

ABSOLUTE & INCREMENTAL ENCODERS

elap

► THE COMPANY

Since 1968 **ELAP** has been growing in the field of industrial automation, soon becoming leader manufacturer of **position sensors and control equipments for industrial automation.**

ELAP product line offers a wide array of **position transducers and a choice of counting and control equipments**

Absolute & Incremental Encoders

Wire Transducers

Linear & Magnetic Transducers

Linear & Rotary Potentiometers, Industrial Joysticks

Vibration & Tilt Sensors

Electronic Counters & Readouts

PLC Controllers & HMI

ELAP represents as sole distributor in Italy the companies:

The accuracy and reliability featuring **ELAP** products result from advanced **technological research** joined to the long experience we achieved working strictly in touch with our customers. Proposing the best solution for each industrial reality is our goal; custom tailored solutions can be engineered if necessary.

Numberless **applications** have been developed on operating machines of all industrial fields: sheet working machinery, glass, wood-, paper-machinery, plastic- and textile machines, food-processing and further.

ELAP takes part to **international technology communities** promoting and supporting the development of industrial networks.

▶ ROTARY ENCODERS

ELAP offers a wide range of encoder types, with different dimensions, mechanical and electronic features.

All series are designed to be used in **industrial environment**, granting high performances for **reading accuracy, repeatability, speed, shock and vibration resistance**.

The **different output signals** allow to **interface to any counting and control system**.

Special versions can be engineered according to customers' specifications.

▶ ABSOLUTE ENCODERS

ELAP single and multiturn encoders provide:

- Reading resolution ranging from **4 to 13 bit**, and **2 to 16 bit steps/revolution**
- **Binary or Gray code**
- **SSI, push-pull parallel, 0-10V analogue outputs**
- **Communication protocols:**
EtherCAT® - PROFINET® – PROFIBUS® – CANopen®

Coming soon:

▶ INCREMENTAL ENCODERS

ELAP incremental encoders offer:

- Several different mechanical versions
- Number of ppr ranging from **2 to 50000**
- Push pull or line driver electronic output

RM22

RM36

Dimensions	Ø 22 mm	Ø 36 mm
Flange		Ø 36 mm
Fixing	2 holes	4 holes on Ø 26 mm
Connections	Radial cable L 1 m	
Shaft Ø	6 mm	
Housing material	Aluminium	
Protection degree	IP64 – IP65 on request	
Supply voltage	5 Vdc	
Output signals	Line driver TTL	

RM22 & RM36 are high-speed magnetic rotary encoders designed for use in harsh industrial environments. The non-contact two-part design removes the need for seals or bearings, ensuring long-term reliability and simple installation.

The encoder comprises a magnetic actuator and a separate encoder body. Rotation of the magnetic actuator is sensed by a custom encoder chip **within the body, and processed to the required output.**

RM22 & RM36 are available with different absolute and incremental versions.

RM22 – RM36 Magnetic encoder – Incremental or absolute version available

RM22-I	RM36-I	Incremental encoder 128 ppr – 5V line driver output
RM22-P	RM36-P	Incremental encoder 128, 512, 1024 ppr – 5V line driver output
RM22-S	RM36-S	Absolute encoder 9 bit binary code – parallel output
RM22-A	RM36-S	Absolute encoder 9 bit binary code – SSI output
RM22-A	RM36-A	Sin/cos encoder – 1 Vpp ±0,1 mV analogue output
RM22-V	RM36-A	Encoder with voltage analogue output 0/5 Vdc on 360° with clockwise rotation
	RM36-V	Encoder with voltage analogue output 0/10 Vdc on 360°, 180°, 90°, 45° with clockwise or cc rotation

Zero reference	On request (<i>type E31/E41</i>)		
Supply voltage	5 Vdc – 8/24 Vdc		
Output signals	Push-pull – line driver TTL/HTL		

Series E30 & series E40:

Compact-sized and accurate these miniature encoders are ideal for a great number of applications.

The series **E40** includes different flange types: round, square, hollow shaft.

The optional aluminium-housed version X27 grants high protection against environmental agents.

MRAN pointed polyurethane surface
MRAG corrugated polyurethane
surface

SUPPORTING ARM

Encoder **supporting arm** type **B100**

Encoder with supporting arm and wheel

► ORDERING INFORMATION

ELAP encoders offer different options for mechanical size, flange type, shaft dimension, connection type and position, case material – as well as a choice of electronic signals, fieldbus interfaces, resolution values, ppr no.

A number of information are necessary to define the requested encoder type, when placing an order :

INCREMENTAL ENCODERS

- **SERIES**

Eg E30, E40S, RE50, E620, EM, etc.

- **CASE MATERIAL**

Aluminium/ABS

- **FLANGE TYPE**

Eg 520/540/620 etc.

- **SHAFT Ø**

4, 6, 8, 9.52, 10 mm etc.

- **CONNECTIONS TYPE & POSITION**

Cable/Connector - Axial/Radial

- **PULSES/REVOLUTION NO.**

2÷50000

- **ZERO REFERENCE**

0/1

- **SUPPLY VOLTAGE**

5 Vdc, 5÷28 Vdc, 10÷30 Vdc

- **OUTPUT SIGNALS**

Push-pull, Line driver

ABSOLUTE ENCODERS

- **SERIES**

Eg MEM, MEM-BUS, EMA etc.

- **CASE MATERIAL**

Aluminium/ABS

- **FLANGE TYPE**

Eg 520/540/620 etc.

- **SHAFT Ø**

4, 6, 8, 9.52, 10 mm etc.

- **CONNECTIONS TYPE & POSITION**

Cable/Connector - Axial/Radial

- **SINGLE/MULTITURN**

- **RESOLUTION**

4-13 bit

- **STEP NO.**

2-16 bit

- **CODE**

Binary/Gray

- **SUPPLY VOLTAGE**

5÷28 Vdc, 10÷30 Vdc

- **OUTPUT SIGNALS**

SSI, PARALLEL, 0-10V ANALOGUE

Interface:

EtherCAT/PROFINET/PROFIBUS/CANopen

The encoder nomenclature indicates the encoder specifications:
