

KALININGRAD REGION (BALTIC SEA) - RUSSIAN FEDERATION

The fish processing enterprise OOO Poseidon-2000 was founded in 2000. It occupies an advantageous geographical position in Baltic Gulf. Our own storage capacity for hold fillet fish of Baltic Origin locate in Kaliningrad Region (exactly). Capacity of process fishfillet is 5 mt per day.

It's fishing-processing company which produce fillet of different kind of fillet from fish of Baltic Sea (CODFISH, PIKE PERCH, PERCH, FLOUNDER). Moreover we make cod liver, cod caviar. The main types of production in Kaliningrad Region is the production of canned fish and preserves.

The company has own fishing ships and long-term relationships with fishers in the Kaliningrad region. Initially, we built the canning and canning shop of OOO Poseidon-2000 in Russia, but after that we investigate the European standards which allow us to produce fishfillet to export. And in May 2001, permission for export our fishfillet production was obtained. We have EU number for export frozen fish fillet in European Union. We have only land production fish fillet.

Thus we make the skinless fishfillet by handy made on our plant in Kaliningrad Region (one time land frozen). We sell our fillèt production on export (Holland, Germany, Spain and etc) more then 15 years. Brend of "Poseidon-2000" has a demand among buyers in Russia and CIS countries and Europe.

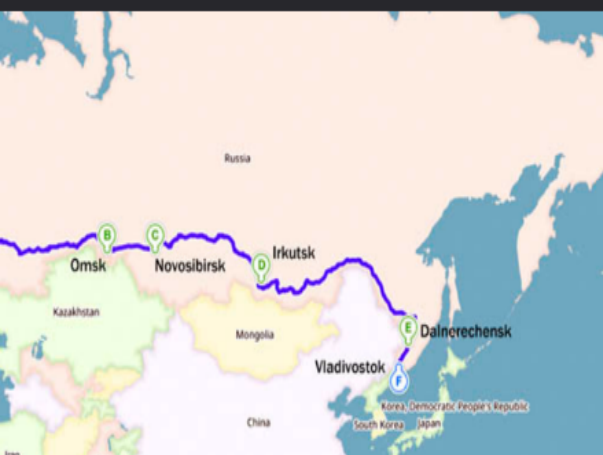

MURMANSK (BARENTS SEA) - RUSSIAN FEDERATION

We have part of equity in the fish processing enterprise in Murmansk which was founded in 2007. This company has own land production and ships which provide us FAS (frozen at Sea) fish fillet. We have following kinds of fish fillet of Barents origin (Codfish fillet, Seida fillet, Haddock fillet). Our plant have baader for cutting fishfillet due to this we can process 8 mt of fish per day. We work on order, our storage in Murmansk. But for long term relationship`s customers we can propose locate our goods on storages in Bremenhaven (Germany) or Velsen (Holland).

Moreover we propose crab production (Barents origin) from red king crab. We have storage in Latvia Liepaja from which we can prepare cargo in accordance to offer of clients (walking legs, meat and etc).

VLADIVOSTOK, SAHALIN (JAPAN SEA, OHOTSKOE SEA) - RUSSIAN FEDERATION

Our partners locate in Vladivostok and Sahalin. Thus we can sell fishfillet from Japan and Ohotskoe Sea origin (Chum salmon, rose salmon (keta), Calmar).

We have partners which provide us crab production (whole red king crab, blue crab, brown crab).

We can propose single frozen origin fishfillet which we produce in Vladivostok,Sahalin. But we can buy raw materials (frozen h/g) from Far East of Russia and make fillet on our plant in Kaliningrad Region.

KALININGRAD REGION, VLADIVOSTOK and SAHALIN

- We have EU number, we preparing all necessary certificate for export in EU country and USA. Our ship has catch certificate. Poseidon 2000 has Hazard Analysis and Critical Control Points (HACCP) certificate which guarantee high quality of our production.
 - We build new plant in Kaliningrad Region on 15 mt per day in 2018 and our capacity will be 20 mt per day.
 - We have handy made land production of fishfillet production (single frozen). We make on this plant PBI skin on fillet, PBI skinless, PBO skinless fillet.
 - We froze fishfillet like IQF and can make glazing in accordance to order.
- We can make any box (from 3 to 400 killo). But our standart is 5 kg carton box. Can make palletbox.

MURMANSK REGION

- This company has MSC certificate, EU number, and all necessary certificates for export in EU country and USA. Ships have catch certificate. Plant make a Hazard Analysis and Critical Control Points (HACCP) certificate which guarantee high quality of our production.
- We have baader land production of fishfillet production (single frozen). We make on this plant loins, tails, bells, PBI skin on fillet, PBI skinless, PBO skinless fillet.
- skin on. This products locate on Velsen (Hoiland).
- Main part of our fishfillet will be made in interleaved block 6,81 kg in box 20,43 kg.
- We can froze fishfillet IQF and can make glazing only 5%.
- We froze bells in block in the amount of 7,5 kg.

OUR TRAILER MARINE SHIPS

In Kaliningrad we have own ships which provide us own raw materials (chilled and fresh fishes). We have quote for fishing and we have catch certificate for export which garantee that our production will be access on EU or USA market. We can propose too h/g codfish for export in Europe Union or other countries, but only with EU number. In Kaliningrad Region there are season of fishing , thus we have no significant volume of production (June- August) by reason absent of raw materials. Thus our capacity 5 mt per day in this mounths are very slow.

Raw materials from Baltic Sea- baltic origin are small size due to Sea characteristic (since 300- 1 killo)

In Murmansk and Vladivostok there are own ships and fishers which have with us long term relationships and msc certificate which allow us export fish fillet from their ships in EU market. We can propose too h/g

In Murmansk and Vladivostok there are own ships and fishers which have with us long term relationships and msc certificate which allow us export fish fillet from their ships in EU market. We can propose too h/g codfish for export in Europe Union or other countries with EU number and MSC. There are no break in production of fish fillet , but break can be arise only by reason of strong wind. Our production per day 8 mt can be permanently. Raw materials from Barents Sea- barents origin are big size due to Sea characteristic (since 1- 5 killo). Raw materials from Japan and Ohotskoe Sea- are big size due to Sea characteristic.

ООО Poseidon -2000 is a young company, but it establish the high-quality products and make the long term trust relation ship with customers. Poseidon-2000 LLC has employs which are the qualified specialists with extensive experience in the fishing industry. They are constantly engaged in expanding the range of fish products, studying consumer demand outside the Kaliningrad region. We have own laboratory for make expertise of quality of our finish productions.

REWARDS AND HONORS

From the moment of foundation, the release of more than 30 types of canned food and preserves has been mastered. The main direction of our work is the production of freshly caught fish from the Baltic Sea. Working on fresh raw materials allows a convenient geographical location and proximity to the piers of the fishing fleet. Production of canned food and preserves from fresh raw materials makes it possible to produce high-quality and competitive products. Such as: "Cod Liver Natural", "Cod Cod Sterilized", "Baltic sprat sprat and special salting".
