

2) When the power cord or power plug is damaged, such as the core is exposed or broken.

3) When the machine emits smoke, smells or other abnormalities.

4) When the machine is dropped on the ground or when the work is not working properly.
